PERFORMANCE MACHINE AIR CLEANERS & INTAKES Continued from previous page.

MAX HP

- The Max HP air cleaner isn't just another pretty bolt-on accessory that lacks substance
- Innovative, conical shape for improved knee clearance
- Internal power-cone design for smooth, laminar air flow
- High flow reusable air filter

ROLAND SANDS DESIGN®

ROLAND SANDS DESIGN® VELOCITY STACK

- Performance engines require a lot of airflow to create serious power, and that requires a high-flowing induction system. Use our velocity stack to smooth the airflow into the throttle body/carb's throat for optimized fuel delivery
- RSD logo laser engraved onto backing plate
- Drilled breathers included
- Made in the USA

Note: Not legal for sales or use on pollution controlled vehicles.
No filtration element included or available.

ROLAND SANDS DESIGN® VELOCITY STACK PREFILTER

- Fits all RSD Velocity Stacks or 3-3/4" velocity stacks
- Uniform micron openings allows air in while keeping debris and water out
- Filters out larger particles of debris down to .005"
- Hydrophobic manufacturing process repels water
- Made in the USA

ROLAND SANDS DESIGN® SLANT AIR INTAKE

This is the ultimate High Performance intake from RSD. We've combined the best in performance and light weight with an ergo friendly slanted carbon intake filter from K&N. The Slant Filter element gives more knee clearance and a slanted surface that's easy on the body during hard riding. The Filter element is coupled with our newest backing plate shape from Vance and Hines for industry leading filtration in a simple package

- Laser etched black anodized cover
- Black anodized backing plate and mounting hardware
- Carbon fiber Ergo trimmed K&N Filter
- Powder-coated inlet adaptor
- Made in the USA

ROLAND SANDS DESIGN® BLUNT AIR CLEANERS

- The Blunt Air Cleaner is our smallest filtered air cleaner and features more leg clearance with a high flow filter
- Simple, yet aggressively detailed styling keeps the Blunt focused on getting as much clean air into your motor, with as little ergonomic impact as possible
- High volume filtration K&N air filter included
- Hidden crank case breathers
- Revolutionary backing plate promotes smooth airflow into the carb/throttle body
- Close attention is paid to machine pattern and quality to ensure the best and cleanest machine work
- 4.5" outer face
- Includes slotted breather bolts and oil tubes

Note: Mounting hardware included

ROLAND SANDS DESIGN®

VENTURI AIR CLEANERS

The Venturi Air Cleaner features the best in filtration and flow from industry leader K&N. It is a proven high performance bolt-on part that drastically improves the looks and performance of your machine. Our revolutionary backing plate promotes smooth air flow into the carb/throttle body while also providing hidden internal crank case breathers and our new tight seal oil separator insures a clean, leak free ride. Manufactured from billet aluminum in the USA, the Venturi is a jewel for the side of your bike.

- Distinct exposed filter design with a stainless steel wire mesh screen
- Design matched to RSD wheels
- Hidden built in crank case breathers
- High volume best in filtration K&N Air Filter included
- Revolutionary backing plate that promotes smooth airflow into the carb/throttle body
- Includes slotted breather bolts and oil tubes
- Includes mounting hardware

Note: Not legal for sales or use on pollution controlled vehicles
All air cleaners can be used on Mikuni carbs with use of adaptor
(Part# HS42/001-K sold separately) BC# 426248

CLARITY AIR CLEANERS

Ever wanted to know what your air intake is doing? Now you can check it out while it's sealed tight behind transparent polycarbonate and machined billet aluminum. The RSD Clarity Air Cleaner exposes your fuel delivery system as no other intake system can.

- Allows for viewing of internal intake components
- CNC machined from billet aluminum and polycarbonate
- Best in filtration and flow, K&N Air Filter included
- Backing plate promotes smooth airflow into the carb/throttle body
- Specialty coating does not allow oil and grease to adhere and a proprietary abrasion and UV resistant film to protect surface from yellowing, marring or breakage
- All mounting hardware included
- RSD Contrast Cut product starts with a finely machined polished and black anodized part which is re-machined to bring out the design highlights. Close attention is paid to machine pattern and quality to ensure the best and cleanest machine work.
- Matching Clarity Derby Cover and Timing/Cam Cover available
- Made in the USA

Note: Not legal for sales or use on pollution controlled vehicles

ROLAND SANDS DESIGN®

TURBINE AIR CLEANERS

ROLAND SANDS DESIGN®

The RSD Turbine Air cleaner took some major design cues from jet engines. This is the next step in intake systems for your bike. We focused our efforts on building something that would flow well while also giving a unique and timeless style that looks good on any bike.

- Best in filtration and flow from K&N, air filter included
- Hidden internal crank case breathers
- Slotted breather bolts and oil tubes are included with Big Twin applications
- Made in the USA

Note: Not legal for sales or use on pollution controlled vehicles

All air cleaners can be used on Mikuni carbs with use of adaptor – part number HS42/001-K (sold separately)

ROLAND SANDS DESIGN®

PULL-OVER RAIN SOCK

When you find yourself in a sudden down pour, help prevent water from entering your engine with our new Pull Over Rain Sock. Stash it in a backpack or pocket and when the skies open, stretch it over your complete RSD air cleaner for quick and easy roadside installation, no tools required.

- Compatible with all RSD Venturi Nostalgia and Turbine Air Cleaners
- Durable polyester pre-filter is factory treated using a proprietary hydrophobic process to repel water
- Uniform micron openings allows air in while keeping debris .005" or larger and water out
- Dyno and flow bench proven to maintain current performance
- Printed RSD Logo – Keep it Dry

RD5007

29.95

ROLAND SANDS DESIGN®

SCRUB BAG

- While washing or storing your motorcycle, stretch our RSD Scrub Bag over your complete RSD Air Cleaner to prevent water or other debris from entering engine
- Compatible with all RSD Venturi Nostalgia and Turbine Air Cleaners
- Made from waterproof Denier material
- Elastic enclosure seals out water and debris
- Printed RSD Logo – Keep it Clean

Note: Cannot be used while engine is running. For washing and storage purposes only.

RD5008

31.95

ROLAND SANDS DESIGN®

INTERNAL RAIN SOCK

If you are doing a lot of wet weather riding we recommend our Internally Mounted Rain Sock. While not a necessity for riding in the rain with a RSD Air Cleaner, it can help reduce filter saturation.

- Compatible with all RSD Venturi Nostalgia and Turbine Air Cleaners
- Durable polyester pre-filter is factory treated using a proprietary hydrophobic process to repel water
- Uniform micron openings allows air in while keeping debris .005" or larger and water out
- Dyno and flow bench proven to maintain current performance
- Printed RSD Logo

ARLEN NESS

Mount any Arlen Ness custom air cleaner cover or most applications accept your stock O.E.M. cover

Features 4 layer of pre-oiled, surgical-grade cotton

Hand poured one at a time for a smooth line between the filter element and it's urethane body. This ensures no restrictive wicking material on the filter element a clean finish

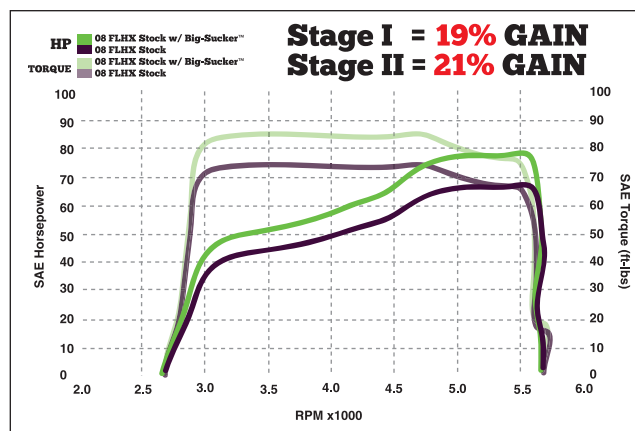

add up to 21% MORE HORSEPOWER

Patented hidden breathers that are o-ringed at the heads and exit at the mouth of the injector/carb to eliminate exposed oil hoses and fittings

Radius inlet provides optimum air flow for maximum performance

Aluminum backing plate available in standard, chrome or black powder finish

ARLEN NESS BIG SUCKER™

The Big Sucker™ is designed to give your engine maximum airflow, which means more horsepower, more torque and improved performance. Every Big Sucker is dyno tested and tuned to provide the absolute best in performance. Testing shows that by just installing the Big Sucker, you can gain up to a 21% increase in horsepower.

The Big Sucker features the patented hidden breather backing plate technology. This exclusive technology allows hidden breathers to be integrated into the actual backing plate, eliminating the need for ugly external hoses and hardware for an ultra clean look. Each hidden breather is o-ringed at the heads and exits at the mouth of the injector/carb to provide efficient engine breathing, and a solution to faulty hoses and clamps. Backing plates are available in standard aluminum, chrome or black powder finish.

The filters are handmade one at a time using the finest materials available. They are pre-oiled and feature 4 layers of surgical grade cotton for optimum airflow and filtration to your engine. These filters are hand-poured one at a time in a urethane body unlike most competitors' filters, which use a spinning process. This means no messy and restrictive urethane residue on the filter element, just one smooth clean line. Filters are available in standard red filament or Arlen Ness' exclusive SS stainless steel jacketed filament.

All of these kits include a Big Sucker aluminum backing plate, Big Sucker high-flow air filter, chrome banjo bolts, gasket, hardware and simple instructions for easy installation.

Products on this page may not be legal for sale or use in California or in other localities due to state and/or federal anti-tampering laws. Before purchasing, see page 1818.

ARLEN NESS

ARLEN NESS LITTLE-SUCKER AIR FILTER KITS FOR BIG TWIN MODELS

- If you are looking for performance only and you are not concerned about hidden hoses and ultra mounting hardware, these kits are the right choice
- Kits feature a steel backing plate that is integrated into the actual filter; backing plate includes molded urethane air inlet for unobstructed flow and great performance
- Utilizes the factory exposed breather hoses/hardware
- Accepts the factory/O.E.M. air cleaner cover or Ness Stage I air cleaner cover; cover not included
- Made in USA

HARLEY-DAVIDSON	Year	P/N	Retail
FLH, FLT	08-15	263173	99.95
Big Twin (exc. FLH, FLT)	00-15	263172	99.95

ARLEN NESS TWIN SUCKER

- Dual runner air filter assembly from Arlen Ness for an aggressive look
- Utilizes Ness patented Big Sucker™ hidden breather lines
- Available in powder-coated black wrinkle finish
- All mounting hardware is included

HARLEY-DAVIDSON	Year	P/N	Retail

COBRA®

COBRA® AIR CLEANERS

- Flows better than stock or competing units in large part because of its unique internal Venturi design of the inner filter
- Optimizes overall performance
- High-flow K&N® air filter element ensures the maximum air intake and protection
- Four styles available in black or chrome finishes
- Slim profile keeps the unit away from the rider's leg
- The Cobra system consists of a laser-cut, formed steel cover, separate mounting ring, and all the fasteners, seals, backing plate and mounting hardware for easy installation
- Formed stainless steel mesh insert
- Made in U.S.A.

COBRA® POWRFLO AIR INTAKE KITS

You may be tempted to install the PowrFlo Air Intake just because it looks better than stock, but you'll also be getting a lot more than a great styling update. With the PowrFlo Intake system you'll see improved performance across the power band, especially when used with the Fi2000R digital fuel tuner to optimize the air/fuel ratio.

- Flows better than competing units in large part because of the unique internal venturi design
- High-flow K&N® air filter element ensures the best air intake and maximum protection for your engine
- The PowrFlo system consists of an aluminum cover and all the fasteners, seats, backing plate and mounting hardware to make for an easy installation
- Formed stainless steel mesh insert in the dual entry ports to keep out bugs and debris
- Powder-coated mounting cover
- Aluminum cover available in black or chrome finish
- Recommended use with the Fi2000 fuel tuner to optimize the bike's fuel because of the additional air flow available from the PowrFlo Air Intake System

KURYAKYN® PRO-R HYPERCHARGER™

- Capable of supporting engines that produce up to 140+ HP
- The interior shapes, especially the critical radius leading into the carb or throttle body, have been carefully designed
- The outer cover incorporates an additional scoop to direct air into a high-flow, washable foam filter element
- The filter assembly is capable of supplying enough air to even the highest output street motors
- The frontal opening is huge and as all Hyperchargers, the vacuum operated butterflies allow almost unrestricted airflow to the filter under high-load riding situations
- Comes complete with mounting hardware and crankcase breather kits

Note: Leg room is diminished compared to stock air cleaner

Description	P/N	Retail
Replacement K&N® Filter	419195	72.99

KURYAKYN® TWIN VELOCITY™ AIR CLEANER

- Chrome-plated
- Filters air directly down the center of the existing air column
- The additional high-velocity air stream reduces a low-pressure area in the center of the air cleaner lessening turbulence and further enhancing flow
- The net result is up to 35% increase in flow over a conventional high-performance air cleaner and easier, more consistent carb jetting

KURYAKYN® INFINITY STREAMLINER FOR STANDARD HYPERCHARGERS

- Throw the switch and these covers are instantly transformed
- Smooth, mirror finished outer panels become a vortex of lights
- Installs quickly and easily—in under an hour
- Seven color L.E.D. technology operates in three modes
- - Single color steady illumination
- Single color flashing illumination with rheostat adjusted variable rate
- Paint mode: All lights in unison continuously cycle through all seven colors (red, lime, ice blue, sky blue, dark blue, purple, green) with an adjustable variable rate

419376 199.99

KURYAKYN® STINGER TRAP DOOR

- Designed specifically to maximize airflow into the carburetor or throttle body
- Two large raised scoops channel air through a high-flow foam filter element
- Easy four bolt replacement of any standard trap door

S&S® STEALTH AIR CLEANER KITS

- For the rider who likes to go fast, but doesn't like to advertise
- Air directional stinger cone in the filter
- Use with your stock Harley-Davidson® Twin Cam 88, 96 or 103 air cleaner covers
- Can also be used with any of several S&S® design covers
- High flow (1" taller) filter, sold separately

Note: These kits do not contain covers. Use stock covers or choose a S&S® cover.

S&S® AIR CLEANER KITS

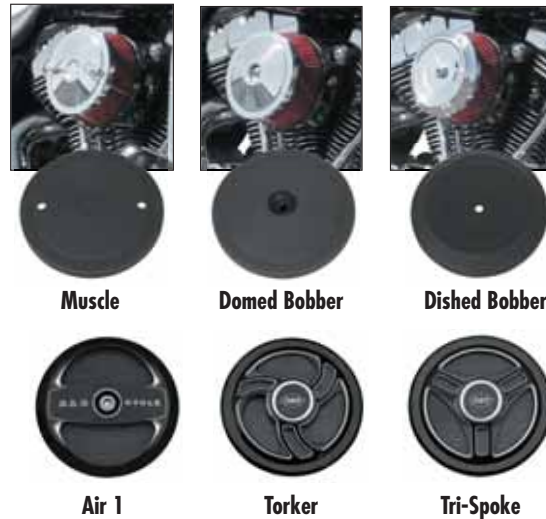

- The S&S® Teardrop air cleaner is one of the most recognizable shapes in the industry
- Features a uniquely designed backplate with air horn style radiused entryway and the dimpled cover with air directional cone on the inside
- Design helps maximize air flow by giving intake air an efficient, easy path to follow into the carburetor
- The improved airflow has resulted in an increase of two to five horsepower in S&S® test bikes
- This kit is especially recommended if performance cams and exhaust system have been installed
- Reduced restriction of airflow may require that the stock carburetor be rejetted or the stock fuel injection system be recalibrated to maintain the correct fuel air mixture

Wrinkle Black

S&S® COMPLETE TUNED INDUCTION KITS

- The heart of this induction system is the dual runner, two-into-one intake
- Instead of bolting directly to a dual bore throttle body, the runners of the single bore induction join together in a smooth, flow enhancing curve
- Air filter area almost two times that of an S&S® teardrop air cleaner
- The intake is available in chrome, wrinkle black powder-coated or natural finish
- Tuned induction kits for 08-11 Touring models with electronic throttle control are designed to bolt directly to the ETC throttle body without an adaptor bracket
- Discreet black cover hides the throttle body from view for a more attractive installation

K&N®

STREET METAL CUSTOM INTAKES

- Sturdy, custom aluminum backing plate mounts directly to the throttle body via an aluminum integrated, internal-run breather system
- Intake system comes with a K&N® air filter for high air flow and long service intervals. The filter is washable, reusable, pre-oiled and ready for installation
- Durable mounting gasket is also included to help absorb vibration
- Simple designed custom covers give this air intake good looks while powering down the highway or at your local show
- Fits 99-15 Twin Cam without Throttle by Wire (exc. 08-15 FLH, FLT)

Note: Excludes Twin Cam engines with Magnetti-Morelli fuel injection systems.

Sportster Models	91-07	482724	37.95

S&S® BREATHER CONVERSION KIT

- Improved breather hardware for Super E & G air cleaner kits
- Banjo fittings are sealed with silicone coated washers instead of O-rings. The washers are much more durable and seal better to prevent leaks
- Banjo fittings and breather hose that they plug into are mounted on the cylinder head before the air cleaner backplate is installed. They do not need to be removed if the backplate is removed for service. This makes it much simpler to install and service the air cleaner assembly
- Fits 93-99 Evolution Big Twin

S&S® SINGLE BORE EFI THROTTLE BODIES

- Available in both 52mm and 58mm
- 52mm throttle body is essentially the same size as S&S® Super G carburetor
- When compared to stock throttle bodies, the 52mm single bore offers 33% more cross-sectional area than 45mm throttle bodies of 95-05 Big Twin and 28% more area than the throttle bodies in 06-07 models which had 46mm bores
- Both throttle bodies use the same manifolds but require different air cleaners
- Includes a throttle body assembly, fuel injectors, fuel rail, harness adapters and all the hardware, gaskets and hoses for installation
- Select the correct S&S® single bore throttle body kit based on your existing stock fuel injection system or the system you plan to use in a custom application
- Fuel injectors have an output of 5.12 grams/sec at 58 PSI

Note: A S&S® intake manifold and either a S&S® teardrop air cleaner or a S&S® single bore tuned induction kit can be purchased separately to make up a complete induction system

FUELPAK FP3

The Fuelpak FP3 will revolutionize fuel management for all new Harley-Davidson models now using the HDLAN (CAN Bus) system. Connecting wirelessly by Bluetooth to iPhone or Android Smartphones, Fuelpak FP3 uses Flash technology to recalibrate engine parameters and mapping for exhaust systems and other performance upgrades downloaded from the expansive library of calibrations developed by Vance & Hines.

Also standard for the Fuelpak FP3 is an Autotune feature, making use of all factory sensors to add another layer of precision tuning for specific requirements, whether tuning for unique components or different grades of fuel.

And with the Fuelpak FP3 module plugged-in, Live Sensor Data can be viewed through the smartphone to display speed, RPM, cylinder head temperature, voltage, gear selection and other vital information.

- Smartphone App User Interface (iOS and Android)
- Recalibrates ECM by Flash Tuning
- Autotune Feature for Added Tuning Precision
- Capable to Display Live Sensor Data

FP3 PERFORMANCE GAINS:

IN CALIFORNIA: in order to meet Air Resources Board emissions requirements, certain aftermarket part applications have been identified as replacements, and others have received ARB Executive Orders. All other emissions related aftermarket parts are for competition use only. A list of replacement parts and EO parts, and corresponding fitment is provided at vanceandhines.com/california.

TTS MASTERTUNE SYSTEM

The TTS MasterTune System includes three powerful Windows®-based programs—MasterTune HD, DataMaster HD & VTune—designed specifically to tune Harley-Davidson® Motorcycles. MasterTune-HD is an ECM reprogramming tool for H-D bikes that utilize the diagnostic interface. MasterTune-HD also supports 2005 and later Retrofit ECM Service Modules when installed on earlier vehicles. DataMaster-HD is a data collection tool specifically for use with 2001 and later Delphi-equipped H-D motorcycles that utilize the diagnostic interface. VTune is an easy-to-use VE table tuning tool tailored specifically for use with 2006 and later Delphi-equipped H-D's that are equipped with O2 sensors. With the MasterTune System, you can:

- Calibrate factory speedometers
- Correct cruise control and 6th gear light (Primary Ratio Correction) issues
- Trims spark tables automatically while correcting the fuel system
- Analyze the engine's actual volumetric efficiency
- Reduce tuning time for a smoother running, more responsive engine
- Check and clear diagnostic codes
- Save and restore the current calibration in the ECM (factory or other)
- Install custom calibrations from other sources
- Compare functions quickly in tables
- Choose from a wide selection of base mapsGraph in 2D, 3D or line options
- Display all vehicle data as well as various calculated channels
- View real-time engine parameters
- Record data without a computer
- Record as much as 8 hours of data
- Store up to 64 recordings
- Automatically start/stop recordings

Note: The TTS MasterTune software is compatible with both 32- and 64-bit versions of Windows XP and Windows 7. Cables sold separately.

THUNDER MAX

THUNDERMAX PERFORMANCE ECM'S WITH INTEGRAL AUTOTUNE SYSTEM

- Comes completely assembled and ready to install, no wire cutting or splicing required
- ThunderMax is a complete factory replacement and is not a Flash Tuner or in-line signal modifier
- Utilizes wide band 18mm O2 sensors for real time AFR analysis and correction at all RPM's and load levels
- Operates as a closed loop control system to continuously self-adjust and properly tune the motorcycles air fuel ratio for all riding conditions
- Designed to fit in the same location as the factory ECM—simply remove factory ECM and install ThunderMax, plug into existing harness, change the O2 sensors, load the correct base map from TMAX Tuner software and enjoy your ride
- Includes ThunderMax ECM with Autotune Module, two wide band Bosch 5-wire O2 sensors with connection harness, TMAX Tuner software and USB communication cable, Quick Start Easy Install Guide and Comprehensive User's Manual
- Available for all HD Delphi's based EFI motorcycles 01-14
- Provides industry leading tech support with state of the art diagnostic data logging and collection process
- Purchase once and all software, firmware and an extensive library of base maps for 88" to 131" are free, allowing the system to grow with future bike modifications without future tuning expenses
- Compatible with nitrous, supercharger and turbo systems

- No DYNO required—ThunderMax with Autotune continually tunes how you ride, where your ride, every time you ride
- ThunderMax provides more power, increased torque, better sounding exhaust and quicker throttle response while optimizing your bikes power output by tuning for your riding style, riding conditions and exhaust system
- Your bike will run smoother and considerably cooler by continually maintaining the correct AFR and adjusting the base map as you ride with immediate real time feedback
- Allows advanced users and professionals the ability to control every parameter of the system for custom tuning, if required
- Adjustable rev limiter, idle speed and speedometer calibration
- Adjustable front and rear cylinder AFR maps, ignition timing (spark) maps, startup maps and warm-up settings
- Adjustable engine temp alert, injector size compensation and decel pop control
- H-D Digital Tech compatible
- Read and clear diagnostic codes through odometer window, Digital Tech or through the free ThunderMax software
- Live diagnostic data logging, monitoring and recording ability
- Proudly engineered and manufactured in the USA with the highest quality components, precision machined billet aluminum cases and encapsulated for waterproofing
- 3-year manufacturer limited warranty

Note: ThunderMax requires 18mm x 1.5mm bungs (08-09 style and location) for the new wide-band O2 sensors.

This may require modification or relocation in your exhaust head pipe or replacement with a new aftermarket compatible exhaust system. Legal in California only for racing vehicles, which may never be used on the highway. Some products may not be legal for sale or use on pollution-controlled vehicles. Use ThunderMax 50 ECM for emission compliant applications.

THUNDERMAX 50 ECM

California ARB-legal ECM that really performs while still meeting emission controls. It is a complete replacement engine management system for Delphi-equipped EFI H-D models.

- ThunderMax 50 is not a flash or an in-line signal modifier
- Integral Autotune system utilizes wide band O2 sensors and works as a closed-loop control system to continuously self adjust and properly tune the motorcycles air/fuel ratio in all conditions
- Easy installation—simply replace the factory ECM, install new O2 sensors and harness connector, select base map and enjoy your ride
- Improves throttle response and increases horsepower and torque providing excellent ride ability while running smoother and cooler
- Maintains excellent fuel economy
- Includes ThunderMax 50 ECM, two wide band Bosch 5-wire O2 sensors and connecting harness, software, USB communication cable, comprehensive user's manual, software, technical support and free updates
- Software allows examination of vehicle diagnostic codes
- 01-06 models will require the exhaust system to be equipped with or modified for 18mm O2 sensor bung ports
- Made in USA

Note: Because of possible clearance issues, some aftermarket exhaust systems may require modifications or relocation of their O2 sensor port bungs.

FI2000R POWRPRO TUNER (AUTO TUNE)

- Patented technology unlike any other auto tune system on the market
- Tunes to exactly what air-fuel mixture creates the maximum power 80 times per second (does not tune to some arbitrary AFR someone has picked)
- Creates that adjustment to maximum power on every squirt of the injector
- It's like having the best custom map writing, dyno operator tuning your fuel every time you crank the throttle
- Tunes every gear, every roll on, every environmental change, every engine modification, lugging the engine, winding it out to redline: it reacts, verifies and adjusts
- No dyno needed
- No external adjustments needed
- Does not require wide band oxygen sensors
- No additional components needed
- Provides perfect fuel settings in any condition, with any exhaust system with any engine modifications

COBRA®

Fi2000®

COBRA®

Fi2000R DIGITAL FUEL PROCESSOR

The Fi2000 is the single best way to tune fuel-injected motorcycles in order to eliminate lean air/fuel mixture settings. It's simple to install, works with any exhaust system—stock or aftermarket and requires no additional Dyno testing or mapping. This is plug-and-play technology at its best. It's the perfect tool to fine tune Fi engines quickly, easily and economically. Because each Fi2000 is tuned to a specific brand and model, it is preset with the optimal settings for each machine. The Fi2000R connects with its O.E.M.-style connectors directly to the engine's fuel-injector bodies.

- Increases horsepower and torque by optimizing stock lean air/fuel mixtures
- Quick and simple installation with plug-and-ride technology
- No confusing computer downloads to install
- No expensive Dyno testing required
- Pre-configured from the factory for your make and model motorcycle, but easy to adjust should your specific application need it
- Improves overall rideability
- Virtually eliminates backfiring on deceleration
- Engine runs cooler
- The Fi2000 O2 digital fuel processor is designed to work with all H-D exhaust systems (stock or aftermarket) equipped with oxygen sensors

Low-Speed Screw

This control functions similar to the air mixture screw on a carburetor, controlling off-idle fuel demands and steady cruising.

Mid-Speed Screw

This is the equivalent of the needle and clip position on a carburetor. Two increments correspond to dropping the clip on a needle one position. One increment is the same as adding a shim. This is where you get the proper fuel mixture under load and acceleration.

High-Speed Screw

This is the electronic counterpart to your main jet. Each numbered increment is the same as going up one main jet size starting with the stock size at zero. This adjusts your fuel at full throttle.

Products on this page may not be legal for sale or use in California or in other localities due to state and/or federal anti-tampering laws. Before purchasing, see page 1818.

DAYTONA TWIN TEC TCFI GEN 5 FUEL INJECTION CONTROLLER

- Fully programmable plug-in replacement for the 36 pin controller with CAN data bus used on 12-13 Softail and Dyna models. Not compatible with 2011 Softail that uses a different size controller
- Quickly auto-tune fuel curves for front and rear cylinders on a dyno or on-road with new WEGO IIID dual channel wide-band oxygen sensor interface
- Robust alpha-N (throttle position and RPM based) fuel control eliminates problems with long duration/high overlap camshafts
- Extended data logging and diagnostics. DataFLASH memory stores full 60 minutes of operating data at 10 samples/second
- Powerful Windows software for custom programming and data analysis
- Programmable user input for functions such as two stage RPM limiter, nitrous retard and shift kill
- Programmable user output for functions such as shift light, nitrous activation and electric shifter

- Billet aluminum housing with black anodized finish
- Easy plug-in installation
- Real-time and continuous auto-tuning with monitoring, control and override capability. No other commercially available system offers all these capabilities
- User friendly PC Link software with 3-D graphics and easy spreadsheet editing capabilities

496421 885.00

DAYTONA TWIN TEC WEGO III WIDE-BAND AIR / FUEL RATIO (AFR) TUNING AIDS

- WEGO III is a fully sealed stand-alone unit with built-in data logging intended for motorcycle applications
- Complete air/fuel ratio display system with built-in data logging. Includes Bosch LSU4.2 5-wire wide-band oxygen sensor, 18 x 1.5mm weld nut for mounting sensor on exhaust pipe and software on CDROM
- Versatile tuning aid for all carbureted and fuel injected engines displays air/fuel ratio (AFR) and logs over 2 hours data including AFR, engine RPM and a spare 0-5V analog input for sensors such as throttle position or manifold pressure
- Can be used for on-road or dyno testing
- Suitable for automotive, motorcycle and other small engine applications
- Highly accurate with less than ± 0.10 AFR error over 10.3-19.5 AFR range
- Easy free-air calibration procedure corrects for sensor aging effects
- 0-5V analog AFR output for interface to dyno instrumentation
- Ultra-bright daylight readable blue LED display with automatic dimming under low light conditions

- Wide supply voltage range from 11-16V allows operation from battery on small engines or race vehicles with out an alternator. Current draw is approx. 1 amp
- Built-in USB interface
- Fully encapsulated with water-proof LED display
- Compact size: 4"L x 2"W x 1/2"H

496723 452.00

DAYTONA TWIN TEC TWIN TUNER FUEL INJECTION CONTROLLER

- Allows you to easily adjust your fuel injection to match the requirements of performance parts including camshafts, free flowing exhausts and low restriction air filters. You can add or subtract fuel
- Increased horsepower
- Improved throttle response
- Easy plug-in installation and setup
- Dynojet Power Commander maps can also be used
- Compatible with Twin Scan II+ tuning aid
- Optional USB interface and software for downloading built-in data logging and programming custom advance curves (BC #49-8715) sold separately
- Very compact size—only 4"L x 2"W x 1/2"H

Note: Not legal for sale or use on pollution controlled vehicles.

DAYTONA TWIN TEC TWIN TEC GEN 4 FUEL INJECTION CONTROLLER

- Fully programmable plug-in replacement for the 36 pin Delphi® controller with J1850 data bus. Not compatible with 08-12 Touring models with electronic throttle control or 11-12 Softail; 2012 Dyna models with CAN data bus
- Simultaneously auto-tune fuel curves for front and rear cylinders under actual riding conditions with WEGO IIID dual channel wide-band oxygen sensor interface
- Robust alpha-N (throttle position and RPM based) fuel control eliminates problems with long duration/high overlap camshafts
- Extended data logging and diagnostics. DataFLASH memory stores full 60 minutes of operating data at 10 samples/second
- Powerful Windows software for custom programming and extended data logging and diagnostics
- The TCFI kit includes the WEGO IIID dual channel wide-band exhaust gas oxygen interface that allows auto-tuning during dyno tuning or actual on-track riding conditions. The kit includes Bosch LSU 4.2 wide-band sensors for both front and rear cylinders. The user programs a table with the desired air/fuel ratios—the system then does the rest
- Idle air control including idle RPM and cold start characteristics are fully programmable. This facilitates the use of aftermarket throttle bodies with higher airflow
- The TCFI also has built-in data logging that stores data for the last 60 minutes of operation at 10 samples/second. PC communications is by means of a USB interface that plugs directly into the existing H-D diagnostic connector. Windows compatible software allows use of laptop for programming and data analysis
- For 01-13 Twin Cam using 36 pin Delphi® system with J1850 data bus

Note: Not for legal sale or use on pollution controlled vehicles

217011

217014

DYNATEK FUSION EFI FUEL & IGNITION CONTROLLER

Dynatek announces the new Fusion EFI and Ignition Controller. The Dynatek Fusion EFI is an ignition and fuel injection control module that plugs in-line with the bike's stock ECM. The Dynatek Fusion EFI uses O.E.M. style connectors so no splicing or cutting of the stock harness is required.

Ignition Timing Control: Significant horsepower can often be made by making timing adjustments as well as being able to correct detonation problems that may occur—you can advance or retard your stock timing curve by +/- 10° using the included Control Center software

Fuel Control: The Fusion EFI allows for very specific fuel adjustment of the entire range of throttle openings and RPM combinations—adjustments can also be based on additional inputs such as cylinder head temp or gear position

Increased Rev Limit: The rev limiter is raised to 6200 RPM

- Compatible with the DynaTune Auto Tuning Kit
- The Fusion EFI can be used with the optional DynaTune autotune kits (217440 or 217441) for on the fly automatic fuel adjustment

Note: Not for sale or use in California.

DYNATEK

DYNATEK DYNATUNE KITS

- Monitors the fuel mixture by installing the included Wide Band O2 sensor[s] in the exhaust
- This information is sent to the Dynatek Fusion EFI Module and automatically corrects it as you ride, letting you feel the changes as they happen
- Each map has preset Air/Fuel ratio target values that have been found to be the best overall settings, letting you simply plug in the unit and let it do the work
- Each throttle opening/rpm combination is individually adjustable, so that you can have both fuel economy, during cruise, while maintaining peak output at larger throttle openings
- For most bikes, you can adjust the Air/Fuel ratios "per gear" giving you total control of the fueling in every gear and throttle/rpm area if required
- Can be configured to run and make adjustments at all times or by using the "map switch port" on the Dynatek Fusion EFI Module
- Can be configured to switch back and forth between the tuning mode and the base map settings
- Can be configured to wait until the bike is at a certain operating temperature before beginning to make adjustments

Note: Not for sale or use in California.

Superchips

Vigilante

SUPERCHIPS® VIGILANTE EZ

- Professional tuning for Harley-Davidson®, Superchips® Vigilante EZ puts years of professional aftermarket Harley-Davidson® tuning into the palm of your hand
- Upgrading your bike's performance exhaust or intake system means you need Vigilante
- In just minutes, anyone can install Superchips' dynamometer proven tuning, specifically designed and tested for your bike. Vigilante EZ is the ultimate do-it-yourself tuning solution
- No additional hard parts needed, just re-program the Delphi on-board computer with Vigilante EZ
- Easy-to-use search menu includes most popular exhausts and intakes
- Perform diagnostic trouble code read and clear for easy troubleshooting
- Updates over the internet for the latest tuning (USB cable included)
- No trip to the dealer if you change pipes again
- Saves and returns to stock with ease
- Back-lit LCD and factory grade diagnostic cable makes installation a snap
- Not for sale or use in California

SUPERCHIPS® VIGILANTE

- All new line of fuel tuner for 01-13 EFI H-Ds
- Plugs directly into the factory fuel-injection diagnostic port
- Allow users to monitor and/or re-program the ECU for improved performance
- Unlocks hidden horsepower and torque
- Improved throttle response- Remaps the throttle-by-wire for better response
- Better mid-range performance
- Lowers engine operating temperatures
- Monitor vital engine parameters—Retrieve, store, display and playback engine data
- Measure 0-60 MPH, 1/8th and 1/4 miles times. Leave connected to bike for gauge display on Smart phone, etc
- Wireless Bluetooth technology allows connectivity with IOS and Android smartphones, tablet or PC
- Not for sale or use in California

ARLEN NESS

ARLEN NESS CHEAP-SHOT FUEL TUNER

- The Cheap-Shot is an economical solution to add needed fuel after installing exhaust and air cleaner performance upgrades
- Simple splice-in design saves big money by eliminating costly plug and play connectors found on most other fuel tuners
- Adjusts much like a carburetor by adjusting four individual pods using an ordinary screw driver
- Load based technology senses the load on the engine in any riding situation to provide the optimal fuel requirement to the engine
- Easy to follow instructions are provided
- Not for sale or use in California

RC COMPONENTS RCX-CELERATOR

Closed-Loop Fuel Injection Controller

- Self learning computer automatically adjusts the fuel/air mixture as you ride and compensates for changes in engine load conditions
- Re-calibrates for specific modifications made to your motorcycle exhaust pipes, air cleaner, etc
- Maximizes performance and engine efficiency while decreasing emissions and fuel consumption
- Quick connect plugs for easy installation
- NO downloads or adjustments required
- No DYNO tuning required
- Works in conjunction with factory ECU and race tuner downloads
- Quicker Throttle Response on Fly-by-Wire models
- Made in the U.S.A.
- Not for sale or use in California

WISECO®

FUEL MANAGEMENT CONTROLLER

- Plug-n-Play installation is simple to use and understand
- Easy push button operation, no computer or dyno required
- Easy air/fuel ratio adjustment, easily adjusts for modifications: intake, exhaust, cams, etc.
- Load based operation with tuning capabilities superior to Alpha N type controllers
- Three basic zones of operation that are similar to carburetors
- Uses O.E.M. base code and does not scramble base code
- Not C.A.R.B. approved

WISECO®

FUEL MANAGEMENT CONTROLLER UNIVERSAL MOUNTS

- Allow users to easily secure their controller by attaching the mount through an existing bolt or by using velcro or zip ties
- Once the mount is attached to the vehicle, the controller can be easily and safely secured in the universal mount, while still accessing the control buttons on the front of the controller
- Made of a high strength nylon polymer, making them weather and impact resistant to stand up to severe riding conditions

S&S® SUPER E & G CARBURETOR

The Super E & G are butterfly type carbs with fully adjustable idle mixture screws and changeable intermediate and main jets. The idle mixture screw is positioned and angled for easy accessibility. Even with five gallon gas tanks, adjustments are not a problem. All Super series carburetors use a special enrichment device instead of a choke for starting. This leaves the bore of the carburetor unobstructed for greater air flow. The enrichment device on the Super E & G carbs is activated by a variable position lever attached to the air cleaner backplate. By simply adjusting the lever, starting and warm-ups are made easy and foolproof.

- The Super E has a 1-7/8" throat at the butterfly and is identified by an "E" cast into the throttle linkage side of the carb body below the cast in wording "S&S® SUPER"
- The Super G has a 2-1/16" throat at the butterfly and is identified by an "G" cast into the throttle linkage side of the carb body below the cast in wording "S&S® SUPER"
- Throttle spool assembly is designed to accept stock 1981 and later style two-cable pull open-pull closed throttle assemblies so stock throttle cables can be used

- 1/8" thick
- Fits all S&S® carbs (exc. Two-Throats on all engines except Panhead models)

493724 16.60

495670

499651

S&S® THROTTLE CABLE GUIDE

- Accepts O.E.M. throttle cables

Description	P/N	Retail
Butterfly style cables	495670	11.15
CV cables, constant velocity style	499651	11.65

S&S® INSULATOR BLOCKS

1-7/8 In. Opening

- Mounting hole pattern is identical to stock pattern on Tillotson®, Bendix® and Keihin® butterfly type carbs
- Use with all S&S® 1-7/8" manifolds, includes O-rings

Description	P/N	Retail
1/4"	495230	20.95
3/8"	495231	20.95

2-1/16 In. Opening

- Use with all S&S® 2-1/16" manifolds, includes O-rings

Description	P/N	Retail
1/4"	499379	20.95
3/8"	499388	20.95

S&S® DESPERADO AIR CLEANER COVER

- Fits all S&S® Super E and G carburetors
- Increased airflow from slots around the perimeter
- Uses existing air filter
- Fits Big Twin and Sportster models with S&S® back plate

499982 143.95

S&S® CRUISE CONTROL CABLE ADAPTER KIT

- Adapter kit makes any Super E or G carburetors compatible with the stock cruise control
- Fits 98-06 H-D models with S&S® E & G Carbs

499979 67.95

S&S® HIGH-FLOW AIR FILTER & ADAPTOR KIT

- S&S® and WIX filters have combined forces to produce a high-flow filter for E & G carburetors
- The high-flow filter is 1" taller than S&S® standard filter and features a low restriction, pre-oiled filter element
- The low restriction element, combined with the larger surface area provided by the 1" filter extension, adds an airflow increase up to 37% over the standard filter
- The filter and filter adaptors extend the teardrop housing out 1"
- The resulting band of exposed filter imparts a high-performance street racer look
- Kit installs in minutes
- No permanent modifications required
- Kit contains high-flow filter for S&S® Super E or G teardrop air cleaner and 1" tall plated steel filter adaptor

Note: Not for use with S&S® Super B or Super D carburetors or S&S® Super E & G carbs for Buells

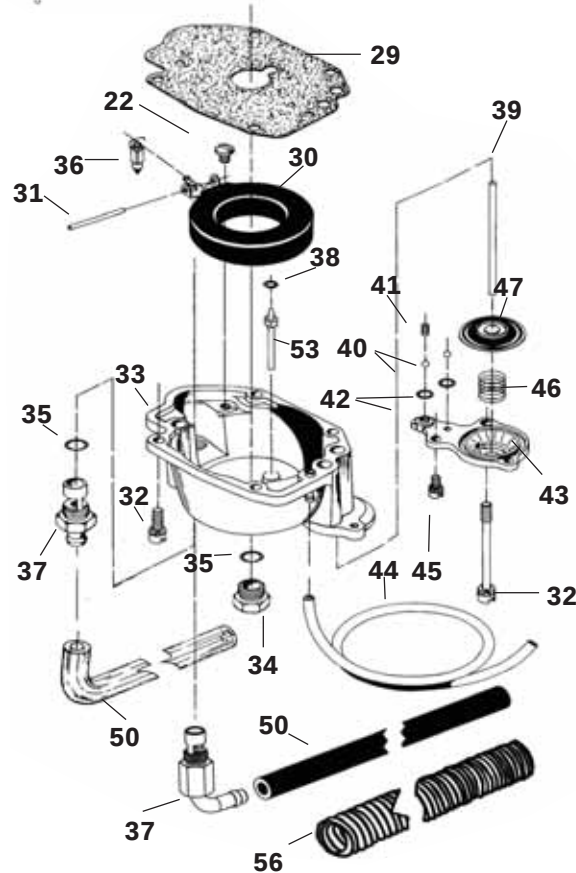

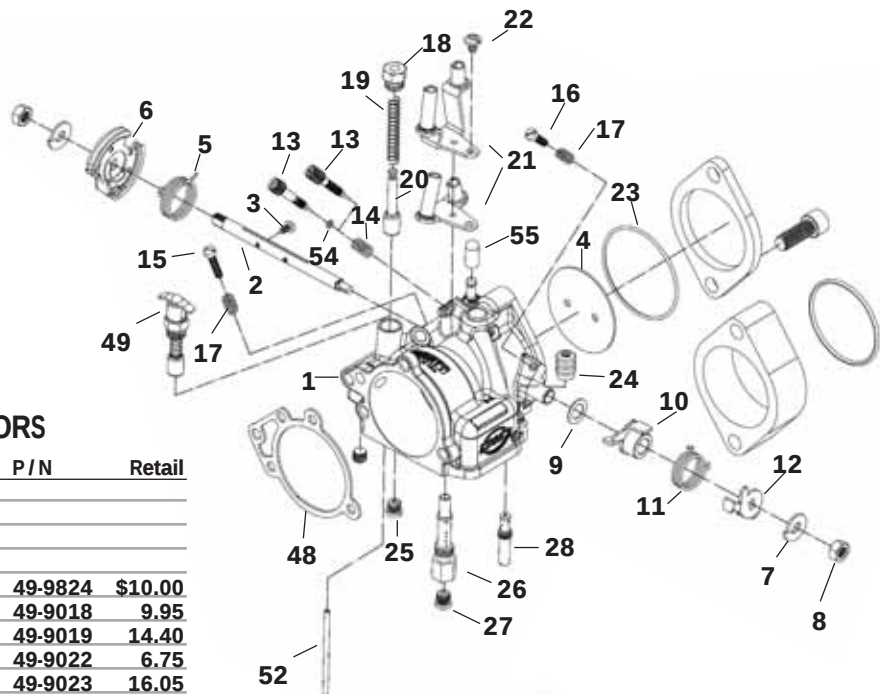

Description	P/N	Retail
Air Filter & Adaptor Kit	498596	52.95
Replacement Filter	498597	22.95

AIR FILTER ELEMENT

- New material provides better filtering efficiency while presenting less restriction to the flow of air
- Physically more durable than previous filtering materials, and lasts longer because it can trap nearly twice as much dirt before becoming clogged
- Although it looks like paper, this material can be washed and reused several times before it needs to be replaced
- Fits Super E & G Carbs

499242

18.15

BOYESEN QUICKSHOT

FOR S&S® SUPER E & G CARBURETORS

- Cost effective, bolt-on upgrade that allows accelerator pump fuel spray to be adjusted simply with the turn of a screw. Now the spray volume and duration can be set based on engine displacement and level of modification
- Supplied with a new precision spray nozzle tip. The single hole sprayer tip directs and injects the fuel more efficiently than stock. A fine high speed stream of fuel, atomizes faster to improve throttle response and acceleration
- The ultimate in adjustable fuel delivery
- Patented, proven design
- Accelerator pump check valve stops bogging and coughing
- Adjustable fuel jet to control accelerator pump fuel spray
- Precision single hole sprayer improves roll-on acceleration
- Instant throttle response
- Improves low end performance
- Improves fuel economy
- Bolt-on, no modifications required
- Fits S&S® Super E & G carburetors

S&S® MANIFOLD CONVERSION KIT

- Designed to replace the original rubber "compliance fitting" style manifold and seals
- Cracking and leaking problems can be eliminated by upgrading to the S&S® rigid mount manifold
- Can be used with S&S® Super B and E carburetors as well as stock carburetors with a two bolt mounting pattern
- Kit includes front and rear manifold mounting flanges, manifold O-rings and aluminum spacer shims

Description	P/N	Retail
84-99 Big Twin	493796	112.95
86-03 XL	484007¹	107.95

¹ Must be used with 3/8" thick insulator block with 1-7/8" opening #495231

S&S® RIGID MOUNT MANIFOLD FOR 84-99 BIG TWIN ENGINES

- Can be used to replace stock "compliance fitting" manifold on 84-99 and stock rigid mount manifolds from 90-99
- May also be used to replace manifolds on S&S® engines for 84-99 Big Twin
- 1-7/8" manifold flange bolt pattern will accept S&S® ES, LS, Super A, B and E carbs as well as stock butterfly style Tillotson®, Bendix® and Keihin® carburetors

496563 91.95

493879

493785

S&S® MANIFOLDS FOR SHOVELHEADS

- 1-7/8" manifold flange bolt pattern will accept S&S® ES, LS, Super A, B and E carbs as well as stock butterfly style Tillotson®, Bendix® and Keihin® carburetors
- Manifolds are available for 66-78 O-ring and 78-84 rubber band style cylinder heads
- Fits carburetors with 1-7/8" bore sizes

HARLEY-DAVIDSON	Year	P/N	Retail
Big Twin (O-ring)	66-77	493785	83.95

S&S®

1 IN. SPACER BLOCK WITH O-RING

- Designed for those carb installations where additional clearance is required between the tank and air cleaner
- Each spacer block kit comes with an O-ring
- 1-7/8" opening: Mounting hole pattern is identical to stock pattern on Tillotson®, Bendix® and Keihin® butterfly type carbs. Use with all S&S® 1-7/8" manifolds, includes O-rings
- 2-1/16" opening: Use with all 2-1/16" manifolds, includes O-ring

Description	P/N	Retail
1-7/8" Opening	499389	53.95
2-1/16" Opening	499399	58.95

499619

S&S®

MASTER REBUILD KITS

- Kits include body rebuild kit, accelerator pump rebuild kit, fasteners, springs, idle mixture screw, seat and needle assembly
- Not intended for use with racing/alcohol fuels

Note: When used to update an early Super E or G equipped with a 360° variable position gas inlet fitting, S&S® fuel line BC# 49-3783 with a 90° formed end must be used and ordered separately.

Application	P/N	Retail
Fits S&S® Super E Carbs with Regular Gas Inlet	499619	80.95
Fits S&S® Super G Carbs with Regular Gas Kit	499620	80.95

S&S®

TWIN POWER™

JET ASSORTMENT FOR S&S® SUPER B, E & G CARBS

- All jets are made of brass optimizing high precision and flow-calibrated for extremely accurate fuel flow rate
- Kit contains two each of the following intermediate jets, .025, .026, .028, .029, .031, .032, .033, .036, .040 And two each of the following main jets, .042, .044, .045, .046, .050, .052, .054, .056, .058, .060, .062, .064, .066, .068, .070, .072, .074, .076, .078, .080, .082, .084, .086, .090, .092, .094, .096, .098, .100, .102, .104
- Kit packaged in a set of two plastic trays, with part number reference for easy identification for re-ordering

420404

301.95

MIKUNI EASY KITS

- Designed to work with your original Harley-Davidson® intake manifold, choke cable, air cleaner and throttle cables
- May be used with high flow air filters designed for the stock CV carb for better performance
- Installation instructions and all necessary hardware included
- Pre-jetted and ready to run, per application
- 42mm carburetor
- Faster installation, uses stock throttle cables
- Excellent throttle response for better rider/bike control
- Realize the full power potential of the engine
- Accelerate and pass with more confidence
- 42mm Smoothbore Venturi offers great airflow
- Two-piece roller bearing flat side slide for smooth operation
- Enlarged needle and seat for extended full throttle operation
- Adjustable accelerator pump provides instant throttle response at any RPM
- Light throttle return spring for easy pull operation

Note: Must use stock cover

Twin Cam 88™ Models

- Use stock H-D throttle cables, manifold, choke cable and air cleaner
- Does not include air cleaner cover
- 99-08 Twin Cam models

Note: Many Twin Cam 88™ aftermarket air cleaners can be used, and are recommended for increased air flow.

426276 399.00

1200 Sportster Models

- Includes high flow backing plate and mounting hardware
- Requires stock oval cover and a Screamin' Eagle high flow replacement filter
- Fits 94-03 1200 Sportster models

426279 460.00

Evolution Big Twin Models

- Use stock H-D throttle cables, manifold, choke cable and air cleaner
- 90-99 Evolution Big Twin models

Note: Many aftermarket CV carb air cleaners can be used, and are recommended for increased air flow.

426275 460.00

Sportster & Buell Models

- Use stock intake manifold and choke cable
- Must use aftermarket performance air filter
- Fits 94-06 Sportster, Buell with aftermarket air filter assembly

MIKUNI

MIKUNI TOTAL KITS

- Gives you everything needed for a complete installation
- Kits include performance intake manifold, rubber flange, HSR 45mm or 42mm carb, high flow K&N® filter, chrome cover, head breather kit, bolts and hardware
- Installation instructions and hardware are included
- Pre-jetted and ready to run
- Use stock Harley-Davidson® throttle cables

Note: Carburetors are non-polished. 84-89 models require 92-95 throttle cables. Do not install on 84-88 FLT models. Gas tank will not clear carburetor.

MIKUNI 42MM & 45MM SMOOTHBORE CARBURETORS

- For the performance engine builder needing a carburetor only for specific custom applications
- Available in standard aluminum or polished finish
- 45mm requires custom manifold
- HSR42 cables, air cleaner, breather and jets are interchangeable

Note: Choke cable is included, except for #426278 which will use stock choke cable from CV type carb. 84-89 models require 90-95 cables.

BOYSEN TWINSHOT CV40 KIT FOR CARBURETED HARLEY-DAVIDSON®

- Cost effective, bolt-on upgrade that will eliminate the sluggish and inconsistent throttle response of your CV40 carbureted H-D
- Converts all O.E.M. H-D CV40 carburetors from 92-06 to a standardized fuel delivery system
- Standardized fuel system for application simplicity
- Precision twin hole sprayer improved roll-on acceleration
- Patented accelerator pump eliminates bogging and coughing
- Adjustable fuel jet to control accelerator pump fuel spray
- Removable main jet cap for easy access tuning
- Removable sprayer for convenient service and maintenance
- Precision accelerator pump plunger improves spray response
- Stiffer activation arm spring delivers consistent spray response
- Available in polished aluminum or matte black
- Bolt-on, no modifications required
- Fits 92-06 H-D O.E.M. CV carburetors

Replacement Filter

Description	P/N	Retail
Fits Biker's Choice® #603512	491259	10.95

UNI FILTER CRANKCASE BREATHER

- More efficient and better flowing than paper elements
- Made from a washable urethane material which requires no oil or special cleaners
- Fits 3/8" breather hose

149854 15.95

Products on this page may not be legal for sale or use in California or in other localities due to state and/or federal anti-tampering laws. Before purchasing, see page 1818.

KURYAKYN® CUSTOM CRANKCASE BREATHER

- 3/8" crankcase vent hose
- Mfg/N 8515

419551 31.99

BIKER'S CHOICE® AIR CLEANER SUPPORT BRACKETS

- Ideal support for most custom air cleaners
- Works best with Bendix and Keihin carburetors
- Chrome-plated
- HD#291198-83
- Fits 66-84 Shovelhead (8")

Note: Measurement in parentheses refers to bracket length.

490015 8.95

K&N® NYLON T CONNECTOR

- For use with multi-carburetors and/or petcocks
- Fits 1/4" to 3/8" I.D. fuel line

Note: Sold as card of 12

400500 39.95 cd

MOTION PRO® LOW PERMEATION FUEL LINE

- Resistant to swelling, hardening and cracking
- Ozone and UV resistant
- Yellow

Note: Sold in 25 ft. rolls.

Description	P/N	Retail
5/16" I.D. x 7/16" O.D.	120068	124.99
1/4" I.D. x 3/8" O.D.	120069	134.99

KURYAKYN® CRANKCASE BREATHER

- Chrome
- Solves the problem of oil being ejected into the air cleaner from the breather
- As oil-laden air condenses in the breather body, the excess oil now runs back down into the engine, rather than running into the air cleaner
- Mfg/N 9917
- Fits 93-99 Evolution Big Twin with CV carb

497931 62.99

HAYDEN KRANK VENT PLUS CRANKCASE VENTING SYSTEM

- More than simply venting your crankcase fumes, the Krank Vent Plus controls the air under the pistons by maintaining the proper amount of vacuum in the crankcase at any RPM
- You'll gain 2-8% of usable rear wheel horsepower
- Your engine gains a quicker throttle response
- Unit snaps open for easy cleaning, is not restricted to position, and is compact and light weight
- Made in USA
- Fits all H-D models including the hard to fit 93-Up head-breathers

155581 124.00

GOODRIDGE BRAIDED STEEL OIL / FUEL HOSE

- Stainless steel braided hose is easy to cut and fit
- An improvement in appearance over the more common six wire braid
- Available in cut-to-length sizes of 3 foot, 6 foot and 10 foot or 25 foot rolls

JIMS® 6-GALLON FUEL PUMP RETAINER REMOVER TOOL

- This tool is used to gain access to the fuel filter or fuel pump assembly and all other parts located inside the gas tank
- Removes the fuel tank cam retaining ring safely and without causing damage to the tank
- Use on 08-13 FLH, FLT fuel tanks

Note: If you try to remove the fuel tank cam retaining ring with a hammer and chisel, you will make sparks and fuel tank could explode!

Share Fuel

Drain Your Tank

FUEL-TOOL® FUEL SHARING & TANK DRAINING SYSTEM

- No tools required
- No modifications or permanent attachments are needed to your bike
- Entire connection and disconnection takes only seconds
- Transfers fuel at a rate of roughly one quart every 20 seconds
- Will not stall engine while in use
- Comes complete with its own storage pouch
- Small and compact size, stores anywhere
- 1-year limited warranty
- Fits 2001 and newer H-D models

601797

99.99

HOW DOES FUEL-TOOL® CONNECT TO YOUR BIKE?

Disconnect Fuel Line

Step 1: With the engine off, locate the Quick Connect Check Valve and push up on it. With a gentle tug, the fuel line will release (the check valve inside the Quick Connect will stop the flow of fuel.)

Attach Fuel-Tool® Adaptor & Fuel Line

Step 2: Insert the male end of the Fuel-Tool® into the Quick Connect. Then insert the male end of the fuel line into the Fuel-Tool®.

Start Engine & Transfer Fuel

Step 3: Once connected, START THE BIKE. Press the nozzle button and begin transferring fuel. (Full detailed instructions for use can be found on fueltool.com)

FUEL-TOOL® FUEL PRESSURE CHECK GAUGE

- Provides for simple, fast and accurate fuel pressure checks
- Quickly diagnoses loss of power, poor fuel economy, hesitation and stalling
- Solid brass adaptor and release valve, steel housing 100 psi) gauge
- Push button completely releases all fuel
- One-year manufacturer's warranty
- Fits 2001 and newer Fuel Injected H-D models
