## INNER TUBES

- Michelin Airstop tubes are used by those who want the very best
- Features an overlap splice which is stronger than the butt splice used in most others
- Splice is always placed opposite the valve, which helps to provide a more balanced tube
- For Valve Stem Types see above

## BIB MOUSSE®

- Made from a multi-cellular butyl material, Bib Mousse replaces conventional tubes, providing a pressure equivalent of approximately 13 psi
- Specifically designed for off-road competition use, at speeds up to 80 mph (130 km/h) – above this speed, heat buildup can lead to rapid destruction of the Bib Mousse, resulting in serious injury to the rider – under no circumstances should Bib Mousse be fitted to motorcycles for on-road use
- Bib Mousse may be used only with Michelin off-road tires, including StarCross HP4, StarCross MS3, StarCross MH3, S12 XC, M12 XC and Desert Race – because Bib Mousse is shaped for a perfect fit inside these Michelin tires (see sizing chart below); use of Bib Mousse with other brands of tires can lead to handling instability and possible destruction of the Bib Mousse
- Each Bib Mousse includes a tube of Bib Mousse Fitting Gel; installer must be sure to follow installation instructions supplied with the product

## MOUSSE TUBES

- Toroidal-shaped expanded-foam inserts replace the traditional inner tube on off-road motorcycles
- Technically the Mousse is a butyl ring with a honeycomb structure, the cells of which are filled with gas so as to simulate the effect of an inner tube
- The Mousse is surrounded by a thin external membrane designed to make it easy to fit on different sized tires
- A Pirelli Mousse is a technologically advanced product, characterized by the presence of self-pressurizing agents capable of creating a very large number of gas bubbles inside the mousse, making the product immune to punctures
- Immune to punctures and abrasions; developed by Pirelli for riders who compete in every kind of competition, whether it be a race in the desert or a Cross championship trial
- Designed for use with Pirelli tires on off-road surfaces
- Not recommended for road use
- When new, they are equivalent to an inner tube inflated to 0.9 bar (equivalent to approximately 13 PSI); this pressure declines gradually along the life of the mousse, which must be replaced when it becomes too soft
- Sold each, with mounting gel lube

## TUBES

## HEAVY-DUTY AND EXTRA HEAVY-DUTY

- Made specifically for MX or off-road use
- Heavy-duty tubes are 1.5mm thick to be more durable than standard tubes
- Extra heavy-duty tubes are 2.5mm thick to offer superb durability in extreme conditions; nearly twice as strong as heavy-duty tube
- Both use synthetic rubber construction that offers excellent strength and will not allow air to leak like natural rubber
- For Valve Stem Types, see page 303

## TWIST TIRE SCREWS

- Twist Gripper™ screws provide traction for heavy equipment and groomers
- High-grade carbon steel hex screws with a carbide insert and specially designed threads
- Zinc electroplated to extend the life of the screw with an anti-corrosive layer to stop oxidation
- All have extra-coarse threads giving Woody's Twist tire screws holding strength to stay in place season after season, and ease removal
- The carbide tip increases traction on many surfaces: snow, ice, mud, slippery rocks, wood, hard-packed dirt and gravel, and hills
- Also provide added traction for rounding corners and for surprises under the water
- Packaged in a clearly marked, sturdy plastic container for easy shipping and display

## PRIVATEER TIRE WARMERS

The first to manufacture Tire Warmers in the USA, Chicken Hawk Racing has supplied virtually all of the AMA Superbike teams and is well known for its quality and durability. The choice of AMA Factory Teams such as Yoshimura Suzuki, Red Bull Roadrace Factory, M4 Roadracing and Team Geico Honda.

### PRIVATEER TIRE WARMERS – FEATURES

- Allow for fast cornering from the first lap makes tire last longer
- Saves "heat cycles" so tires don't age by being heated and cooled
- Highest watt density – 650 watts rear and 500 watts front
- Slow, yet powerful, the warmer permeates the tire carcass with stable heat – attaining "hot tire pressure"
- Neoprene side panels insulate the wheel and ensure proper fit
- Back-n-forth heater design provides even heating
- Carbon and poly insulation for better heat retention
- Ballistic nylon exterior
- Dupont Nomex liner – melt-proof with temperature-sensitive dye
- Dual stage operating lights show when heating and when ready
- Nylon carrying bag
- Available in Standard, Dual Temperature and Digital models
- Sold in sets – one front and one rear
- Safe to use with DOT and race compound tires
- 120V operation

### STANDARD MODEL

- Internal thermostatic control pre-set at 175°F
- 6' long power cord

### DUAL TEMPERATURE MODEL – ADDITIONAL FEATURES:

- Change operating temperature with the flip of switch!
- Settings: Low-135° and High 175°F

### DIGITAL MODEL – ADDITIONAL FEATURES:

- Carry Case – protects during transit and storage
- NEW – DTC3 Digital Controller includes these features:
- Both Target temperature and Actual temperature are visible
- Running Time shows how long the warmer has been running
- Quick Disconnect Power Cable – safety and convenience
- Normal mode or Gradual Heat Up modes can be selected
- Ability to display Fahrenheit or Celsius

**ATV BEAD BUSTER**

- Heavy-duty Bead Buster easily removes old hard tires from rusty rims as well as safety bead tires from wheels
- Innovative tire tool features a leverage arm connected to a vertical breaking shoe that pushes straight down on the bead rather than a conventional bead breaker with an arcing motion
- Applying the force straight down breaks the bead much easier on old or stubborn tires; the vertical motion also prevents the shoe from sliding down the sidewall and pulling away from the bead
- Accessory kit sold separately
- Accessory kit includes center post thread protector, installation/removal bar and wheel holder

TUBELESS T-HANDLE TIRE REPAIR KIT

- Sometimes tubeless tires can sustain damage that is beyond the ability of a mushroom plug
- A tear from jagged items can require the use of what is known as a string or rope plug
- Kit includes 20 brown rubber reinforced inserts (each 4" long), sturdy T-handle reamer, T-handle insertion tool, tube of rubber cement, retractable razor blade, repair instructions and a durable zippered canvas bag
- Kit measures 5" x 2" x 6" and weighs only 11 oz.
