NEW!

DRIFT® STEALTH 2 CAMERA

Introducing the 8th generation, the Drift Stealth 2 is the smallest and lightest Drift camera yet. This small camera can be carried with you anywhere and everywhere, so you are always ready to capture life from your perspective. The high-quality, 7-element lens provides an optical 137° field of view, no longer using a digital narrow angle, so objects appear closer and sharper. The rotatable lens and aerodynamic design make the Drift Stealth 2 a unique POV camera. With its color-coded screen and LED, you always know which camera mode you are in, creating a user-friendly experience.

- Video tagging
- Wi-Fi® and Drift Connect App
- Car DVR mode
- Aptina CMOS Sensor
- 3 hrs. record time
- 1080p at 30 fps video quality
- 80 mm x 42 mm x 27 mm
- 97 g

NEW!

DRIFT® TWO-WAY REMOTE CONTROL

Two-Way Remote Control places intuitive control at your fingertips. Easily attached to a wrist or pack, and with glove-friendly buttons, the Two-Way Remote Control clearly communicates your camera's current status using Drift's innovative color system. Use it to stop or start recording your primary camera or control as many cameras as you want - within a range of 10 m (33 ft.) - using the "One-to-All" mode. Capture 8 MP still photos even while recording and 12 MP stills while in photo mode. Initiate video tagging or easily switch between video, photo, time lapse and photo burst modes.

DRIFT® GHOST-S LENS KIT

Don't stress if you've cracked or scratched your Ghost-S Lens, just replace it with this kit. Kit includes two replacement lenses and all necessary hardware needed. Replacement will still allow you to retain the 300° rotation and 9.8 ft. waterproof rating.

P/N	Retail
424076	19.99

NEW!

DRIFT® TIME LAPSE

Allows you to capture photo time lapse sequences and is designed to rotate 360° in 60 minutes. Perfect for capturing all the action. Attach your camera and get ready for awesome 360° panoramas. Features a 1/4 in. tripod screw for attaching your Drift HD Ghost, or any other camera with a 1/4 in. receiver thread. A 1/4 in. receiver thread on the bottom of the Time Lapse enables you to mount the device itself. The maximum rotation is 360°, which takes an hour to complete. The Drift Time Lapse's rotation works via a clockwork powered mechanism, essentially meaning you won't have to worry about the Time Lapse's battery life running out. Note: Stack two Drift Innovation Time Lapses together and the rotating process will be quicker.

P/N	Retail
424061	24.99

NEW!

DRIFT® HANDLEBAR MOUNT

The perfect accessory for riders, whatever your discipline, helping you capture awesome high-definition video with your camera. With an adjustable grip, you can mount this accessory to any bars between 19 mm (0.75 in.) and 36 mm (1.4 in.) in diameter. Capable of pivoting more than 180° and rotating 360° with your camera, this mount utilizes the rotatable lens, opening up almost any angle for your action video.

P/N	Retail
424058	19.99

**MAGELLAN® EXPLORIST TRX7 GPS
3-D and 2-D Topo Basemap Views**

A hi-res 3-D terrain view, and a 2-D topo view with contour lines for the USA and Canada help identify land features and minimize surprises for safer navigation.

Preloaded Designated OHV Routes

Over 44,000 OHV routes from forest and public lands are preloaded. Search by location, trail difficulty or rating and view trail attributes. Save trails to a Wish List for future travel.

Record Tracks and Create Waypoints

Follow saved trails or, with one touch, start recording a track. For safety, only waypoint type is selectable when moving, then when track is paused, details like waypoint audio marking, type selection, waypoint naming and more can be added.

Social Sharing From the Trail

The TRX hash tag button instantly shares updates from the trail. Pictures can be taken while on the trail and uploaded to a linked Instagram account. Earn achievements for Dirt Miles recorded and visiting new places.

Save and Rank Trails

Quickly save personal tracks with one touch, or save a trail with difficulty rankings. Rankings are based on information regarding 4WD use, trail conditions, obstacles seen and more. Wireless upload saved trails with built-in Wi-Fi®.

Offroad Community Database

Publish ranked tracks to an ever-growing trail and track database. The TRX7 offers a growing trail database for the offroad community to plan, search and learn about a route or the terrain from personal observations by fellow offroad enthusiast

Now you can find the best paved motorcycle rides in the country thanks to Butler G1 Maps. No more having to guess which path to take to find all the best our country has to offer. Butler Maps has a dedicated team of riders that venture out and rate every road so you can have the best adventure possible. They use an easy-to-read rating system to indicate the most dramatic, scenic stretches. They're accompanied by detailed inset boxes, written descriptions, elevation profiles and other useful information to help you plan your journey.

- Waterproof, tear-resistant construction
- QR Codes to pull up-to-date information
- Dual-sport roads included
- Seasonal weather profiles
- 4.25" x 9" folded
- Made in USA

TECHMOUNT® DEVICE MOUNTING SOLUTIONS

Used for mounting various small electronic devices such as GPS, cellphones, radar detectors, toll transponders, audio/video equipment, satellite radio and much more.

Kit includes all needed hardware for a simple and easy installation.

- Three easy steps to mounting your smartphone, POV camera, radar detector or other devices:
 1. Choose the mount that fits your vehicle
 2. Choose an extension shaft if necessary to properly position your device
 3. Choose the top plate or mount adapter for your device

CARDO SCALA RIDER® PACKTALK WITH DMC TECHNOLOGY

Seamless group communication remains unaffected by members leaving or joining the group. GPS instructions, FM radio, MP3 music continue in background during intercom calls. Rider and passenger can listen to the same stereo music via A2DP. Built-in FM Radio with RDS: six station presets with auto scan. Advanced voice recognition technology for true hands-free operation, now with additional multilingual voice commands. Intuitive manual operation through Cardo's novel roller-wheel interface (patent pending). Cardo SmartSet™ app for Android and iOS devices enables the use of a smartphone as remote control on the handlebar and customization of devices. Cardo Community® platform for social features, device customization and software upgrades (range dependent on riding environment).

Best-in-class, noise-cancellation algorithms. Multilingual spoken status announcements. Self-adjusting volume according to riding speed and ambient noise. Voice-control for mobile and intercom calls. Interchangeable hybrid and corded microphones. Superb audio quality with high-definition replaceable 3.5 mm speakers. Up to 13 hours talk time and one week stand by.

- Patent pending Dynamic Meshwork Communication technology for group intercom (2 to 15 riders) over a dynamic, auto-adaptive mesh
- Voice-controlled speed dial
- Automatic call transfer from intercom to mobile phone when intercom 5 mile range is exceeded
- Mobile phone conference call with outside caller and/or intercom partners
- Customizable Hot-Dial number
- Waterproof and dustproof

CARDO SCALA RIDER® FREECOM 1

Plug-and-play Bluetooth® communication system for solo riders.

Dual hands-free profile allows connection of two Bluetooth®-enabled mobile devices or GPS. Receive in-helmet navigation instructions from compatible GPS devices. Customizable voice-control (VOX) for receiving and rejecting incoming mobile calls.

Stereo Bluetooth® (A2DP) enabled for wireless music streaming from iPod® or Android™ devices. Parallel Audio Streaming allows GPS instructions to continue while listening to A2DP stereo music or during an incoming call. During phone conversations, music and radio are muted.

Downloadable Cardo SmartSet™ app for device customization and settings can turn a smartphone into a handlebar mounted remote control. Cardo Community® online platform for personalizing device settings and software updates. Customizable self-adjusting volume according to riding speed and ambient noise. Customizable volume-per-mode for music, radio, mobile and intercom. Customizable speed dial and multilingual spoken status announcements about battery level, radio and connected devices. Multilingual built-in menus for easy operation and customization.

- Hybrid microphones suit virtually any helmet type
- Superb HD audio quality with replaceable, ultra-thin 40 mm speakers and 3.5 mm jack
- Up to 13 hours talk time or one-week standby
- Fully waterproof and dustproof - IP67 certified
- Bluetooth® 4.1

NEW!

CARDO SCALA RIDER® SMARTH SINGLE

High-powered technology, slim stylish design.

The new cardo SMARTH™ communication system was designed for optimal fit with HJC helmets and it does so in a remarkably striking way. Featuring Cardo's top-of-the-line DMC technology, the SMARTH is right there at the top of the technological array.

Dual-technology: Dynamic Meshwork Communication™ (DMC) and Bluetooth® in a single, powerful and ultra-sleek communication system. DMC technology for superior intercom conferencing and Bluetooth® for making and receiving mobile calls, GPS navigation instructions and for listening to stereo music via A2DP or the built in FM radio. The embedded Bluetooth® module also provides the freedom to conduct intercom conversations with Non-DMC Cardo communication systems and third party Bluetooth® headsets.

Equipped with Cardo's groundbreaking DMC™ technology (pat.pend.), the cardo SMARTH offers the most robust and versatile multirider intercom-conferencing experience available today. It allows up to four riders to maintain uninterrupted communications within a spontaneous and fluid virtual network. Unlike any other solution, DMC allows each rider to randomly join, leave and re-join the group without compromising the multi-party conference conversation and without pressing any buttons.

Robust and uninterrupted intercom-conferencing at a range of up to 3.6 km / 2.25 miles between two to four riders. Parallel audio streaming allows user to conduct DMC intercom conversations and listen to music, radio or GPS instructions at the same time. During phone conversations, music and radio are muted while the GPS instructions continue.

2-, 3- or 4-Way Bluetooth® conferencing up to 1.2 km/ 0.75 miles between bike-to-bike. Bluetooth® "1+8" intercom toggling between eight other riders by calling the rider's name. Cardo Gateway for pairing with and conducting intercom conversations with non-Cardo headsets. Click-to-Link® for spontaneous intercom conversations with nearby Cardo headsets with no pre-pairing required.

Make, receive or reject calls by voice command or at the push of a button, dual hands-free profile to connect two mobile phones simultaneously. Intercom-to-phone automatic call transfer from intercom to mobile phone when out of range. Mobile conference call with outside caller and intercom partner. Connectivity to two mobile phone or GPS devices.

Parallel audio streaming allows user to conduct intercom conversations and listen to music, radio or GPS instructions at the same time. During phone conversations, music and radio are muted while the GPS instructions continue. FM radio with RDS and six built-in station presets, auto scan and seek. Music-sharing allows two riders to listen to the same radio station, with each being able to change the station.

Multilingual advanced voice recognition technology for true hands-free operation. Multilingual spoken status announcements and built-in menus for easy operation and customization. Downloadable Cardo SmartSet™ app for Android™ and iOS devices allows smartphone to serve as remote control on the handlebar for easy operation of the device. Cardo Community® platform for social features, device customization and software upgrades.

- Unique design for HJC helmets including an ultra-slim control unit and a concealed rear mounted unit
- Interchangeable hybrid and corded microphones in the same package to suit virtually any helmet type
- Superb HD audio quality with replaceable, ultra-thin 40 mm speakers and 3.5 mm jack
- Up to 13 hours talk time or one-week standby
- Fully waterproof and dustproof - IP67 certified
- Voice commands to initiate features
- Customizable audio volume-per-mode: music, radio, mobile and intercom
- Digital Signal Processing (DSP) for advanced audio quality and functionality
- AGC: customizable self-adjusting volume according to riding speed and ambient noise
- VOX: customizable voice-control for receiving and rejecting incoming mobile or intercom calls
- Bluetooth® 4.1

Note: Range dependent on riding environment. Minimum Requirements: Android 4.0/iOS 8.0 or Windows 7/Mac 10.8 (Mountain Lion).

CARDO SCALA RIDER® G9X

Voice Recognition and Voice Command technology for true hands-free operation. "Flash Pairing": simply "bump" two G9s together and you're ready to hit the road. Click-to-Link® for spontaneous intercom with Scala Riders nearby with no need for pre-pairing. Music-sharing: rider and passenger can listen to the same stereo music (via A2DP). Android app for individual Scala Rider customization (first of its kind). Cardo Community® online social platform allows you to invite friends on a ride, personalize your unit's setting and access software updates. Group signal: send an audio alert to up to eight other riders in your group simultaneously.

Receive in-the-ear navigation instructions from Bluetooth® enabled GPS (must support HS profile). Intercom connectivity to all other compatible Scala Rider models. Cardo's unique roller-wheel interface offers intuitive manual operation and is easy-to-use with winter gloves. Built-in FM radio with RDS: six programmable station presets with auto scan (automatic selection of strongest signal). AGC technology: customizable, self-adjusting volume according to speed and ambient noise (patent pending). VOX activation: customizable voice-control for receiving/rejecting incoming mobile and intercom calls (patent pending). Interchangeable hybrid and corded microphones in the same package to suit any helmet.

- Bike-to-Bike intercom range of up to one mile
- "One+8" Intercom: toggle between nine riders
- Four-way, full-duplex intercom conference mode
- Hot-Dial number (customizable)
- Dual Handsfree profile to connect two Bluetooth®-enabled mobile phones
- Mobile Phone Conference Mode (rider, passenger, outside caller)
- Stereo Bluetooth® (A2DP) enabled MP3 player/iPod® or smartphone to stream wireless music
- Non-Bluetooth® audio player (via MP3 cord)
- Replaceable plug-in speakers (3.5mm connection)
- Up to 13 hours talk time, one week standby
- Waterproof and dustproof unit

Note: Results may vary according to terrain. Reduced operational range when connected to certain Scala Rider models.

ANTIGRAVITY BATTERIES THUMP BUDS

The amazing new Thump-Buds by Antigravity Batteries are Bluetooth® Cordless/Wireless Earbuds. That means there is no cord running down your body to your electronics device - so your earbuds won't be ripped out of your ears when you turn your head, exercise or be active. But not only can you listen to your favorite music, podcast or audio book, you can also answer your phone through the Thump-Buds themselves!

- Bluetooth cordless and wireless
- Built-in microphone allows you to take phone calls with the push of a button
- Complete control over the audio you are listening to, directly from the Thump-Buds. Adjust volume, skip to next/previous song, and answer phone calls. No picking up a phone to change songs or adjust volume
- Compact, lightweight and awesome sounding
- Up to 25 ft. of range for reception to your Bluetooth devices
- Up to 3-5 hours listening/talking time (depending on volume), 40-50 hours standby
- Connects with any Bluetooth Audio
- Charges from any USB output
- Includes assorted cushion sizes and carry pouch

NEW!

UCLEAR® AMP PRO

The AMP Pro builds on the foundation of the groundbreaking HBC series. We upgraded to a faster and more powerful processor, upgraded to Bluetooth® 4.2 and added our new Hi-Definition Pulse Pro Speaker Microphone array. The Pulse Pro speakers feature Hi-Fi studio sound that produces powerful bass, warm natural voice and clean highs. Our patented noise-canceling ABF technology eliminates most external noise and our DSP Algorithms triangulate your voice's "sweet spot" for exceptional sound clarity during voice communication. The AMP Pro includes our full-duplex intercom technology, which allows you to connect up to 10+ AMP Pro users. So chat it up with your riding buddies or rock out solo to your favorite band; the AMP Pro has you dialed in. The wireless helmet audio game just changed and the AMP Pro dialed it up to 11.

- Bluetooth®: V4.2 (BR/EDR/BLE), Class 1
- Profiles: HSP, HFP, A2DP, AVRCP, GATT
- Enabled Cross-Brand Intercom (CBI Technology)
- Intercom range: up to 700 m (0.43 mi)
- Battery: 3.7-Volts, 430 mAh Lithium-ion
- Talk time: up to 10 Hours
- Stand-by time: 400 Hours
- Operating temp: -30° C (-4° F) to 60° C (140° F)
- Controller unit size: 60 x 40 x 18 mm (2.9 x 1.75 x 1")

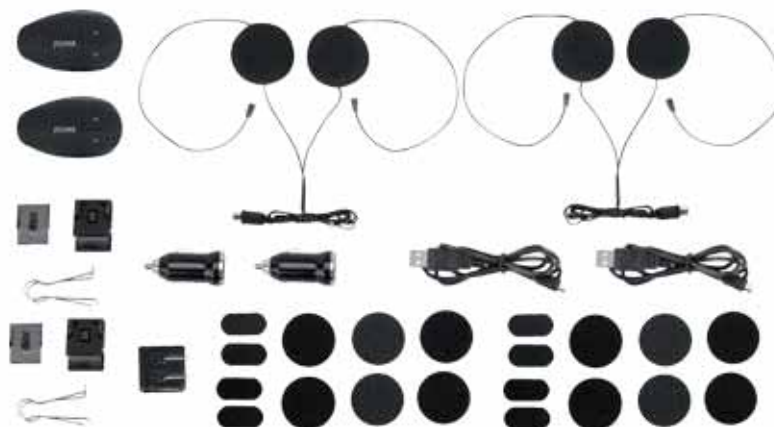

Includes:

- AMP Pro Controller Unit
- Pulse Pro Hi-Fi Speaker/mic array
- Permanent mount
- Temporary mount

EXCLUSIVE

NOLAN® M5 UNIVERSAL BLUETOOTH COMMUNICATION KIT

The M5 kit is a universal Bluetooth® Communication Kit that includes both the headset and the Bluetooth unit in an easy-to-install system. The E-box is placed on the rear part of the helmet for low aerodynamic impact and the low-energy Bluetooth wireless keypad can be placed anywhere. N-Com app enables remote control from a smartphone; available through App Store and Google Play. Connects with up to six other Bluetooth headsets and up to two Bluetooth phones simultaneously. Plays music via Bluetooth on devices using A2DP technology. Available settings include: noise reduction, voice prompt, individual "friend" addresses, GPS conferencing, mobile phone conferencing, smart navi system, management via PC and battery saving setting.

- Emergency Stop Signal: LED indicator flashes when the system receives a strong signal of deceleration from the bike
- Auto on/off system switches off after 30 seconds of inactivity
- Compatible with any Nolan Bluetooth or any other Bluetooth communication system
- Connects with Bluetooth-enabled GPS
- Available wire for connection to iPod® or other music devices using a standard 3.5 mm jack
- Equipped with FM radio
- The M5 Kit fits any brand of helmet

P/N	Retail

EXCLUSIVE

NOLAN® B5 SINGLE UNIT BLUETOOTH COMMUNICATION SYSTEM

The N-Com B5, Nolan's top range Bluetooth® communications headset, is perfectly integrated in the helmet, has minimum aerodynamic impact and excellent audio quality. Compatible with N104EVO, N104, N44, N40 full and N40.

- Connects via Bluetooth with any brand of Bluetooth intercom system
- Connects via Bluetooth with up to six bikes and two phones simultaneously
- Connects with Bluetooth-enabled GPS
- N-Com app enables remote control from a smartphone; available through App Store and Google Play
- Plays music via Bluetooth on devices with A2DP technology
- Available wire for connection to iPod or other devices with a standard 3.5 mm jack
- FM radio
- Auto on/off switches off after 30 seconds of inactivity to extend battery life
- User settings include management via PC, noise reduction, voice prompt, individual "friend" numbers, mobile phone conferencing, GPS conferencing, smart navi system, battery saving, flash recharge and N-Com app

NOLAN® N-COM B1 ENTRY-LEVEL BLUETOOTH COMMUNICATION SYSTEM

The B1 system is an entry-level Bluetooth® communication kit, which includes both the headset and the Bluetooth unit in one easy-to-install system for one or two helmets. It is optimized for one rider or for a couple riding on one motorcycle, as the distance for helmet-to-helmet communication is limited to 150 ft.

Connect other devices to the B1: music players and other devices using a standard headphone jack can be connected via a Multimedia Wire, P/N 393446 (not included) and other Bluetooth-enabled devices, such as a cellphone and a GPS, can be paired through the Bluetooth connection. Firmware updates can be done by connecting the B1 to a computer via the USB cable (included) with the N-Com Wizard program.

- Rider-to-passenger communication via Bluetooth

J&M® BLUETOOTH CELLPHONE/GPS/RADAR INTEGRATION SYSTEM

- Integrates a cell phone, smartphone, Bluetooth®-enabled GPS unit and/or specific radar detectors with the driver's (only) J&M® or Harley-Davidson® brand corded helmet headset
- While using the normal audio system functions on the Harley Ultra of stereo music, intercom and/or CB radio, if the cell phone receives an incoming call and the call is accepted by depressing the handlebar mounted multifunction button, or onscreen thru a Garmin Zumo, complete connection of the driver's headset to the cell phone is automatically initiated for totally hands-free operation
- Voice command dialing can be activated by depressing the handlebar mounted multifunction button, which will also initiate complete connection of the driver's headset to the cell phone, for totally hands-free operation
- If the Bluetooth enabled and linked GPS unit emits any navigation commands, or the radar detector emits any beeps or braps, regardless of what else might be being heard in the headset, they will momentarily be heard in the driver's corded helmet headset
- Once linked the first time, the Bluetooth enabled cell phone will automatically connect/disconnect from the system, when the Harley Ultra ignition is turned on or off
- Plug-and-play Bluetooth cell phone integration solution for 98-13 Ultra models
- Specific radar-detector adaptor harnesses are available at extra cost. Includes: Plug-in integration module
Handlebar-mounted control switch assembly
Complete installation/operation manual

Description	P/N	Retail
Harley-Davidson® Integration System	217851	599.99
Universal	217864	229.99

J&M® DIGITAL STEREO MUSIC/IPOD/BLUETOOTH CONTROLLER

- Exciting music streaming features will work with an iPhone®, Android, Blackberry, Samsung or almost any smartphone available in the marketplace today that incorporates Bluetooth®
- Digital music controller will also connect to a standard iPod by wire and direct the stereo music into the H-D® audio system aux input, using the iPod's own onscreen controls, while at the same time keeping the iPod fully charged
- Configures the input signal levels from the new controller to the H-D radio so that the system volume levels available on the highway and overall sound quality through the entire system is significantly better than what is available when using H-D iPod adaptor, XM satellite radio module or built-in FM stereo
- H-D radio control menu selections of bass, treble, front/rear fader, auto volume control, driver/passenger intercom, bike-to-bike CB radio and handlebar volume control, (if activated) all remain unchanged when using J&M's Bluetooth digital music controller
- When mounted on a H-D ultra with the optional J&M microphone signal integration component and linked by Bluetooth to a cell phone, the driver can actually talk on the phone thru his or her J&M or H-D brand helmet headset, without affecting the driver/passenger intercom or CB functions of the audio system. Phone calls are accepted or initiated onscreen.
- A Garmin Zumo can also be linked by Bluetooth to the J&M music controller while an iPod is simultaneously connected by wire and when a navigation command or cell phone call is received through the Zumo, it will automatically interrupt the iPod music signal into the system
- Actual installation is pretty simple once you remove the fairing, everything is plug and play, but placement of the music controller is somewhat critical so that you don't block or interfere with the internally mounted 2.4 ghz Bluetooth antenna
- Includes all direct plug-and-play harnesses for the H-D bagger audio system, wired extension cable for iPod, lightning plug adaptor for iPhone 5, 3.5 mm aux extension cable, metal mounting bracket, pre-gummed Velcro® mounting strips and a complete installation, operation and easy to use Bluetooth linking instruction manual

J&M® JMCB-2003B CB/STEREO/INTERCOM AUDIO SYSTEM FOR V-TWIN

The complete system is on your handlebar and the unit is water-resistant so you won't have to worry about getting caught out in the rain. Audio performance is superb, even at high speeds, and that is most impressive considering it's compact size.

- Features a 40 channel CB radio, NOAA weather band, rider/passenger intercom
- Stereo music amplification from any Walkman®-type music device
- Mount it to your left handlebar with the proper bracket kit

Note: The JMCB-2003 is a J&M six pin audio system that requires the pre-amplified microphone signal provided by dual mode (ECD/ICD/BCD/CD prefixed) helmet headsets along with the #HC-ZJM or #HC-PJM lower-section hookup cord.

J&M® ELITE 787 SERIES HELMET HEADSET

This high-intensity helmet speaker design combines a better frequency response curve with higher volume levels to provide distortion-free sound, even at highway speeds. Speakers are available in both 40 mm ultra-slim and 45 mm large diameter custom, for installation into most motorcycle helmets. Extra-high output AeroMike® VI provides the very best combination of wind and ambient noise cancellation with an even stronger output signal in the human voice frequency range, when compared to previous versions of the J&M AeroMike® microphones. AeroMike® VI makes it easier to find an optimum intercom vox/mute sensitivity setting for a smoother and more accurate transition between vox intercom and music.

- 5- to 10-year durability
- Upper section cord only, is included with all Elite 787 headsets, allowing the rider to choose the correct lower section hook-up cord applicable to their particular motorcycle audio system

HAWG WIRED AMPLIFIERS AND SPEAKER KITS

High-fidelity audio has been in the blood of the people at Hawg Wired forever, and so has their love of the ride. Bringing the two together just seemed natural. With over 50 years combined engineering experience in the electronics industry, they set out to fill the gap between today's leading technology, and the constraining difficult environment of motorcycles as a platform for audio high-fidelity. After a few well intentioned, yet doomed, car stereo installations on bikes of their own, their decision was clear; let's build what doesn't exist, and get it right the first time.

EXCLUSIVE

HAWG WIRED COMPETITION 300-WATT AND REFERENCE SERIES 400-WATT AMPLIFIERS

Smallest, most powerful amplifier version yet - 4.5" x 4" x 1.7". The small form factor allows fitment of up to two in an FLHT, four in an FLTR.

- 300-Watt version: 150-Watt of continuous power @ 4 ohms and 300-Watt @ 2 ohms
- 400-Watt version: 200-Watt of continuous power @ 4 ohms and 400-Watt @ 2 ohms
- High- and low-level input
- Regulated class-D makes efficient power, low heat
- Clean audio power without taxing the charging system
- Standard interfaces for universal applications
- Built-in crossovers for complete customization
- RC-link remote control and linking compatible
- 2 oz. copper clad circuit boards, gold immersion
- Conformal coated against corrosion and moisture
- Kit includes: two channel expandable amplifier, one high-level
- Input harness and one speaker output terminal plug
- One-year manufacturer's warranty
- Made in USA

EXCLUSIVE

HAWG WIRED SIX PACK

Stage 3 Systems take it to the max. Optimized with the highest performing equipment and technology, these systems bring on the crowds and bragging rights in large numbers. Stage 3 Systems can be configured in multiple ways and can result in an eight channel @ 400-Watts each, competition level power house. Chiseled into perfection and the perfect solution for someone who wants all the performance they can get now and still add more later.

Built-in crossovers for complete customization. RC-Link remote control and linking compatible. 2 oz. copper clad circuit boards, gold immersion. Conformal coated against corrosion and moisture. Professional wiring makes installation a breeze.

- 2 Ohm stable and linkable
- Regulated Class-D makes efficient power, low heat
- Clean audio power without taxing charging system
- Standard interfaces for universal applications
- Two-year manufacturer's warranty

Includes:

- 1-RS Series 400-Watt (2x100/2x150) Amplifier
- 2-ZX Series 6.5 in. Component Speakers
- 2-6.5 in. Adaptor Rings
- 1-CS/RS Series Amplifier Install Kit

J&M SERIES XXR 6.71 FAIRING SPEAKER KIT

The most powerful speaker available for your H-D® Bagger audio system. J&M's new ROKKER XXR series 6.71 in. speakers have been designed as exact size component/replacements for the stock 6.5 in. H-D® fairing speakers as installed on the 14-16 Harley StreetGlide, Ultra or Ultra Ltd. Spec'd at 2 ohms impedance and an impressive 300-watts maximum input (175w RMS - 91db sensitivity), these speakers provide the ultimate in raw audio power and include the new custom grills with built-in high-output tweeters.

- Lightweight, waterproof, one-piece woven-fiber driver cone with super-rigid metal basket design
- High-density lightweight Neodymium magnet structure, specially coated to maintain flux-strength integrity even at extreme operating temperatures
- High efficiency vented voice-coil for improved cooling when operating at high volume levels for extended periods
- Custom speaker grills with high-output tweeters for crystal clear sound at highway speeds

J&M® XT DUAL 7-1/4" SUB-WOOFER SPEAKER KIT FOR STOCK HARLEY-DAVIDSON SADDLEBAGS

7-1/4 in. round sub-woofers are large diameter dedicated low-frequency speakers, with cone volume and mass comparable to a 6" x 9" speaker. 2 ohms impedance, 40-3khz frequency response and 200-Watts max power, provide the ultimate in bass response and low-frequency audio power. This custom kit allows speakers to be mounted down into the rear portion of the stock Harley-Davidson® saddlebags, while leaving more than 75% of the saddlebag storage area.

High-efficiency vented voice-coil for improved cooling when operating at high volume levels for extended periods. Custom designed grillwork for mounting in the rear saddlebag position, with mounting spacers, weatherproof gasket seals and protective rear luggage cowl. Designed to be connected to the rear channels of the 500-Watt four channel Rokker™ amplifier, which is then switched into low-freq mode, with proper crossover frequency and gain adjustments.

- Waterproof mylar/polycarbonate woofer cone
- High-flux strength but lightweight dual-donut Neodymium magnet

P/N	Retail
217955	349.99

J&M® ROKKER SERIES XX 6.65" REAR TRUNK POD SPEAKER UPGRADE

Custom max-flow speaker grills for crystal clear sound at highway speeds. These speakers will perform extremely well when used with a medium- to high-powered accessory amplifier. Designed as exact size component/replacements for the stock 6.5 in. Harley-Davidson® rear trunk-pod speakers as installed on the 14-15 Ultra or Ultra Ltd. Spec'd at 2 ohms impedance and an impressive 217-Watts maximum input (156-Watt RMS continuous-92db sensitivity) providing the ultimate in raw audio power and include the silk-dome tweeter bridge as part of this custom design. Super high-density lightweight Neodymium magnet structure for improved cooling when operating at high volume levels for extended periods.

- Lightweight waterproof one-piece woven-fiber driver cone
- High-output, silk-dome tweeter
- Mounting hole pattern and spade electrical connections same as factory specification
- Plug-and-play no-modification solution
- Easy-to-follow installation instructions

J&M® PERFORMANCE SERIES AUDIO KITS

These speakers provide the ultimate in bass response, extended mid/high frequency range and raw audio power. Features a waterproof injection-molded polycarbonate woofer cone, high-flux strength but lightweight dual-donut Neodymium magnet, high-efficiency voice coil, the latest design grillwork with mounted tweeter and midrange, (plain grills only for lower fairing speakers) and top-quality adaptor rings/bracket hardware for secure and clean mounting. Full-range, class D amplifier spec'd at 90-Watts RMS per channel x four channels, (360-Watts total) driven continuous into a 2 ohm load at 14.4vdc; amplifier mounts inside the fairing using the custom made stainless steel bracket system. Road Glide Ultra and Ultra Classic has a four channel, 360-Watt amplifier kit, that measures 7-1/4" x 4-3/4" x 1-3/4". Road Glide and Street Glide has a two channel, 180-Watt amplifier kit, that measures 6-1/2" x 4-3/4" x 1-3/4".

The kit includes all hardware, connections, mounting brackets and custom made plug-and-play wiring harnesses. A pair of 7-1/4 in. round drivers, the largest diameter speakers that can be installed into the Harley® Road Glide style fairing and vented lower fairings, with cone volume and mass comparable to a 6" x 9" speaker, and a pair of 5-1/4 in. round drivers, the largest and most efficient speakers you can install into the rear trunk pod position on the Harley® Road Glide Ultra are also included.

2 Ohms impedance and 140/120+Watts max power

- Top quality heavy gauge power/ground wires for the fused battery connection

J&M® ROKKER SERIES TWEETER KIT

25 mm diameter high-output dome tweeters designed to bring extra high-frequency definition to your bagger audio system. Designed specifically for use on the 98-13 Ultra-Classic (Batwing) or Road Glide style fairing. Tweeters are exact dimensional and wire connection substitutes for H-D# 77036-11A; spec'd at 2 ohms nominal impedance and will work with any radio or amplifier designed to operate at a 2, 4, 6 or 8-ohm load. Rated at 300-Watts peak power (150-Watts RMS) 3,000 - 21 khz frequency range and 94db sensitivity at 1W, 1M, these tweeters can easily replace two of the stock H-D® gauges on the inside fairing panel. Connects direct to the midrange output jack on the back of the J&M Rokker series speaker crossover network or to the factory H-D® wiring harness on certain CVO Street Glide and Road Glide fairings or to the front speaker spade connections inside the fairing using the custom made plug-n-play wiring harnesses included. Kit includes two tweeters, alternate connection wire assemblies, along with all necessary mounting hardware and complete installation instructions.

J&M ROKKER SERIES AUDIO COMPONENTS FOR HARLEY-DAVIDSON BAGGERS

- Rokker® series high-tech speaker kits are designed from the ground up to provide maximum performance and durability for your Harley-Davidson® Bagger
- The component amplifier kits provide the highest per-channel RMS power output available, in a small compact package, to allow no-hassle plug-n-play mounting inside your stock fairing

J&M® ROKKER SERIES XT 7-1/4" FAIRING SPEAKER UPGRADE KIT

- 7-1/4 in. round subs are the largest diameter speakers that can be installed into the Harley-Davidson® Bagger-style fairing
- The 3-way, high-performance speaker set has been designed specifically for the Bagger fairing with 217-Watts
- Waterproof injection molded polycarbonate woofer cone
- High-flux strength but lightweight dual donut Neodymium magnet
- High-efficiency, vented voice-coil for improved cooling when operating at high volume levels for extended periods
- Specially-tuned speaker-mounted passive crossover network for improved fidelity and frequency response
- Top-quality adaptor rings/brackets hardware for secure and clean mounting into the fairing
- Mounting hole pattern and spade electrical connections are exactly the same as the factory specifications

J&M® ROKKER SERIES XT LOWER FAIRING SPEAKER KIT

Specially-tuned speaker-mounted passive crossover network for improved fidelity and frequency response. Top-quality lower fairing housing inserts, to hold the J&M® Rokker™ Series 7-1/4 in. speaker and custom grill with mounted high-output tweeter and midrange. These high-impact quality molded speaker inserts are textured in a matte finish and can be painted to match the color of your bagger. All necessary mounting hardware and complete installation/operating instructions included. Wiring kit is complete with amplifier gain adjustment guidelines, replacement amplifier cooling fan splash cover (to be used after performing amplifier gain control adjustments) and complete connection schematic diagram. 7-1/4 in. round subs are the largest diameter speakers that can be installed into the Harley-Davidson® lower fairing shells, with cone volume and mass comparable to a 6" x 9" speaker. 2 ohms impedance, 140+ and 217-Watts max power, these speakers provide the ultimate in raw audio power.

- Waterproof injection molded polycarbonate woofer cone
- High-flux strength, lightweight dual donut Neodymium magnet
- High-efficiency, vented voice-coil
- Custom designed grill work
- High-output titanium-colored tweeter and midrange drivers

Note: This in-series wiring harness kit is to be used when connecting the J&M® Rokker™ Series 7-1/4 in. lower fairing speakers, together with the J&M® 7-1/4 in. upper fairing speakers, to a J&M® in-fairing mounted 2-channel amplifier, (four speakers total on the motorcycle) or the front two channels of a J&M® in-fairing four channel amplifier (six speakers total on the motorcycle).

CYCLE SOUNDS IPOD CRADLE

Cradle holds your classic sized iPod using any of our mounts without the need for velcro. Just slide your iPod in and take your tunes along for the ride.

- Features standard 4-hole mounting pattern compatible with all mounts

Note: The "Classic" iPods operate with the use of a physical disc drive for storage. This means these models are more vulnerable to skipping from high vibration. On many bikes this may not be a problem, but should be noted to avoid any damage.

BIKETRONICS INC. RETRORADIO

RetroRadio™ kit is the affordable path to in-dash CD/MP3 upgrades for your Harley-Davidson® Touring bike. Plug-in converter works with a broad selection of modern in-dash players from Sony, allowing you to choose the features and price that's right for you. Tap into the latest audio technology including CD, MP3, XM and Sirius as well as Bluetooth®. The RetroRadio™ controller makes the connection from the bike's thumb controls to the radio with a plug-in module. It's the only module on the market that senses bike speed to make adjustments to volume automatically.

- Package contains RetroRadio™ plug-in interface controller, radio mounts, trim and hardware
- Speaker/antenna options available separately
- Made in USA

Note: For use with Sony radios using a wired remote input jack.

KURYAKYN® ROADTHUNDER FAIRING SPEAKER KIT BY MTX

The Kuryakyn RoadThunder Fairing Speaker Kit by MTX includes everything you need to replace the stock fairing speakers with pulse-pounding crystal clear audio. The included 2-channel amp cranks out 400-Watts of potent peak power to the 120-Watt, 6.5 in. coaxial speakers that feature extended low frequency response for fuller sound, with high sensitivity for no distortion at higher volume levels. The included stylish steel mesh replacement speaker grills make the pair look as good as they sound. Kit includes two 120-Watt, 6.5 in. replacement fairing speakers, 2-channel 400-Watt peak power amp, wiring harness and speaker grills.

Does not interfere with rear O.E.M. speakers on models equipped with Tour-Pak backrest-mounted speakers. Weather-resistant amplifier is in accordance with IP66 rating.

- Water-resistant polypropylene concave cone design for improved off-axis response
- The tweeters are pre-positioned for the best imaging when used with the fairing kit
- Extended low frequency response for fuller sound
- High sensitivity for higher volume levels
- 120-Watt peak power

SHOW CHROME® SHORT SPIRAL ANTENNA

This Short Spiral Antenna from Big Bike Parts is a great replacement for those long stock O.E.M. whips that do not work with covers, get in the way of low overhead garage doors and are just a nuisance. This 7-1/2 in. tall antenna is easily installed as a direct replacement for Can-Am RT, Victory and Harley AM/FM antennas. Includes a new grommet for the Can-Am RT that will stay put and complete the installation. Includes removable M6-1.0 threaded screw to mount on any model needed.
