

## DAKOTA DIGITAL MVX SIX-GAUGE KITS

With two bezel options, four background choices and seven lighting colors to choose from, the combinations are nearly endless. Personalize your gauge set by programming the pointer, backlight and LCD Message center colors independently. Whether installing a 6-gauge set, or building your perfect 2- to 8-gauge set from Dakota Digital a la carte offerings, you will get all 7-gauge readings displayed in the speedometer and tachometer LCD readouts (speed, RPM, volts, fuel, oil pressure, oil temp, and air temp), as well as miles to empty, and performance readouts (0-60 speed and time, and 1/4 mile speed and time).

- Seven lighting colors available: red, green, blue, teal, magenta, amber and white
- Four background options to choose from: black/red, black/grey, white/red and white/grey
- Chrome or black bezels available
- Add-on modules to accommodate boost, air pressure and compass (sold separately)
- Proudly designed and manufactured in the USA

## DAKOTA DIGITAL MVX-2002 SERIES FOR FAT BOB

Unit includes an analog speedometer and tachometer as well as digital readouts for speed/rpm, voltmeter, cylinder head temperature (where equipped) and clock. Indicators for turn signal, high beam, oil pressure, low fuel, security, cruise on/engaged, ABS and check engine. Includes performance readouts for 0-60 time and speed, quarter-mile time and speed, as well as high speed and rpm readout.

- One-time settable odometer
- Wiring installation is cut/splice; not a direct plug-in gauge
- Seven lighting colors for pointer, backlight and LCD message center: red, green, blue, teal, magenta, amber and white
- Fits 5 in. gauge tank mounts
- Made in USA

## NEW!

### DAKOTA DIGITAL MVX-2004 SERIES 4-1/2" PLUG AND PLAY GAUGE

The all new MVX-2004 electronic instrumentation system offers a 140 mph speedometer, tachometer with an adjustable shift point, odometer with dual resettable trip meters and a full complement of indicators to provide a complete information system. 31 individually user-selectable colors for pointer, backlight and LCD message center. Four different face options available: black with red accents, black with grey accents, white with red accents and white with grey accents. Bezel options are chrome and black. Includes performance readouts for 0-60 time and speed, quarter-mile time and speed, as well as high speed and rpm readout. Various indicators can also be displayed such as turn signal, high beam, neutral, low oil pressure, low voltage and security indicators.

- 140 MPH speedometer
- Tachometer with adjustable shift point, can also display in digital numeric readout
- Odometer with two resettable trip odometers.
- Resettable miles to service with warning (user settable countdown) and hour meter
- Clock (12 hour format)
- Voltage readout with low voltage alert
- Cylinder head temp (requires factory sender equipped on some bikes)
- Oil pressure sender sold separately, (SEN-1039)
- Oil temperature sender sold separately, (SEN-1043 or SEN-1044) eliminates cylinder head temp if used
- 7-speed gear position indicator compatible with 3- 7-speed transmissions
- ABS indicator
- Cruise on and cruise engaged indication
- Security indicator
- Automatic turn signal cancelling compatible
- Wait to start/check engine light
- Made in USA

## DAKOTA DIGITAL MCL-3000 6-GAUGE KITS FOR BAGGERS

Complete 6-gauge set plugs directly into your stock wiring. Set includes speedometer with odometer and dual trip meters, tachometer, oil pressure, oil temperature, voltage and fuel level gauges. Additional features include: service meter, clock, gear position, 0-60 time, 1/4 mile time, 1/4 mile speed, high speed and RPM recall. Includes cruise on and cruise engaged indicators as well as security, check engine, and ABS light. Extremely bright LED displays are highly visible in sunlight! Includes: oil temperature sensor and wiring and uses existing stock sensors. User selectable for metric applications as well as one-time user settable odometer.

Plugs directly into stock wiring harness. Uses your bike's stock sensors, includes oil temperature sensor. Triple chrome-plated, CNC-machined front chrome bezels, black bezel kit available. Vibrant blue or red LED displays.

- Chrome bezel
- Made in USA

## DAKOTA DIGITAL MCL-2000 SERIES FOR ROAD KINGS AND SOFTAILS

High-brightness displays for your stock dash! Fitting models with a Fat-Bob 4.5-5 in. dash opening (various Softail®, Road King®, Fat Boy®, Deuce, and Wide Glide® models), this next generation offers a wealth of upgrades and improvements! The MCL-2004 (04-13 models, except 11-13 Softail®) offers a direct plug-in installation for extremely simple installation, while the MCL-2002 models easily hard wire into the bike's existing harness allowing more flexibility for custom applications. Both models feature high-brightness LED displays for great daytime visibility.

Fully adjustable 0-255 mph/ Wraparound adjustable tachometer, can also display in digital numeric readout. Cylinder head temperature display (MCL-2004 only if factory equipped model). Oil/air pressure and oil temperature displays (sensors purchased separately, use of temperature display eliminates cylinder head temperature readout). Gear shift position indicator (4- to 7-speed transmissions). Odometer is able to be user preset upon installation to match vehicle mileage. Dual resettable trip odometers. Clock, hour meter, voltmeter with low voltage alert and countdown service meter. Indicators: high beam, left/right turn, neutral, low oil pressure, engine, security, (ABS, cruise on/engaged, low fuel on MCL-2004 and MCL-2011). Performance displays: 0-60 timer, 1/4 mile time and speed, high RPM/speed recall. Auto night dimming.

- Made in USA

## DAKOTA DIGITAL MCV-7000 SERIES UNIVERSAL INFORMATION SYSTEMS

The MCV-7000 Series is designed primarily for handlebar mounted applications. The MCV-7100, 7200 and 7400 have the flexibility to mount either above or below the handlebars. Dakota Digital offers a wide variety of mounts to suit many common applications. To allow flexibility, the MCV-7000 can accept any type of electronic speed signal coming from an existing speed sensor, or many aftermarket varieties. If a speed signal does not exist, several options exist to allow simple installation in nearly any application.

- Multifunction displays: digital clock, system voltage, performance calculations, resettable service meter, odometer/dual tripometers, oil pressure readout (when using supplied sender)
- Bar graph tachometer
- 0-199 MPH speedometer
- Turn and high beam indicators
- Fuel gauge or indicator
- Gear position indicator with neutral light
- Oil, engine and battery warning lights
- Made in USA

## DAKOTA DIGITAL MCL-5000 SERIES UNIVERSAL INFORMATION SYSTEMS

The MCL-5000 series replaces the ever popular HLY-5011. As with all MCL series gauges, these speedometers are easily visible in direct sun. Features include a 0-255 MPH/km/h adjustable speedometer with odometer and trip meter. Also included are indicators for left and right turn, high beam, neutral, low oil pressure, and check engine. Uses BKT-50xx series brackets and SEN-60xx series speed senders.

- 0-255 MPH
- Odometer with trip odometer
- Turn signals, high beam, neutral, low oil and engine indicators
- Vibrant blue LED display for tremendous daylight visibility
- Made in USA

Note: P/N 211045 (TSI-1) will be required to retain the use of stock H-D® self cancelling turn signals on some years and models.

## DAKOTA DIGITAL HLY-3000 SERIES UNIVERSAL ROUND INSTRUMENTS

The revolutionary HLY-3000 Series digital instruments incorporate the latest in microprocessor and display technology coupled with the durability of machined aluminum housings and the brilliant look of chrome bezels. Offering you everything from a single 2-1/16 in. mini-speedometer to a full complement of engine monitoring readouts in a 3-3/8 in. gauge, you can create your own look and statement.

### DAKOTA DIGITAL HLY-3011 PERFORMANCE SPEEDOMETER

Unique alpha-numeric readout is used to display odometer, dual trip odometer, service meter, high-speed recall and 0-60 times. Also includes turn signal and high beam indicators.

- 3-3/8 in. gauge
- Adjustable 0-100 MPH
- Limited two-year manufacturer's warranty
- Made in USA

P/N	Retail
211020	294.95

### DAKOTA DIGITAL HLY-3013 MINI SPEEDOMETER

Mounts in a conventional 2-1/16 in. opening. Adjustable 0-255 MPH. Contains both odometer and resettable trip odometer.

- Limited two-year manufacturer's warranty
- Made in USA

Note: P/N 211045 (TSI-1) will be required to retain the use of stock H-D® self-cancelling turn signals on some years and models.

211022	294.95

### DAKOTA DIGITAL HLY-3015 MINI COMBO SPEED/TACH

2-1/16 in. diameter and only 1 in. deep adjustable speedometer. Full complement of indicators: adjustable tachometer, MPH and blackout effect when off. External control module allows for simplified wiring. Unit contains all indicators including turn signal, high beam, neutral, low oil pressure and engine for fuel injected. Selectable screens allow the rider to display speedometer only, speedometer with odometer and trip meter, or speedometer with bar/graph tach. Menu driven setup allows easy configuration and calibration to any bike.

- Limited two-year manufacturer's warranty
- Made in USA

P/N	Retail
211038	499.95

### DAKOTA DIGITAL HLY-3016 COMBO SPEED/TACH

Fully functional speedometer, tachometer, gear position indicator, odometer, dual trip odometers and all of the necessary indicators including turn signals, high beam and several others.

- 3-3/8 in. housing
- 0-60 timer
- 1/4 mile time and speed, high speed and RPM recall
- Limited two-year manufacturer's warranty
- Made in USA

P/N	Retail
498392	314.95

### DAKOTA DIGITAL HLY-3021 PERFORMANCE TACHOMETER

Readouts display RPM along with high RPM recall, shift indicator set point and hour meter.

- 0-18,000 RPM range
- Adjustable from 1-15 cylinders
- 3-3/8 in. size fits most aftermarket mounts
- Limited two-year manufacturer's warranty
- Made in USA

P/N	Retail
211021	294.95

### DAKOTA DIGITAL HLY-3027 MINI TACH

Readouts display RPM along with 0-18,000 rpm range with 10 rpm resolution below 10,000 rpms and 100 rpm resolution above 10,000 rpms.

- High-RPM recall
- Adjustable from 1-15 cylinders
- Limited two-year manufacturer's warranty
- Made in USA

P/N	Retail
211023	294.95

### DAKOTA DIGITAL HLY-3032 OIL PRESSURE GAUGE

- Range of 0-150 psi
- Sender required
- Limited two-year manufacturer's warranty
- Made in USA

Description	Mfg/N	P/N	Retail
Gauge	HLY-3032	211024	159.95
Oil/Air Pressure Sensor 0-150 psi	SEN-1031	211009	54.95

### NEW! DAKOTA DIGITAL HLY-3061 FUEL LEVEL GAUGE

- Range is 0-99% with a resolution of 1%
- Uses stock H-D® sender
- Limited two-year manufacturer's warranty
- Made in USA

P/N	Retail
211037	159.95

## NEW!

### DAKOTA DIGITAL LCD GPS COMPASS

The new Dakota Digital MCH-GPS17 unit offers: compass, altimeter and ambient air temperature information while integrating with your stock 96-13 Harley-Davidson® Touring model O.E. gauges. The MCH-GPS17 instrument has an internal, GPS-based compass and altimeter sensor for easy installation (no external antenna required).

- Eight-position compass heading: N, NE, E, SE, S, SW, W, NW
- Ambient air temperature uses the factory ambient air temperature sender
- Altimeter
- GPS time: automatically updates the clock to the correct minute
- Eight user selectable LCD display colors: stock, red, green, blue, teal, magenta, amber, white
- Available in chrome or black bezels

Color	Mfg/N	P/N	Retail

## DAKOTA DIGITAL PGR-1000 SERIES FLUSHMOUNT GEAR INDICATORS

Flushmount gear indicator requires a 1-1/4 in. hole. Displays 1-7 forward gears including neutral, while providing simple programming for any application. Sunlight visible blue or red display automatically dims for night riding.

- Simple five-wire hook up, no extra senders required if bike has factory electronic speed sensor
- Measures only 1-1/4 in. diameter x 2-5/8 in. deep
- Includes display, harness and instructions
- Made in USA

Description	Mfg/N	P/N	Retail

Black/Blue	PGR-1000-F-K	<b>211186</b>	<b>249.95</b>

## DAKOTA DIGITAL STM-100 DATA BUS BREAK OUT

Allows you to interface universal Dakota Digital and most aftermarket speedometers and/or tachometers with the data bus signal created from the stock Harley-Davidson® ECU 04-13 excluding 11-13 Softail®, Dyna® models. Connects to the bike's data bus and outputs traditional analog signals for a gauge of your choice. Outputs provided for accessory power and ground, tachometer signal adjustable for 1-, 2- or 4-cylinder outputs, speedometer signal 8,000 rpm in addition to the check engine signal, normally only available on the data bus. In addition to wired outputs, the STM-100 contains a digital readout which allows for both reading back and clearing diagnostic trouble codes, similar to a scan tool.

## DAKOTA DIGITAL ELECTRIC SPEEDOMETER INTERFACE MODULE

Plugs into 96-06 H-D® speed sensor harnesses to correct the speedometer and odometer after a change in tire size, pulley size or transmission gearing. Unit plugs directly between the stock transmission sensor and original speedometer; no cutting or splicing required on most models. Two push button switches allow the original speedometer reading to be increased or decreased easily. Can correct speed to within 1 mph from 50% to 280% of the original reading Sealed completely from water, dust and dirt, the module is easily tucked away into the bike's wiring harness after adjustment is complete.

Note: 07-up H-D® models may require hard wiring into bike harness.

Mfg/N	P/N	Retail
SIM-1A	<b>211016</b>	<b>119.95</b>

## DAKOTA DIGITAL OIL/WATER TEMPERATURE SENSOR

- 0-400°

## MEDALLION CONSOLE GAUGE BEZELS

Easily change the appearance of any Medallion gauge to black or chrome in just a few minutes with a Medallion Bezel kit. Simply remove the original bezel and snap a new one into place. The seal of the gauge is independent of the bezel and is not compromised in the process. Pointer caps cannot be changed. Black Bezels can be painted.

- Instructions are included
- For premium console gauges

#### KOSO® GPS SPEED SIGNAL CONVERTER KIT

Some applications require different alternatives from the conventional speed sensor that is installed on the wheel. Whether it is a question of appearance (for those who do not want wires to be visible), or a question of functionality, this GPS speed signal converter offers more installation options, such as: cars, boats, snowmobiles, and many others. Its 66 satellite antenna will capture the GPS signal, and the converter will transfer it into a pulse signal that will communicate with the speedometer. A simple, yet versatile accessory that is the future of GPS speed signal converters.

## INSTRUMENT & LIGHTING

### NEW!

#### FEULING® REMOTE OIL PSI GAUGE KITS

Remote oil psi gauge/line kit allows you to check engine oil pressure using a quality liquid filled mechanical psi gauge while keeping your factory electronic gauge and or low oil pressure indicator light hooked up. Great tool for verifying actual engine oil pressure and comparing readout of factory psi gauge. Hooks up to existing oil psi ascending unit port, oil line routes up the right side frame rail, gauge fastens to the handlebars near the master cylinder.

- Fits all H-D® models

## ROLAND SANDS DESIGN® 5-3/4" HEADLIGHT

This was our original headlight design, The Vintage, prototyped over three years ago and finally making its way to production. This light is proof that with enough time and energy, producing a design you love is possible through ingenuity and technology. What started as a fully CNC-machined from billet housing made its way into a forging allowing us to produce The Vintage headlight for our customers. You will notice the design fingerprint on many of our other products ensuring this light matches the rest of the RSD product line in style and quality.

RSD Contrast Cut product starts with a finely machined polished and black anodized part which is re-machined to bring out the design highlights. Close attention is paid to machine pattern and quality to ensure the best and cleanest machine work.

- CNC-machined from billet aluminum
- Mounting hardware included
- D.O.T.-approved H-4 Bulb has twice the illumination of standard sealed beams
- High and low beam
- Bottom mount
- Easy bolt-on installation
- Made in USA

## ROLAND SANDS DESIGN® 5-3/4" HEADLIGHT BEZEL

The next best thing to a billet headlight is the RSD® headlight bezel for stock lights. The RSD® bezel is finely machined and ready to replace the cheesy stamped-steel bezel in your headlight.

- CNC-machined from billet aluminum
- Includes two piece bezel and mounting hardware
- Simple bolt-on installation
- Made in USA

## ROLAND SANDS DESIGN® CAFE GAUGE AND HEADLIGHT RELOCATOR

The Café Gauge and Headlight Relocator lowers your headlight and gauges to a more sleek position from the top handlebar clamp down to the front of the top triple clamp and lowers the stock headlight 2 in. This allows for the use of any aftermarket risers or complete elimination of risers for use of the RSD® Café 39 mm Clip-Ons.

- Eliminates stock Sportster® headlight visor/eyebrow
- LED warning/indicator light sold separately
- Designed to use stock gauge (gauge not included)
- Made in USA

## ROLAND SANDS DESIGN® SPRINGER HEADLIGHT MOUNT

Used for Springer front-end applications, this handcrafted, polished stainless steel bracket relocates your headlight to the bottom of the shock. Shine more light on the road and give your Springer a streamlined look with added adjustability.

- Mounts to stock or custom applications
- Polished stainless steel
- Wide range of adjustability
- Chrome mounting hardware included
- Made in USA

P/N	Retail
RD3272	99.95

## ROLAND SANDS DESIGN® GAUGE MOUNT ADAPTOR

Bolt-on adaptor P/N RD3316 allows RSD® Café Gauge and Headlight Relocator to be used on any Harley® Dyna or Custom with removable risers with 3-1/2" on-center mounts. For RSD Triple Trees, use P/N RD3608.

- Made in USA

Application	P/N	Retail
For Dyna or custom with removable risers with 3-1/2" on-center mounts	RD3316	37.95
For Roland Sands Top Triple Trees only	RD3608	55.95

## ROLAND SANDS DESIGN® LED INDICATOR GAUGE KIT

When utilizing the RSD® Café Gauge and Headlight Relocator, keep your LED light functionality with a LED unit that is sold separately. Optional component for RSD® Café Gauge and Headlight Relocator ONLY (not compatible with O.E.M. gauge mount). Allows all O.E.M. warning and indicator functions (outer green: turn indicators, red: oil pressure, blue: high beam, center green: neutral). Five LED lights in one arc-shaped weatherproof unit. 12 in. long wiring lead. Wire insulation color matched to O.E.M. wiring for ease of installation. Wires must be soldered and heat shrunk to O.E.M. harness for proper installation.

- Does not work with Can-Bus models
- Made in USA

Note: Does not work with Can-Bus models.

## NEW!

### CYRON™ BEAST INTEGRATED HEADLIGHTS

The 7 in. Beast LED drop-in headlight is truly a beast to contend with. 4,000 lumens of pure white light that is concentrated on nothing but the road ahead. The Beast is for the rider (driver) that wants to make sure he is not out-driving his headlight. Bright focused beam pattern will light the road much farther than any other competing headlight. Due to its narrow beam of light, for motorcycles it is best to use in conjunction with Cyron passing lamps and fog lamps. Best suited for Harley-Davidson® touring models with 4.5 in. passing lamps. Built-in Daytime Running Light (DRL) will add more visibility and style to the headlight. For vehicles without DRL wiring, they can be wired with the low beam.

- D.O.T. Compliant
- Superior color contrast in all road conditions
- Philips LED
- DIY installation
- Wide operating voltage
- Installs in minutes on most bikes
- Remains bright regardless of battery condition
- Hi/Lo dual beam
- One-year limited manufacturer's warranty

Finish	P/N	Retail
Black	<b>481233</b>	<b>199.95</b>
Chrome	<b>481240</b>	<b>199.95</b>

## NEW!

### CYRON™ URBAN INTEGRATED HEADLIGHT

The 7 in. Urban is a wide angle headlight designed for city street riding. Perfect headlight when passing/fog lamps are not being used. For vehicles not equipped with DRL wire connections and auxiliary switch can be added to manually activate DRL.

- D.O.T.-approved
- Wide beam
- Wide angle coverage eliminates the need for fog/passing lamps
- Superior color contrast in all road conditions
- Cree™ LED
- DIY Installation
- Wide operating voltage
- Remains bright regardless of battery condition
- Hi/Lo dual beam
- One-year limited manufacturer's warranty
- Consult your motorcycle manual for type of bulb and the fittings

Note: Batwing Fairing and Nacelle (May require ABIG7-RNG mounting ring).

P/N	Retail
<b>481234</b>	<b>199.95</b>

## NEW!

### CYRON™ URBAN5 LED INTEGRATED HEADLIGHT

The 5-3/4 in. headlight is an all around great performer for city and highway riding. Lots of light output for such a small compact design.

- D.O.T.-approved
- Wide beam
- Wide angle coverage eliminates the need for fog/passing lamps
- Superior color contrast in all road conditions
- Cree™ LED
- DIY installation
- Wide operating voltage
- Remains bright regardless of battery condition
- Hi/Lo dual beam
- IP67 ingress waterproof rating
- Shatterproof PC lens
- One-year limited manufacturer's warranty
- Consult your motorcycle manual for type of bulb and the fittings. Due to higher brightness of the LED bulb the headlight trim angle may need to be adjusted to avoid disturbing other drivers

P/N	Retail
<b>481236</b>	<b>199.95</b>

## NEW!

### CYRON™ LED DUAL SHOT HEADLIGHT

Get the advantages of LED light for your motorcycle headlight. Dual integrated Hi/Lo beam headlight. Fits H-D® Road Glide thru 2013 model years.

- D.O.T.-approved
- Wide beam
- Superior color contrast in all road conditions
- Cree™ LED
- Installation by local dealer recommended
- Wide operating voltage
- Remains bright regardless of battery condition
- Hi/Lo dual beam
- Consult your motorcycle manual for type of bulb and the fittings. Slight modifications to the fairing are needed during installation. Professional installation by a local Cyron dealer is recommended

## KURYAKYN®

### NEW!

#### KURYAKYN® ORBIT VISION 7 LED HEADLIGHT

D.O.T.-approved LED headlamp that provides superior visibility plus additional wow factor. Powerful high-output LEDs with integrated outer white halo ring significantly enhance the rider's nighttime field of vision and all-around visibility. Advanced LED technology offers extremely reduced current draw versus halogen, along with a color temperature rating at 6,000 K for optimum brightness. Sealed cast aluminum housing with a non-yellowing hard-coated polycarbonate lens that's scratch-resistant provides unmatched durability.

- Uses standard H4, 3-blade connector and includes all mounting hardware
- Uniform light distribution and greater temperature stability
- Durable IP67-rated aluminum housing, with UV-protected scratch-resistant polycarbonate lens
- Exceeds applicable D.O.T. and Transport Canada requirements
- 14-later Electra Glides, Road Kings, Street Glides and Trikes require the Wiring Adaptor, P/N 419709, sold separately
- Low-beam current draw: 1.5 amps
- High-beam current draw: 3.0 amps

Mfg/N	P/N	Retail

### NEW!

#### KURYAKYN® 7" ECE LED HEADLIGHTS

Increase your visibility and enhance your nighttime riding experience with these regulation-approved LED headlamps. The LED Headlamp produces light far superior to that of conventional halogen lamps with a color temperature of 5,800 K, closer to the color temperature of daylight providing better visibility. Complex reflector design provides unmatched performance while providing the appearance of a traditional headlamp. The maintenance-free lamp uses a solid-state, bulb-free system that's impervious to damage caused by shock and vibration with a military grade, die-cast aluminum housing, non-yellowing polycarbonate lens and a scratch-resistant hard coating to protect against damage from impact, roadside debris and other hazards. Specific right and left drive applications.

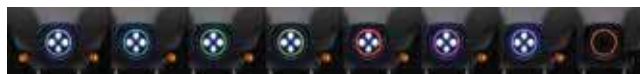

- Advanced LED technology has significantly reduced LED headlamp current draw compared to halogen products, 3.6-Amps high beam and 1.8-Amps low beam, allowing more power for other vehicle requirements and extending charging system life
- Uses standard, H4, 3-blade wiring connector with separate power and ground for position light
- Meets applicable ECE requirements
- Three-year manufacturer's warranty on headlamp
- Made in USA

### ADJURE HI-LOW PROJECTOR HEADLAMP

Adjure has taken their most popular 5-3/4 in. bucket, the Sunset Boulevard, and matched it with an LED high/low beam lamp. The projector LED lamps keep a nice clear, sharp and distinct light pattern. The projector technology moves all the light forward creating better visibility for the rider.

- The light color/temperature is 5000-Kelvin; considered super-white
- 12-Watt/900-Lumens, low-beam
- 24W/1800-Lumens, high-beam
- This lamp will offer superior visibility to oncoming traffic

39mm & 41mm	Side	5013	498131	299.99

### KURYAKYN® BULLET LIGHT FRONT TURN SIGNAL CONVERSION

It's incredible how much this simple front turn signal swap will streamline the front of your bike. By simply replacing the stock flat turn signals with these sleek bullet bodies, the front end will appear lighter and more proportionate. Mounting is the same as stock for ultra clean installation. Perfect match to Kuryakyn® Rear Bullet Light Turn Signal Bar (P/N 496915) for a great look front to back.

- Kit includes smoke lenses with amber incandescent bulbs
- Universal applications for mounting with 5/17 or 3/8 in. mounting bolt (5/16 in. mounts with P-Clamps or two-piece fork mounts)
- Sold in pairs

### KURYAKYN® HALOGEN SILVER BULLETS

Halogen Silver Bullets™ has a single power wire and ground through their mount. Cannot be used for run-brake applications because they do not change intensity; they go from steady-on to on-off flash. When installing halogen Silver Bullets™ as driving lights, the manufacturer recommends using wiring and relay kit (Mfg/N 2328) to avoid overloading the motorcycles running light circuit. Manufacturer recommends using them as auxiliary driving lights to help riders see and be seen.

- Assembled with high-stock, heavy-duty single filament 20-Watt quartz halogen bulb
- Includes clear lenses only
- Sold in pairs

Note: There is no need to use a Load Equalizer with halogen Silver Bullet™ Kit; although Silver Bullet™ lights are extremely bright and highly visible, the installation of this product may be in violation of FMVSS #108 not intended as a replacement for stock turn signals.

Type	Mounting Bolt	Mfg/N	P/N	Retail
Small Halogen	3/8"-16 Hollow Bolt	2305	<b>497295</b>	<b>99.99</b>
Small Halogen	5/8"-18 Hollow Bolt	2303	<b>494855</b>	<b>99.99</b>

### KURYAKYN® SUPER BRIGHT LED SILVER BULLETS

These single function LED reflector style Silver Bullets™ have a single power wire and ground through their mount. Dual function LED reflector style Silver Bullets™ have three wires; run, flash and ground. Cannot be used for run-brake applications because they do not change intensity; they go from steady-on to on-off flash.

- Run/turn dual function
- Super-bright LED deep dish reflector bulb
- Includes clear lenses only
- Sold in pairs

Description	Mounting Bolt	Mfg/N	P/N	Retail

### KURYAKYN® FRONT FORK MOUNT KIT FOR SILVER BULLETS

Allows you to install Silver Bullets as auxiliary lighting on front forks.

- Fits H-D® models with 39 mm Narrow Glide, 41 mm Wide Glide® (unshrouded) and Dyna® models with 49 mm forks

Mfg/N	P/N	Retail
2390	<b>412209</b>	<b>32.99</b>

### KURYAKYN® SUPER BRIGHT LED REFLECTOR BULBS FOR SILVER BULLETS

Ideal way to convert halogen style Silver Bullets™ or similar lights to LED.

- Low draw and low heat
- Small halogen
- Sold individually

Note: Because of the very low amperage drawn on these LEDs, a load equalizer is required.

#### ARLEN NESS DEEP-CUT, FACTORY-STYLE TURN SIGNALS WITH LED FIRE RING LENS KIT

Definitely the finest factory-style turn signal on the market. Deep cut-styled billet housings in chrome or black anodized. Super-bright Fire Ring LED lens kit adds the finishing touch.

- Sold individually

Note: For O.E.M. functionality, all front applications require dual filament kits and rear applications require single filament kits except 07-14 XL1200N and 09-14 XL883N models which require dual filament kits. A load equalizer will need to be purchased separately for your year and application.

41 mm	498498	109.95

## ADJURE SWINGARM AND FRAME TUBE MOUNTS

Beacon one and two light mount fits directly to the swingarm tube or any frame tube. Eliminates the need to drill mounting holes in fenders or fender struts. Comes complete with neoprene bushing to ensure a good fit without damaging the finish on your swingarm. The wires exit the assembly from the bottom enabling an extremely clean installation.

- Fits 1, 1-1/8 and 1-1/4 in. diameter tubes
- Sold in pairs

P/N	Retail
498495	129.95

## ADJURE SIDE PLATE MOUNTS

This ingenious mount uses the passenger peg mount to keep your Beacon one and two light low but visible. This design allows a full 180° positioning of your light. Precision manufactured, hand polished and chrome-plated to a mirror finish.

- Sold in pairs

## LAZER STAR® TURN SIGNALS

All halogen lights come standard with single-filament 20-Watt flood bulb. All LED lights are three-wire, dual-circuitry with a three-year replacement manufacturer's warranty.

Rigid Mount: 5/16" -24 x 1-1/2" stainless steel hollow bolt and 5/16 in. chrome spacer, best used when mounting to a flat location with rear access for wire exit and tightening.

Diamond Base: Chromed billet base mates with stock light bars on H-D® FL series motorcycles.

Bases also sold separately to use with any 5/16-24 threaded light.

- Housings are CNC-machined from solid 6061 billet aluminum
- Clear Pyrex® glass on LED or colored Pyrex® on halogen
- Stainless steel mounting hardware
- High-quality chrome, polished or black hard-anodized finish
- High-temp Teflon® coated aircraft-quality wire
- Bullet: 2-1/4" dia. x 3-1/2" long
- XS: 1-3/16" dia. x 1-7/8" long
- Micro B: 1-9/16" dia. x 2-7/16" long
- Sold in pairs

## AUTOGEM LED POWER JEWEL LIGHTS

The LED Power Jewel is an option for all Auto-Gem lights. Made of real glass lenses with stainless steel bezels, Power Jewels work on any 12-Volt system and are an easy retro fit in existing Tail Gunner, Derringer and Baby Bullet Lights. Use them in place of existing incandescent bulbs for a unique look. They also fit in the end of handle bars using the special 7/8 in. rubber expansion plug. Amber LEDs have a dual function as a running light and a super bright for your signal flash.

## KOSO® INFINITY LED INDICATOR LIGHTS

Koso's Infinity LED indicator lights are available in two models. The DUAL function is a brake light and indicator light. It is used for the rear end; the other is a single indicator light function for the front end. They are built with two ultra-bright LEDs, one is red as the brake light and the other is amber as the indicator light. Having a Hi-powered LED brake light built into the indicator light will increase the visibility of the motorcycle and make it easier to see for other drivers. The Infinity dual Hi-powered LEDs are not only a matter of look... but also a matter of safety.

### KURYAKYN® LICENSE PLATE TURN SIGNAL RELOCATOR

Now you can mount a set of saddlebags or just streamline your rear fender and keep your stock turn signals. These kits allow you to relocate your stock signals from the fender to the license plate area or provide a convenient place to mount auxiliary custom lights. This simple system mounts directly to the back of your license plate with support backing plate and two side mount brackets. Has a 3/8 in. hole and wire passage slot to accept most O.E.M. rear turn signals or Kuryakyn Mfg/N 5032 Bullet Turn Signals.

## KURYAKYN®

### KURYAKYN® BULLET LIGHT REAR TURN SIGNAL BAR

Replace your large, stock rear turn signals with these streamlined, bullet shaped turn signals and relocate your license plate below the taillight.

- Built-in light illuminates license plate
- Turn signals are single circuited and come equipped with stylish deep dish bezels with red lenses
- A flat license plate support is included

### KURYAKYN® FAIRING MOUNTED DRIVING LIGHTS WITH TURN SIGNALS

- Now Road Glide owners can enjoy the darkness-melting power and sleek styling of Kuryakyn® Driving Lights. This kit's unique bracket configuration allows placement of these compact lights in the same location as the stock turn signals and also permits full adjustment. Besides being tucked in neatly right next to the fairing, even the wiring is neatly concealed, just plug and play!

## KURYAKYN® SKELETON HAND TURN SIGNALS

The ominous Skeleton Hand Turn Signals are ECE approved and deliver a chilling combination of style and function. Each coffin-shaped housing contains 18 individual single-function amber LEDs for maximum light output in a compact package. Single-function amber LED turn signal indicators. Choose from three different finish options and create the perfect sinister complement to the Kuryakyn Skeleton Hand Mirrors.

- ECE-Approved
- Housings are made from quality die-cast aluminum
- Mounts with M8-1.25 x 20 mm mounting stud
- 113.5 mm long x 35 mm wide

### KURYAKYN® TORPEDO LIGHTS

With their torpedo shape these ECE-approved lights combine both style and function in one. Single-function amber versions are designed to serve as turn signal indicators up front. Multi-function versions are designed for rear use only and feature three independent red and amber circuits that allow the units to serve as Run-Turn-Brake lights.

- All versions measure 70 mm long x 45 mm in diameter (2.75" x 1.75"), have clear lenses and utilize M10-1.5 mm x 25 mm mounting studs to allow for easy mounting

# KURYAKYN

## KURYAKYN® LATE-STYLE TURN SIGNAL KIT

This kit makes it a snap to update the ho-hum classic bullets on your bike. Set of four streamlined lights come with Kuryakyn® Deep Dish Bezels, smoke lenses and colored incandescent bulbs.

- Each light measures approximately 2 in. diameter x 3-1/2 in. long

XL	91-08	2317	<b>412196</b>	<b>169.99</b>

## KURYAKYN® UNIVERSAL RED SINGLE CIRCUIT TURN SIGNALS

Replace those clunky stock turn signals on the back of your bike with these perfectly sized 2-1/4 in. bullets. 1 in. long universal mount keeps these lights tucked close to your bike for a smooth clean look. Use the large or small rubber mount adaptor (whichever one best suits your application) and bolt them right on.

- Sold in pairs

## KURYAKYN® DEEP DISH BEZELS WITH LENSES FOR BULLET TURN SIGNALS

If you're using H-D's® accessory headlamp trim rings, our Deep Dish Turn Signal Bezels with Lenses will complete the package by providing a sleeker and racier appearance than the stock lens alone. Bezels and lenses snap into place and still retain the stock bulbs and housings.

- A tool-free installation, bezels and lenses snap into place
- Fits 00-15 H-D® models with bullet turn signals
- Sold in pairs
- Colored bulbs for smoke lenses must be purchased separately

## ARLEN NESS

### ARLEN NESS LED "FIRE-RING" KITS FOR FACTORY TURN SIGNAL HOUSINGS

The finest upgrade you can make to your factory turn signals; available in dual-filament or single-filament applications. Dual-function LED design features a billet aluminum ring with seven exposed LEDs (white, amber or red) integrated into the lens to work as running lights and a cluster of LEDs behind the lens for turn signal or brake light function; these fit all front and rear applications with a light socket for an 1157 type bulb. Single filament design features the seven exposed LEDs in the billet ring and the cluster behind the lens that work together as one and are for rear turn signal applications with a light socket for an 1156 type bulb. Fire Rings with white LED running lights improve style and safety by having other drivers better see you on the road.

- Simple plug-and-play installation
- Sold in pairs

Note: For O.E.M. functionality, all front applications require dual filament kits and rear applications require single filament kits (exc. for 09-13 XL883N, 07-13 XL1200N/X and newer FLT models with dual turn signals and no center taillight which require dual filament kits in the rear). A load equalizer will need to be purchased separately.

### SIGNAL DYNAMICS LED RETRO FIT KIT FOR HARLEY-DAVIDSON

Convert your Harley-Davidson® turn signal bullet lights from incandescent bulbs to sleek LED lights. Can be used to convert your rear bullet lights to have additional running light function. These LEDs can last up to 100x longer than incandescent bulbs. Draws 10x less amperage and turn on significantly faster than standard factory bulbs. Solid state so there is no filament to burn out or be damaged by vibration. Includes: two clear bullet lenses, two LED light boards, two inner discs, six male and female connectors, two jumper wires and a dual load equalizer to regulate the load for your turn signals.

- Fits most 2000 and later Harley-Davidson® models (except VRSC, XL883N, XL1200N, XL1200X and FXS) equipped with bullet turn signal lights

## Radiantz LED Lighting

### RADIANTZ RETROZ LED TURN SIGNAL INSERTS

A pair of 48 LED turn signal retros for the stock Harley® bullet-style housing. With the base on the wires the install is as easy as removing your existing bulb and plugging in the new LED light. Choose a 1157 (dual function) or 1156 (single function). Since LEDs do not take as much power to run as a regular bulb a load equalizer may be required when using LEDs.

## KOSO NORTH AMERICA

### NEW!

#### KOSO® LED FLASHER RELAY

Changing your indicator lights for LED ones? Once you replace your regular bulbs with LED indicators, the resistance is very small compared to the original flashers. Therefore, the bike can't identify whether the flashers are installed or not so they will not flash normally. Avoid this problem by using this simple flasher relay. Install only one Koso® relay for all four LED indicator lights compared to the other brands on the market which require one per indicator light.

P/N	Retail
<b>482355</b>	<b>19.95</b>

### STANDARD® HEADLIGHT RELAY

Three-prong headlight relay with low-profile connector.

- Fits H4 bulbs
- 3 x 14 gauge wires
- 8-1/4" lead length
- Five pack
- Sold in storage box

P/N	Retail
<b>210222</b>	<b>9.68</b>

## NEW!

### RIVERA PRIMO ELECTRONIC FLASHER

Especially suited for operating Rivera Primo Phase 2 HedLED Headlamps.

- For 12V applications
- LED compatible
- 3 terminals (31, 49, 49a)
- Runs 1 to 4 lamps
- 162W/13.5A max

P/N	Retail
<b>060160</b>	<b>16.50</b>

## NEW!

### CYCLE PRO FLASHER UNIT

<b>074047</b>	<b>50.95</b>

## NEW!

### THUNDER HEART CENTER BRAKE MODULE

Want to install a center brake light on your custom bike? Thunder Heart has you covered with this Center Brake Light Module. Incorporates turn signals, running lights and brake lights into two rear bulbs. Simplifies the rear lighting popular with today's custom bike builders. Allows the addition of such lights when using the Micro Harness Controller.

- Compatible with both LED and incandescent bulbs
- Solid-state construction is fully circuit-protected and has no relays to wear out
- Compact 2" x 0.6" x 0.5" size means you can hide it just about anywhere
- Simple four-wire hookup and included wiring diagram make installation a breeze
- Made In USA

P/N	Retail
<b>495290</b>	<b>44.50</b>

### BADLANDS LOAD EQUALIZER

Designed to return amperage draw to the correct factory specification when using custom signal lights.

- May be used instead of variable load flasher on earlier model years
- Fits 91-Up H-D® with self-cancelling signals
- Made in USA

P/N	Retail
<b>499200</b>	<b>26.95</b>

### BADLANDS LOAD EQUALIZER II

Performs exactly the same function as the Load Equalizer I with the added feature of allowing you to retain emergency flasher capability.

- This unit has a built-in thermistor, which retains the resistor's heat while your bike is functioning in emergency flasher mode
- Made in USA

P/N	Retail
<b>499211</b>	<b>34.95</b>

### BADLANDS LOAD EQUALIZER III FOR V-TWINS

For Harley-Davidsons® with the TSSM Security/Alarm Module or TSM Turn Signal Module.

- Intended for 1991 and up standard turn signal modules
- Will run emergency flashers for any amount of time
- Designed for parade use
- Solid state construction that is waterproof and produces no heat
- Works on any Harley-Davidson® with self-cancellers
- Made in USA

## BADLANDS INTENSIFIER HI-LOW MODULES

- Converts single function LEDs, halogen or incandescent bulbs to high and low dual functions
- Run and stop, run and turn or high and low
- Works for taillights, signals, marker lights, rear fender tip, neon accent lighting or (two) 25 watt driving lights
- Runs up to 50 watts in total without heat issues
- Made in USA

Description	P/N	Retail
Intensifier Hi-Low Module (1 input, 1 output)	497675	44.95
Dual Intensifier Hi-Low Module (2 inputs, 2 outputs)	497679	67.95
LED Intensifier Hi-Low Module (1 input, 1 output)	482065	19.95

## BADLANDS ILLUMINATOR PRO III

Built-in automatic canceler and built-in load equalizer.

- Front run and turn signal for single-filament bulbs, halogen bulbs and LEDs
- Rear run, brake and turn signal functions like the Illuminator module
- Emergency flashers without heating up
- Cancels at any time for quick lane changes
- Made in USA

P/N	Retail
499224	118.95

## NEW!

## BADLANDS ILLUMINATOR PLUG-IN STYLE HARNESS

Harness for 10-13 FLTR, FLHX models using Illuminator Plug-in Style (P/N 482062).

P/N	Retail
482063	22.00

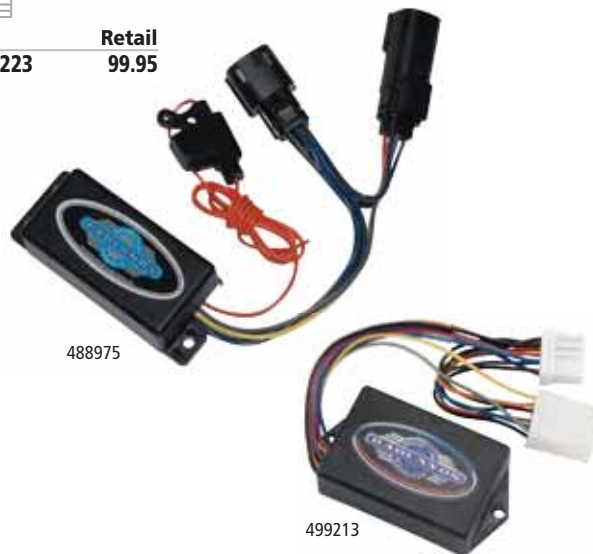

## BADLANDS ILLUMINATOR

3-in-1, turn stock or custom turn signals into running lights, brake light and maintain turn signal function.

- Turns running lights into brake lights
- Built-in load equalizer
- Runs stock O.E.M. turn signals
- Runs even the smallest turn signals
- Capable of running two rear turn signals
- Fits 91-Up H-D® models
- Made in USA

P/N	Retail
499223	99.95

## BADLANDS ILLUMINATOR PLUG-IN STYLE

3-in-1, turn stock or custom turn signals into running lights, brake light and maintain turn signal function.

- Increases visibility from the rear of the motorcycle

### Features:

- Designed for security system Harley-Davidson® as well as earlier-style signal modules
- Built-in load equalizer
- Works with stock O.E.M. turn signals
- Runs with the smallest turn signals, even LEDs
- Works on single-filament bulbs, including Halogens
- Runs multiple marker lights or turn signal
- Comes with easy to follow diagram and instructions
- Made in USA

## BADLANDS AUTOMATIC TURN SIGNAL CANCELLING MODULE: PLUG-IN STYLE

11-second time flashing that automatically cancels and can cancel manually at any time (quick lane change.)

- Available in three different plug-in styles
- Simply plug-in and replace O.E.M. canceler
- Features:
- Built-in emergency flasher mode
- Built-in load equalizer run LEDs up to 100-Watts per side
- Made in USA
- Measures 2-7/8" L x 1-3/8" W x 7/8" D

Description	Application	P/N	Retail
10-pin	For use with 87-93 H-D® Models	499205	83.95
8-pin Deutsch Style	For use with 94-Up H-D® Models	499207	94.95
12-pin Deutsch Style	For use with 94-Up H-D® Models	499209	94.95
8-pin Female	For use with 94-99 H-D® Models	488976	94.95

## BADLANDS PLUG-AND-PLAY LOAD EQUALIZERS

Intended to be used with non-compliant LED's that cause turn signal indicators to rapid flash. Get all of the features of the "original" Load Equalizer and keep your emergency flasher capability.

- Returns amperage draw to the factory range preventing codes
- For all CAN/BUS models, 2011-Up Softail®, 2012-Up Dyna® and ALL 14-up models
- Unlike earlier models, CAN/BUS bikes require a Load Equalizer for front and another for the rear
- Made in USA

HARLEY-DAVIDSON	Year	P/N	Retail
FLH, FLT	14-16	488989	79.95

## NEW!

## BADLANDS RUN-BRAKE-TURN ILLUMINATOR

Compatible with TSM/TSSM modules and security systems. Turns stock or custom turn signals into running lights and brake lights and still maintain turn signal function. Increases visibility of the motorcycle from the rear. Built-in load equalizer works with stock signals and can run the smallest custom signals, even LEDs. Comes with easy-to-follow instructions and features plug-in connectors for hassle-free installation on select models.

- Works with incandescent, halogen and 12-Volt LED signals and marker
- Made in USA

HARLEY-DAVIDSON	Year	P/N	Retail
FLH	14-16	488982	99.95
FXST, FLST	11-16	488982	99.95
FXD	12-16	488982	99.95

## BADLANDS BRAKE LIGHT ELIMINATOR

This new module is 100% plug-and-play and enables customers to have left and right only turn signals, running and brake lights along with license plate illumination and a ground wire.

- The Street Glide and Ultra send brake light functionality on the same wire that provides turn signal flashing to the rear turn signals
- Using our IHL-04, you can now run amber turn signals since this module separates the brake functionality from the rear turn signal output
- These modules also have a built-in Load Equalizer, which will allow any style of light, LED, halogen or incandescent to operate without any CAN/Bus interference or trouble codes
- Made in USA

HARLEY-DAVIDSON	Year	P/N	Retail
FLHX, FLHTCU	14-16	488977	129.95

## KURYAKYN® PULSATING BRAKE CONTROLLER FOR V-TWIN

Totally plug-and-play, with our controller your brake lights automatically pulsate then remain brightly lit every time you apply the brakes.

- Design also allows easy connection of load equalizers if upgrading turn signals to LED

Note: Provides three seconds of decelerating flashing brake lights.

## KURYAKYN® REAR RUN-TURN-BRAKE CONTROLLER WITH PULSE BRAKE

This module makes single-filament or single-circuit turn signals on the rear of the bike function as running lights, turn signals and brake lights; not just brake/turn. Can be used with stock turn signals or any single-filament light you may already have installed on the rear of your bike. Completely plug-in for most 96-newer Harley-Davidson® models with single filament turn signals and a taillight with running and brake functions.

- Compatible with 02-later H-D® factory cruise control
- Pulsing Brake feature can be turned on or off easily
- Not compatible with aftermarket or accessory modules that alter the functions of the stock taillight and turn signals or any modifications to taillights and turn signals. Bikes equipped with factory security system and low-draw or LED lights also require P/N 419068, sold separately.

## KURYAKYN

### KURYAKYN® 2 AMP LOAD EQUALIZER

Universal load equalizer for use when stock turn signals are replaced with LED or other low-draw lights.

- One required for each pair of lights

Mfg/N	P/N	Retail
4810	419065	18.99

### KURYAKYN® SELF-REGULATING LOAD EQUALIZER

Compatible with all H-D® factory security systems, this technologically advanced load equalizer won't overheat, even when subjected to four-way flashers, non-stop security system flashing while trailering or when stuck at never-ending red traffic lights.

- Plug-and-play when used with Kuryakyn Panacea Taillight, Run-Turn-Brake Controller, or Load Equalizer Adaptors; can also be spliced in custom applications
- Fits 90-13 H-D® models (except 11-13 Softail® and 12-13 Dyna® Models)

**GEAR BRAKE**  
ADD INTELLIGENCE TO YOUR BRAKE LIGHTS

### GEARBRAKE VECTOR LASER BRAKE LIGHT

This rear mounted laser can be used as a brake light or running light. Easily mounted at the license plate or under the fender, it can provide an extra brake light indication while keeping the rear of your bike free of clutter. The Vector Laser™ projects a red line on the ground behind your motorcycle catching the attention of following drivers.

## GEARBRAKE BRAKE LIGHT MODULES

Automatically detects when you are slowing: we've made critical advancements in our technology that automatically detects slowing without the need for physical actuation of a brake. Provides a rear flashing alert upon slowing; GearBrake reacts with a two second pulsing alert, then solidly illuminates the brake light until you release the brake; the added time enables drivers behind you to know that you are slowing and gives you additional peace of mind, especially in heavy traffic.

- Made in USA

## Radiantz LED Lighting

### RADIANTZ BRAKE LIGHT MODULE

Designed for LED and incandescent brake lights. When you apply your brakes, it causes your brake light to automatically emit a visual alerting signal.

Four different modes of operation:

- Three flashes then constant
- Three flashes then constant, repeats
- Three strobes then constant
- Three strobes then constant, repeats
- LEDs can turn-on and off faster than stock bulbs
- In the strobe mode, this module can turn LED brake light on and off approximately 10 times per second

P/N	Retail
211337	43.95

### SIGNAL DYNAMICS TRI-STAR CONTROL MODULE

Converts your rear turn signal lights to function as additional brake lights. Solid-state electrical components with weatherproof, soft-cell technology to prevent wire damage. When the brakes are applied, the turn signal lights illuminate giving you more rear visibility when you are stopped. If a turn signal is applied, it has priority over the brake light function on the side that is selected; if the turn signal is cancelled and the brakes are still applied, the brake light functions of the turn signal lights illuminate steady on. The included dual-load equalizer is designed to fix the problem when you have changed your stock turn signals to LEDs and they flash quickly or not at all.

P/N	Retail
480999	59.95

### SIGNAL DYNAMICS TRI-STAR XP CONTROL MODULE

Converts your rear turn signal lights to function as additional brake lights. The included dual-load equalizer is designed to fix the problem when you have changed your stock turn signals to LEDs and they flash quickly or not at all. Sends partial intensity power to your turn signals to act as additional running lights. When the brakes are applied, the turn signal lights illuminate giving your more rear visibility when you are stopped. If a turn signal is applied, it has priority over the brake light function on the side that is selected if the turn signal is cancelled and the brakes are still applied, the brake light functions of the turn signal lights illuminate steady on.

- Solid-state electrical components with weatherproof, soft-cell technology to prevent wire damage

P/N	Retail
480996	64.95

## SDC Signal Dynamics Corporation

### SIGNAL DYNAMICS PENTA STAR CONTROL MODULE

This module combines all of the functions of the self-cancelling turn signal module and our tri-star module converting your rear turn signals to function as additional brake lights.

- Engineered for the custom builder or to retro-fit motorcycles not already equipped with self-cancelling turn signals
- Designed for use with individual momentary type turn signal switches mounted on the left and right handlebars; will not work on models with left and right turn signal switch built into one unit that requires push to cancel
- Three turn signal timing modes: 7 second, 20 second and 75 second duration
- Hazard mode
- Adds brake light function to turn signals
- Flash time is consistent whether using incandescent or LED lighting; non-load dependent
- All flash modes can be cancelled with a second push of the turn signal button
- Solid-state electrical components with weatherproof, soft-cell technology to prevent wire damage

P/N	Retail
480998	99.95

### SIGNAL DYNAMICS DUAL LOAD EQUALIZER

Designed to fix the problem when you have changed your stock turn signals to LEDs and they flash quickly or not at all.

- Adds load/amperage back into your turn signal system to stabilize the flash pattern
- Meant for one pair of lights; if you have more than one pair, an additional dual load equalizer may be necessary
- Solid-state electrical components with weatherproof, soft-cell technology to prevent wire damage

P/N	Retail
480997	19.95

### SIGNAL DYNAMICS HEADS-UP VOLTAGE MONITOR

This module has a microprocessor that monitors the output of the system you choose with a simple two wire installation. Single multicolor LED visual indicator (red/green/amber). Know whether your voltage is normal or abnormal; you will be notified of serious fault conditions by an attention-getting flash of the LED. Auto-dimming LED reduces nighttime glare while riding. Mounts virtually anywhere with included double-sided tape.

- Voltage Range: six to seventeen VDC; accuracy within 200 millivolts

P/N	Retail

## SIGNAL DYNAMICS PENTA STAR XP CONTROL MODULE

Combines all of the functions of the self-cancelling turn signal module and our tri-star module converting your rear turn signals to function as additional brake lights.

- Sends partial intensity power to your turn signals to act as additional running lights
- When the brakes are applied, the turn signal lights illuminate; if a turn signal is applied, it has priority over the brake light function on the side that is selected; if the turn signal is cancelled and the brakes are still applied, the brake light functions of the turn signal lights illuminate steady on
- Engineered for the custom builder or to retro-fit motorcycles not already equipped with self-cancelling turn signals
- Designed for use with individual momentary type turn signal switches mounted on the left and right handlebars; will not work on models with left and right turn signal switch built into one unit that requires push to cancel
- Three turn signal timing modes: 7 second, 20 second and 75 second duration
- Hazard mode
- Adds brake light function to turn signals
- Flash time is consistent whether using incandescent or LED lighting; non load dependent
- All flash modes can be cancelled with a second push of the turn signal button
- Solid-state electrical components with weatherproof, soft-cell technology to prevent wire damage

P/N	Retail
480995	109.95

## SIGNAL DYNAMICS BACKOFF WIG WAG

Compact solid-state electronic module converts brake lights into two choices of visual alerting signals.

- Mode one emits four quick, alternating flashes of left and right brake light followed by three short flashes and one long flash of both brake lights; pattern of three short flashes and one long flash of both lights repeats as long as brakes are applied
- Mode two emits four quick, alternating flashes of the left and right brake lights followed by three short flashes of both brake lights and then a steady on; brake lights remain on until brakes are released
- Designed for motorcycles equipped with two brake lights located side-by-side
- Specifications: 12-Volt DC, max. capacity 10-Amp, sealed weather-resistant heat sink case, 2-1/4" L x 5/8" H x 1-5/8" W

P/N	Retail
481003	42.95

## SIGNAL DYNAMICS SELF-CANCELLING TURN SIGNAL MODULE

Perfect for custom builds or retrofitting models without self-cancelling turn signals. Features three turn signal timing modes: a one-second press of the turn signal button causes seven seconds of turn signal flash before self-cancel, a two-second press causes 20 seconds of flash before self-cancel and a four-second press causes 75 seconds of flash before self-cancel. All flash modes can be cancelled with a second push of the turn signal button flash time is consistent whether using incandescent or LED lighting. Simultaneous depression of right and left turn signal buttons for one second begins hazard mode; flash continues until manually cancelled. Solid-state electrical components with weatherproof technology to prevent wire damage. Designed for use with individual momentary-type turn signal switches mounted on left and right bars; will not work on models with left and right turn signal switch built into one unit that requires push to cancel.

P/N	Retail
480992	74.95

## SIGNAL DYNAMICS BACKOFF BRAKE HOLD MODULE

Continues to hold brake lights on while bike is stopped or stopping, which increases rear-end visibility; choice of two patented BackOff™ flash patterns all while keeping your hands and feet free.

- Easy installation; wire the brake hold module in-line with the wire leading to the brake light; connect to a switched power source and ground; tap into your electronic speed sensor and choose from Mode 1 or Mode 2 flash patterns
- Mode 1: three short flashes followed by one long flash repeating as long as you are stopped
- Mode 2: five quick flashes followed by a steady on brake as long as you are stopped
- Compact size and weather-resistant
- 12-Volt DC – Max Cap. 10-Amps
- One-year manufacturer's warranty

P/N	Retail
482000	64.95

**SIGNAL DYNAMICS**
**BACKOFF XP/BRAKE LIGHT SIGNAL MODULE**

Compact, solid-state electronic module converts brake lights into two choices of visual alerting signals when brakes are applied.

- Mode one emits three short flashes followed by one long flash (3.5 seconds); repeats as long as brakes are applied
- Mode two emits five short flashes followed by a steady on light; light remains on until brakes are released
- Specifications: 12-Volt DC, max. capacity 10-Amp, sealed weather-resistant heat sink case, 2-1/4" L x 5/8" H x 1-5/8" W

P/N	Retail
481001	42.95

**SIGNAL DYNAMICS**
**BACKOFF BRAKE LIGHT SIGNAL MODULE**

This compact, solid-state electronic module converts your ordinary brake light into an attention-getting, visual-alerting device.

- Module causes three short flashes, stays on for 3-1/2 seconds, then repeats the cycle for as long as the brakes are applied
- Please note: may not work on bikes that use LED lighting
- Specifications: 12-Volt DC, max. capacity 10-Amp, sealed weather-resistant heat sink case, 2-1/4" L x 5/8" H x 1-5/8" W

**SIGNAL DYNAMICS PLUG-AND-PLAY HEADLIGHT MODULE**

This module and appropriate adaptor harness flashes headlight(s) during the day making motorcycles more visible to oncoming traffic and to help prevent vehicles from turning left in front of the rider.

- Now there is no need to cut or splice wires in order to install a headlight module on your bike
- With the Plug-and-Play Headlight Module, simply select which harness is needed for your bike, then plug it all together

Note: Harness sold separately. Please consult your owner's manual or local dealer to find the correct harness for your motorcycle.

### KURYAKYN® PANACEA LED TAILLIGHTS

- Shed your old lighting technology, step into the 21st century and be seen
- Features LED technology resulting in a brighter light that is unaffected by the vibrations produced on the average motorcycle
- Draws fewer amps than your stock taillight allowing more power for other vehicle requirements and extending alternator life
- In addition, The Panacea taillight can be set to pulse the brake lights several times before steady bright illumination when the brake is applied and has integrated turn signals that flash amber within the taillight housing

## NEW! EXCLUSIVE

### XK GLOW® CHROME APP CONTROLLED 16 MILLION COLOR LIGHT KITS

New light pod design for improved water and dust resistance. Born from the combination of the most loved 7 color strips and pods, this kit is the best choice for riders who pursue the ultimate light coverage with no compromise. In addition to these compact yet ultra-bright lights that enhance your bike's appearance from all angles, this all-included kit is entirely plug-n-play, reducing installation time to a minimum.

The strips and pods use the same number of LEDs and have the same brightness. The strips have a slightly broader light coverage for larger areas such as: under tank, saddlebags and ground effects. The pods light output is slightly more condensed, but the pods can be hidden in tight places such as: behind the air cleaner, on brake calipers, air intake ports and grills.

The 3M tape ensures the lights can endure the most challenging of riding environments. The kit is expandable to max 50 pods/strips and are 100% compatible with XK Glow Carbon N-Series Smartphone Kits

- 7 solid color display, transitions through 2 million color variants 4-key wireless control (on/off; color change; speed; strobe; breath effect)
- All installation accessories included and simple plug-n-play wiring
- Second generation controller with improved range

## STREETFX™ LIGHT STRANDS

Peel-and-stick application and works with all 12-volt vehicles.

- 12 in. light strand with 15 ultra-bright, low-profile LEDs, bends and conforms to any shape
- Weather- and shock-resistant
- Wires directly into battery or StreetFX Power Distribution Module P/N 480402
- One strip per package

Description	P/N	Retail
Green	480362	14.99

## STREETFX™ BOLT-FX ACCENT LIGHTING

Flexible plastic strips make it easy to light any area of your bike and is weather- and shock-resistant.

- 9-1/2" in length with 24 ultra-bright, low-profile LED lights
- Easy mounting and works with all 12-Volt vehicles
- Wires directly into battery or StreetFX Power Distribution Module P/N 480402
- One strip per package

Description	P/N	Retail
White	480807	21.99
Blue	480808	21.99
Red	480809	21.99

## STREETFX™ ELECTROPODS STEP LIGHTS

Three ultra-bright, low-profile LEDs per step light. Compact design allows you to put extra light wherever you need it.

- Package includes: step lights, power cable, foam-mounting tape and installation instructions
- Weather- and shock-resistant
- Easy mounting and works with all 12-Volt vehicles
- Wires directly into battery or StreetFX Power Distribution Module P/N 480402
- Three colors available in either black or chrome casing

Description	P/N	Retail
White/Black	480810	16.99

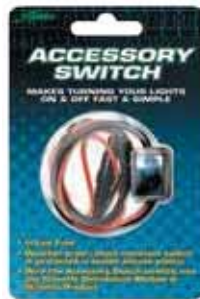

## STREETFX™ ON/OFF SWITCH

Switch makes turning your accent lighting on/off fast and simple.

- Inline fuse
- Weatherproof/shock-resistant switch is protected in sealed silicone plastic
- Wires directly into any StreetFX Distribution Module P/N 480402 or StreetFX product

P/N	Retail
480854	9.99

## STREETFX™ LED SPOT LIGHTS

Individual ultra-bright LEDs add light anywhere and they are weather- and shock-resistant.

- Package includes four ultra-bright 5 mm single LED spot lights, foam mounting tape, three feet of wire between each spot light and installation instructions
- Flexible neck allows easy positioning of LED light
- Easy peel-and-stick application and works with all 12-Volt vehicles
- Wires directly into battery or StreetFX Power Distribution Module P/N 480402

### STREETFX™ COMPACT LOAD RESISTOR

Resistor for use with signal to correct high flash rate in LEDs. Compact design includes splice tabs for easy installation. Helps older bikes turn signal circuit work correctly when they update to LED indicators.

P/N	Retail
480874	18.99

### STREETFX™ LOAD EQUALIZER

Two pack of equalizers used to regulate flash rate associated with replacement indicators.

- For intermittent use only with turn signals and brake lights
- Comes with four wire taps for easy, quick and complete installation

P/N	Retail
480827	14.99

### CYRON™ CONVEX 6 LEDs

Nothing this small puts out as much light, features six ultra-bright SMT LED clusters per light.

- 12-Volt DC applications
- Includes 3M™ VHB two-sided tape for simple bottom or side mounting
- 120° of smooth color (paint with light)
- Covered with waterproof resin
- Lasts for up to 50,000 hours
- Can be hidden anywhere on a motorcycle or ATV
- 4 ft. wire
- Available in black or chrome finish
- Made in USA
- Sold in pairs

## PIAA SPECIFIC BULB DESIGN FEATURES:

- Metal bond that holds glass securely preventing cracks and leaks
- Heat-resistant glass tube
- Welded focus ring assuring proper positioning
- One-piece filament support for perfect positioning
- XTRA technology for greater output and performance
- 100% quality control testing for perfect performance
- One-year manufacturer's performance warranty

**Super Plasma GTX** – Low-beam is a purple shining at 5000 Kelvins while high-beam maintains extreme white performance at 3800 Kelvins. A purple colored top coat gives headlamp a purple look even when lamp is off

**Night-Tech** – Technology that boosts the light from standard wattage to equal a high wattage

**Xtreme White** – With a 4150-Kelvin color temperature, Xtreme White bulbs give a cool white light output. The closest color yet to HID. This white light gives the driver better color recognition on depth perception and better contrast than conventional halogen lamps

**Xtreme White Plus** – The blue top coat on the 9000 series bulbs add a slight blue tint to the lamp with no loss of performance. Xtreme White Plus bulbs are whiter, brighter and closer to the color of sunlight

## Kelvin Scale

# PIAA

## PIAA SUPER PLASMA GTX H4 BULB

Features a unique, twin-beam design. Lower beam is a purple color shining at 5000K. Higher beam maintains Xtreme White performance at 3800K. Purple-colored top coat gives the headlamp a purple look even when the lamp is turned off.

- H4 Anti-Vibration, 3800/5000-Kelvin, 60/55-Watt = 135/125-Watt

P/N	Retail
200109	49.99

## PIAA XTREME WHITE 1157 BULB

- 4,150-Kelvin
- Dual filament 1157 (Stop and Turn 27W/8W)
- Sold in pairs

P/N	Retail
200137	20.50

## PIAA XTREME WHITE PLUS BULBS FOR V-TWIN

Top coat and shade: exact positioning and focusing of the shade controls the low-beam pattern to prevent glare for oncoming vehicles thereby increasing safety. Weld pins at terminals: Joining the bulb base with the terminal is accomplished by a patented welding process, which is more resistant to heat and provides great durability when compared to the conventional soldering. Glass tube: quartz glass construction provides a high level of resistance to extreme temperature. MO (molybdenum) foil: due to the similar coefficient of thermal expansion to glass, MO (molybdenum) foil is used to form a tight seal at the pinch sealing point. Filament: low- and high-beam filament.

- Pinch sealing
- Sold individually

### CYRON™ ELITE SERIES LED BULBS

Cyron Elite series use the latest LED technology to offer the safest LED retrofit bulbs. Controlled Collapse Chip Connection technology "C4" reduces the physical size of the LED light source to closely resemble a traditional halogen bulb. Results are a 90% precision light pattern from your headlight while offering all the benefits of the LED technology. Cyron Elite bulbs greatly enhance your visibility and virtually eliminate glare for other drivers.

- Slim black anodized aluminum body for easy fitment
- No external ballast
- Quiet cyclone fan
- One-year manufacturer's warranty

Specifications:

- 3800 Lumens
- 6000K color temperature
- Peak power: 36-Watts
- Nominal power: 32-Watts
- 20,000 hours lifespan
- IP21 weather resistant

## CYRON™ H4 LED RETROFIT MOTORCYCLE HEADLIGHT BULB

Designed with four interchangeable adaptors to fit in most standard H4 headlight bulb applications. Gives a wider, brighter viewing angle of the road while delivering 6,000-Kelvin of ultra-clear daylight white light.

- Features 360° beam angle and delivers 2,500-Lumens at extremely low power usage helping your battery life by reducing the current draw during the start cycles
- Comes with a 3-pin connector that will fit any standard motorcycle headlight wiring harness and has both a high and low beam that is pre-set, no extra headlight adjustment
- Active Fan Heat Management System adds protection to make sure the light runs cool and gives many years of clear bright light
- Replaces over 90% of motorcycle headlights
- Lumen 2,500LM
- Power Hi-15-Watt/Lo-10-Watt
- 6- 36-Volt
- Shell material aluminum alloy
- Color temperature 6,000-Kelvin
- Four universal mounts
- Three Epistar LEDs
- Lifespan over 30,000 hours
- One-year manufacturer's warranty

Note: Meets or exceeds D.O.T. but not D.O.T.-approved.
