LEGENDARY - QUALITY - GENUINE JAMES GASKETS®

James Gaskets has been in the Harley-Davidson® aftermarket parts industry since the mid 1970's. What originally began as a small motorcycle repair shop evolved into a parts company focused on improving sealing technology; specifically for the V-Twin engine. The business quickly grew with the development of new products and in 1979 James Gaskets was officially born. The demand for Genuine James Gaskets and seals continued to increase and before long James Gaskets was producing the most complete product line of Harley-Davidson® aftermarket gaskets and seals in the industry and was credited with providing the much needed sealing solution for the American V-Twin. In 1999 James Gaskets moved from California to its' current home in Northern Nevada, a 46,000 square foot facility with the capacity to accommodate more efficient machinery and storage of raw materials. These changes enabled production at a much higher volume, insuring product availability to meet increased customer demands. The James Gaskets® brand is legendary; known worldwide for its' superior quality. Biker's Choice® now offers their full range of gaskets, including the James Gaskets patented Rubber Covered Metal base gasket with silicone beading, their multi-layered steel head gaskets, transmission kits, primary kits, fork seal kits, oil pump kits, top-end kits and complete engine kits for Harley-Davidson® motors from 1936 to present.

COMETIC® GASKET

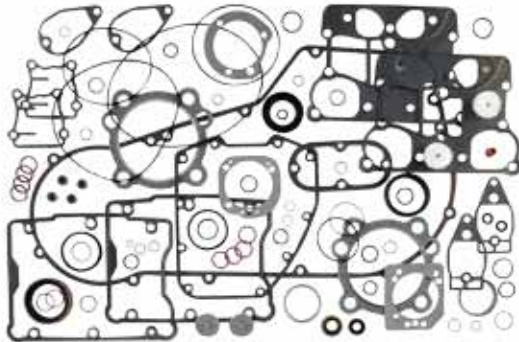

Since its inception in 1989, Cometic has been committed to producing superior quality gaskets for the high performance market. Cometic is an industry leader in manufacturing processes and is committed to the highest possible quality materials paired with knowledgeable personnel. We believe close relationships and attention to detail are the catalysts of customer satisfaction. These values remain Cometic's guiding principles to this day. Cometic's gaskets are proudly made in the USA with materials manufactured on American soil.

Cometic's line of V-Twin gaskets are sold as both kits and on an individual component basis. Gasket kits are broken down into two categories: EST (Extreme Sealing Technology) Top End and Complete Motor Kits.

Material features Include:

- MLS (Multi-Layer Steel) Head Gaskets provide better heat transfer, little to no bore distortion and will tolerate high cylinder pressure applications: Turbos, Superchargers and High compression. The outer stainless steel layers are coated on both sides with Viton (a fluoroelastomer rubber based material that is heat resistant to 250 C/ 482 F). Viton is designed to meet the demands of a variety of harsh sealing environments, load conditions, and surface finishes. The center or shim layer is uncoated stainless steel, which can be varied to accommodate multiple thickness requirements.
- AFM (Aluminum Foam Material) is the best material available for sealing engine case covers. AFM is a cross-linked, chemically blown compounded nitrile synthetic rubber, bonded to a steel or aluminum base. This material has an 85% torque retention rate that will hold torque and seal uneven and less than perfect surfaces. AFM cover gaskets will not push out, wick or weep.
- VITON seals are made from a premium blend of Viton rubber. This elastomer has the best resistance to heat, different fuels and oils.

S&S® COMPLETE ENGINE REBUILD GASKET KITS

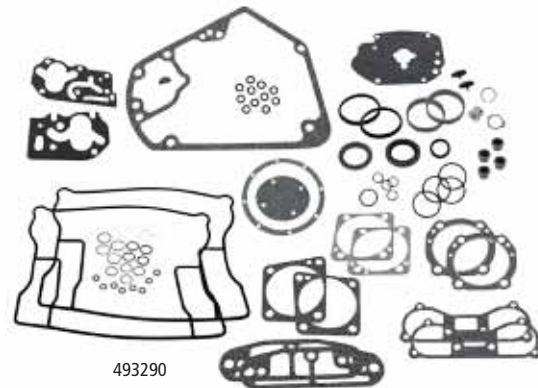

These kits make it easy to order the correct gaskets and seals to rebuild an S&S® engine or an engine with an S&S® Hot Set Up Kit® installed.

- Made in USA

Note: While many of the gaskets in these kits will work for stock applications, some gaskets in the kits are specifically designed for S&S® parts used in S&S® engines. Alternator style lower end kits include outer gaskets for both S&S® flanged and flangeless gear covers. Not all gaskets will be used. Oil pump gaskets provided in lower end gasket kits fit the standard pumps provided with S&S® engines. If the crankcase of an engine was special ordered to accept a different type of oil pump, these gaskets may not fit.

Application	Bore Size	P/N	Retail
For use with V-Series (84-99)	4-1/8 in.	493289	109.95
For use with V-Series (84-99)	4 in.	493290	119.95
For use with V-Series (84-99)	3-5/8 in.	493291	115.95
For use with SH-Series (66-84)	3-5/8 in.	493292	141.95

493290

S&S® TOP END GASKET KITS

Kits include all gaskets required to rebuild the top end of an S&S® engine with S&S® cylinders and cylinder heads.

- Rocker cover gaskets are not included, but may be ordered separately
- Made in USA
