HOW TO ORDER:

- 1 SELECT A PANACEA TAILLIGHT FOR YOUR SPECIFIC APPLICATION
- 2 SELECT PANACEA REAR TURN SIGNAL INSERTS FOR YOUR SPECIFIC APPLICATION
- 3 SELECT L.E.D. FRONT TURN SIGNAL CONVERSIONS FOR YOUR SPECIFIC APPLICATION (OPTIONAL - PG 56)

COMPLETELY PLUG-&-PLAY, THIS SYSTEM ALLOWS THE STOCK REAR INCANDESCENT LIGHTING TO BE TRANSFORMED INTO A BRILLIANT MULTI-FUNCTION L.E.D. SYSTEM.

IMPORTANT INFORMATION ABOUT PANACEA TAILLIGHTS

- 1 All wiring for trailer lights must be spliced into the wiring harness ahead of the Panacea Control Module.
- 2 If the rear of the motorcycle is equipped with any incandescent lights that were not original equipment, such lights must be spliced into the wiring harness ahead of the Panacea Control Module. Police models are often equipped with additional lights not found on their civilian counterparts. Be aware that these lights must be rewired, removed, or converted to L.E.D. prior to installing a panacea system.
- 3 The Panacea Taillight system meets FMVSS #108 when operated in "DOT mode". There is no provision in FMVSS #108 for flashing brake or amber arrows so those features are disabled when operated in "DOT mode".
- 4 Panacea Taillights can be used on '97-'01 Dynas, '96-'01 Fat Boy & FXST (except Deuce), & '99-'01 XL models, but they must be used with stock turn signals. Panacea Turn Signals are not available for these applications.

WHY USE PANACEA REAR TURN SIGNAL INSERTS?

L.E.D. Silver Bullets, stock turn signals, or other custom single filament lights can be used with the Panacea Taillight System but they will function as turn signals only. The Panacea Taillight will retain all of its functions (run, pulse brake, & amber directional arrow). To Realize the Full Benefit of Two-Color, Multi-Function Turn Signals Made Possible by the Panacea System, You Must Use Panacea Rear Turn Signal Inserts.

REAR RUN-TURN-BRAKE CONTROLLER WITH PULSE BRAKE

This module makes single filament or single circuit turn signals on the rear of the bike function as running lights, turn signals, and brake lights; not just brake/turn like our competitors! It can be used with our L.E.D. Silver Bullets, stock turn signals (red lenses sold separately) or any single filament light you may already have installed on the rear of your bike. Completely plug-&-play for most '96-newer H-D's. Compatible with '02-later H-D factory cruise control. Pulsing Brake feature can be turned on/off easily. '97-'13 Tour-Pak lighting can also be converted from stock Run-Brake to multi-function Run-Turn-Brake! One kit converts your stock taillight, turn signals and Tour-Pak lights.

Note: 1. These are NOT the same controllers used in Kuryakyn Panacea Systems and cannot be used in conjunction with other aftermarket or accessory modules that alter the functions of the stock taillight and turn signals. If you have already made modifications to your bike's taillight and/or turn signals, you will have to return your bike to stock form before installation. 2. Motorcycles equipped with CAN bus electrical systems never require use of a load equalizer. MAKE SURE IT FITS! USE OUR *Shop by Bike* FEATURE @KURYAKYN.COM
