HOW TO MEASURE FOR SPRINGER FRONT ENDS

- Measure the fork currently on your bike
- All measurements should be taken from the lower stem bearing cup to the center of the axle
- Use the measurements shown below to select the proper length for Springer Front End

If Stock Front Fork Measures:

- 19" to 21" use the 2" under stock assembly
- 21" to 23" use the stock assembly
- 23" to 25" use the 2" over stock assembly
- 25" to 27" use the 4" over stock assembly

All longer lengths or custom applications should use the 6" over stock assembly

COLONY SPRINGER COMPONENTS

ARLEN NESS

ARLEN NESS KO RAKED TRIPLE TREES FOR SOFTAIL

Properly rake your FL Softail® for the use of 21, 23 and 26 in. wheels. Upper exposed triple tree is chrome-plated for a clean look, hidden lower triple tree is anodized black. Each triple tree kit includes billet top and bottom trees, fork stem, lower bearing and all necessary hardware.

- Constructed from CNC billet aluminum
- When using 21 or 23 in. wheels, stock length forks (30-1/2 in. long) are recommended; 26 in. wheels require the use of 1 in. shorter fork tubes
- Always check fender clearance under full compression, limit fork travel if needed

ARLEN NESS KO RAKED TRIPLE TREES FOR BAGGERS

This 11° billet triple tree will properly rake your Bagger for the use of 21, 23 and 26 in. wheels; no cutting, welding or custom fabrication needed of any kind. Extensively road tested, this kit is the best handling raked tree kit available; attain close to stock handling with large diameter front wheels. When using 21 in. front wheel the trail is 4-1/2 in., 23 in. wheel trail is 5-1/4 in. and when using 26 in. front wheel the trail is 6 in. Does not require modification of stock frame; fairings also maintain stock position and do not require angled headlight wedges or special brackets to properly adjust headlights.

- When using 23 or 26 in. front wheels on Road Glide® models, a fairing bracket is recommended (sold separately) for increased fairing clearance
- Kit includes black anodized billet aluminum triple trees, steering stem, fork tube extension, fork stops, travel limiters and all necessary hardware

Note: Designed exclusively for 21, 23 and 26 in. diameter wheels, stock diameter wheels will not work with triple tree kit.

AMERICAN SUSPENSION BOLT-ON RAKED NECK AND TREES

The American Suspension Bolt-On Neck Kit for Harley-Davidson® bagger motorcycles gives great handling because the geometry is very similar to a weld-on kit. The mounting system includes several redundant mounts for maximum reliability and it should take less than 10 minutes to install the neck (a few hours to remove and replace the fairing, wheels and handlebar).

- The patented American Suspension Bolt-On Neck Kit is designed for quick and easy installation with a focus on strength and stability
- The full kit includes neck, stem, trees, bushings, fork caps and bearings
- This kit has a full US patent
- Limited lifetime manufacturer's warranty
- Made in USA
- The 26 in. wheel kit has +4 in the neck and 8 in the trees, so the total rake ends up at 38°
- The 30 in. wheel kit are +9 in the neck and 12 in the trees, so the total neck rake ends up at 47°

HAWG HALTERS FATBOY TRIPLE TREES

The latest addition is a 4° raked triple tree engineered for the Fat Boy® and Heritage models. Designed to accept the original tin covers to keep the stock look while increasing the rake and wheelbase. Kit comes with everything needed including extended length fork tube plugs allowing you to retain the stock fork tubes.

P/N	Retail
670439	590.00

HAWG HALTERS TRIPLE TREES

Smooth top design hides the fork tubes and neck stem for a true custom look. Lower tree utilizes hidden clamp bushings to secure the tubes in a clean, positive method. Generous corner rounding, large radius leading edges, no ball mills or logos.

- 41 mm Wide Glide®
- CNC-machined with show quality chrome finish
- 1-1/2 in. thick
- All trees are machined to accept a variety of optional internal fork stop kits

PRO-ONE™ HIDEAWAY HOURGLASS STYLE STOP

Designed for Hourglass style necks that do not have press-in neck cups and where the bearing race installs directly into the neck.

- Polished stainless steel
- This kit is used in necks that are 7 in. long
- Used on later stock Harley-Davidson® frames
- Easy-to-follow instructions included
- Bearing race fits 1.990 in. neck bore

Note: Measure the neck bore where the races install in the neck or the length of the neck to be sure this is the kit you need.

ARLEN NESS

ARLEN NESS DUAL CALIPER HOT LEGS FOR BAGGERS

Now available in standard dual disc, custom single disc and custom twin caliper on left side leg for dual disc braking power while maintaining a clean single disc look. Tapered, billet-machined design with hidden axle drastically cleans up front end of FLT. Offered in Smooth and Deep Cut styles with either show chrome or black anodize finish. Combine with Ness fork boots for the complete look. Twin caliper fork leg kits allow you to bring your right side caliper over to the front of your left side leg to still obtain dual disc braking power. Cleans up the right side of your fork assembly allowing you to show off your custom wheel.

- Requires custom brake lines

ROLAND SANDS DESIGN® UPPER FORK COVER

Blackout kits for Dyna's and Sporty's fill the gap between your triples with a little extra style and stealth; when used with fork boots you can easily black out the front fork of your machine for a more aggressive look.

- Slides over O.E.M. fork leg to black out exposed fork area between triple clamps
- CNC-machined billet aluminum
- Design matched to existing product lines

ROLAND SANDS DESIGN® FORK BRACE TRACKER

Simplification in the name of function is what our fork brace is all about. It allows you to get rid of the front fender without losing the integrity of the suspension. Eliminates fork twist and increases rigidity from stock while looking damn good. Available in chrome and black powder-coat finishes with a riveted brass antique RSD logo badge.

- Laser cut from 3/16 in. 1018 steel
- Practically eliminates front fork flex
- For use with a 19 or 21 in. front wheel/tire
- Stamped RSD Logo Badge
- Hardware included
- Made in USA
- Not designed for use with front fender

41 mm	482539	124.95

CUSTOM CYCLES ENGINEERING 41 MM FORK TRUSSES FOR WIDE GLIDE

Dramatically improves front end handling of any stock Harley-Davidson® fork and also fits Custom Cycle Engineering front end. Machined out of solid billet aluminum. The compound arc, which sweeps upward and rearward simultaneously, imparts greater resistance; the upward arch also provides additional fender clearance. Large diameter holes spaced out to a maximum strength calculation helps keep unsprung weight to a minimum. All trusses are designed to bolt securely to the lower sliders including factory chromed models.

- Installation is very simple and the disassembly of the front-end is not necessary

P/N	Retail
497735	251.00

KURYAKYN®

KURYAKYN® FORK BRACE FOR WIDE GLIDE FRONT ENDS

Securely ties fork sliders together for a more rigid, smoother operating front end.

- Reduces fork flex

ROLAND SANDS DESIGN® FORK PRELOAD ADJUSTER

- The RSD Preload Fork Adjusters allow on-the-fly fork spring preload adjustment; with the use of an Allen wrench, easily increase or decrease preload to alter the handling characteristics for a softer or stiffer ride
- Replaces the O.E.M. top fork caps
- Available for 39 mm and 49 mm forks
- Easy installation; no need to remove forks or top triple tree from bike
- CNC-machined from billet aluminum
- Up to 1.15 in. of preload adjustability
- Made in USA

PROGRESSIVE SUSPENSION® MONOTUBE FORK CARTRIDGE KIT

Enjoy improved front end control and ride comfort by converting your dual damper rod or damper rod/cartridge forks found on 02-05 models to true cartridge forks. This kit contains a pair of high-performance, gas-charged monotube fork cartridges complete with a set of fork springs. Kit is a direct internal component replacement. No modification to your forks are required.

- Improved resistance to front brake dive
- Improved front end stability
- Improved cornering
- Improved bottoming control

PROGRESSIVE SUSPENSION® HIGH PERFORMANCE FORK CARTRIDGE

True high-performance front suspension is finally available for the HD® Dyna line. Progressive Suspension has gone back to the drawing board and created a state of the art Fork Cartridge Kit designed to outperform everything on the market. Their asymmetrical design places a preload adjuster over a progressive rate spring in one leg and an aluminum bodied, sealed cartridge damper on the other. The result is superior damping and ride control combined with tunable preload and a new benchmark for high-performance suspension on the Dyna platform. Each kit includes components for stock height or 1 in. lowered.

- Adjustable preload
- Improved resistance to front brake dive
- Improved front end stability
- Improved cornering
- Improved bottoming control
- Sold in pairs

PROGRESSIVE SUSPENSION® DROP IN FORK LOWERING SYSTEM

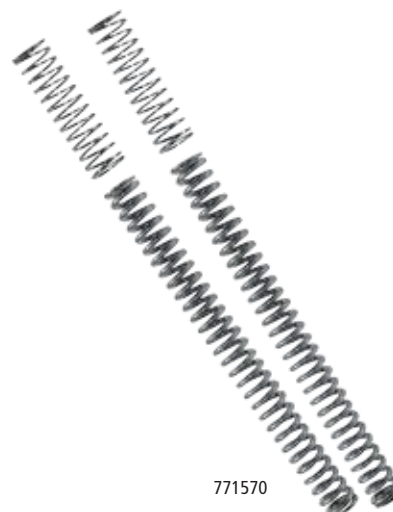

Transforms a messy and time-consuming install into 30 minutes. Pull up to 2 in. out of the front end of your bike without the hassle of disassembling the forks, pulling the wheel or even changing out the oil and the whole process can be done with basic tools. Shorter springs and the new secondary compensator spring make short work of lowering your front end.

- Simple drop in install

AMERICAN SUSPENSION FORK TUBE AIR RIDE KIT

Turn your American Suspension short-neck triple-tree kit with 41 or 49 mm fork tubes into a custom air ride system. The guys at American Suspension did it again with this simple kit, just add the pistons and the included cap that will accept your air line. Works as a great add-on with a rear air ride system.

BURLY BRAND SLAMMER SUSPENSION DROP KIT

Combined dropped fork springs and stubby shocks for the complete price-friendly package.

- Drop-in spring kit does not require the disassembly of the fork and can be installed in 20 minutes with the forks still on the bike on most bikes
- Entire kit set up to go from box to bike in under an hour with basic tools
- Lowers rear end up to 2.5 in.
- Lowers front end up to 2 in.
- Softail® models include lowering kit rather than shocks

CUSTOM CYCLES ENGINEERING FORK TUBES

For over 30 years DEW has been manufacturing extension fork tubes. DOM 1026 steel tubing that is ordered specially from a tubing mill.

Hard Chrome Fork Tubes:

Finish is hardened to 55-60 Rockwell for a durable, long lasting corrosion and wear resistance.

Show Chrome Fork Tubes:

Centerless ground outside diameter to O.E.M. specifications and machined the rest of the tube to exact ID specs, material is buffed to a mirror finish and chrome plate the final product to a show chrome finish.

- Made in USA
- O.E.M. listings are for reference only, tube lengths may not be exact O.E.M. lengths. Confirm length required before ordering
- Sold in pairs

ARLEN NESS CUSTOM FORK DAMPERS

Specially designed fork dampers are shorter than stock and specifically drilled to lower your motorcycle while retaining a factory quality ride. Ranging from 1-1/2 to 2-1/2 in. drop, each fork damper is model specific and utilizes factory fork springs. Fork dampers feature a shortened length and are drilled in strategic positions to obtain a factory ride quality.

- Utilizes factory fork springs
- Each kit includes two complete damper assemblies

OHHLINS® SHOCKS

For premier comfort performance and control confidence, Ohlins USA has shocks for the three lines of twin-shock Harley-Davidson®: FLH, Dyna and Sportster. Shocks are available in several configurations, starting with the exceptionally priced S36E shock, a single-tube emulsion-style damper with pre-load adjustability. For riders looking for mid-line performance and pricing is the S36DR1L shock, with an internal piston for perfected damping and adjustability for pre-load, ride-height and rebound.

ARNOTT® ULTIMATE RIDE ADJUSTABLE AIR SUSPENSION

The stylish new chrome, rebound-adjustable FOX® Air Suspension System from Arnett has been custom designed for Harley-Davidson® models to give the rider superior control, additional ride comfort settings and fast ride height adjustability. The FOX shock's custom valving, designed for your motorcycle, provides you with a safe and comfortable ride. Arnett's patent pending kit offers TruAIR technology with a rugged air spring bladder and shock damper design, not an air cylinder or air-assisted unit. For added ride comfort, this kit includes FOX's adjustable rebound control dial so you can quickly and easily adjust your shocks' internal damping characteristics – a feature not found elsewhere in the air suspension market.

At the core of this system are two chrome custom gas pressure FOX shock absorbers with rebound control knobs (optional); then, using a patent pending design, Arnett adds a rugged Goodyear® air spring to each, ensuring superior comfort, ride quality and durability. Arnett pairs your shocks with a small, but powerful, compressor, application-specific mounting bracket and air distribution valve block, which includes a muffler to control how fast air is released. Each kit includes everything you need for a fast and flawless installation, including a detailed installation manual, a fused wiring harness and relay assembly, handlebar-mounted inflation switch, all necessary tubing, wiring, cable ties, fittings, chrome bolt covers and mounting accessories. Each shock is custom-crafted and rigorously tested in Arnett's Florida manufacturing facility and is backed by Arnett's limited lifetime warranty.

Product Features:

- Chrome or Black FOX shock absorbers
- Adjustable rebound control (optional)
- Goodyear air spring sleeves
- Compressor with vent solenoid
- 6061-T6 billet aluminum construction
- Handlebar-mounted inflation switch
- Engineered for touring series motorcycles
- Even deflated fender won't touch tire
- Made and tested in USA

SUSPENSION

677858

NEW!

ARNOTT® SMOOTH RIDE ADJUSTABLE AIR SUSPENSION

Arnott's affordable air suspension kit provides a sporty ride with the luxury of inflating or deflating your rear shocks with just the flip of an onboard switch.

At the core of this system is Arnott's custom-valved, high-pressure nitrogen gas dampers, which are designed to keep the rear tire in constant contact with the road giving you, the rider, the flexibility of setting the height of your rear suspension based on your weight, height, road conditions and preference. This helps ensure safety through enhanced control and stability.

Product Features:

- Arnott monotube shock absorbers
- Goodyear® air spring sleeves
- Compressor with built-in vent solenoid
- Stainless steel mounting hardware
- Engineered and made in USA
- Limited lifetime warranty

Includes:

- Two air shocks
- Compressor with mounting bracket
- Switch with mounting hardware
- Pre-made hose and wire harness
- Stainless steel mounting bolts
- Bolt covers
- Detailed instruction manual

EXCLUSIVE

JRI SHOCKS FOR HARLEY-DAVIDSON

Performance based settings for improved handling.

- Set for your rider weight with gear and riding style
- Smooth and controlled ride
- Custom piston designed to hug the road
- Rebuildable and serviceable
- Dyno tested ensuring excellent performance
- Several spring rates available to meet rider profile
- Sold as pair

Single Adjustable

- Balanced compression/rebound with one easy single adjustment

SHOCK NOTES

R05:

The shock recommended is slightly shorter than stock. This may alter the head angle slightly and give somewhat slower steering.

Note: Heavy-duty shock applications are recommended for bikes with additional add-on accessories, rider weight over 250 lbs. or passenger use over 50% of the time.

SUSPENSION

PROGRESSIVE SUSPENSION® 970 SERIES SHOCKS

Designed for performance oriented twin shock bikes and feature piggyback reservoirs, a high-pressure gas charge and deflective disc valving, all packaged in a mono-tube style body. Progressive rate springs, threaded preload adjustment and external compression adjustment knob allow for fine tuning to suit rider weight and riding style.

PROGRESSIVE SUSPENSION® 944 SERIES SHOCKS

Progressive Suspension® has unveiled another breakthrough design called Frequency Sensing Technology (FST) for its unique ability to dynamically adjust damping as you ride. This lowered stance makes it easier to manage your bike at intersections and parking lots, not to mention just swinging your leg over the seat.

944 ULTRA-TOURING: Specifically designed to deliver a comfortable ride at a 1 in. lowered stance; built around our latest FST technology, The Ultra Touring shocks utilize all the suspension travel provided by the full length units, but in a 1 in. lowered ride height (sits at stock height on FLHX, FLHXS, FLTRXS, FLHTKL, FLHTCUL); the unique Ultra-Touring spring combination not only delivers a lowered ride height while its being ridden, but also while it's on the side stand.

944 ULTRA-LOW: Just like the name implies, this is the lowest version of our 944 Series shocks; designed to sit 2 in. lower than a stock HD Touring model (1 in. lower on FLHX, FLHXS, FLTRXS, FLHTKL, FLHTCUL) and provide the best ride a short shock can; the 944 Ultra-Low is the shock for the job.

- FST dynamically adjusts damping for optimum ride quality
- Deflective disc valving
- IAS technology: patented damping technology that separates wheel movement from chassis movement
- Adjust spring preload by hand, no special tool needed
- Progressive rate main springs specifically designed for touring
- High-pressure gas charged for consistent performance

NEW!

PROGRESSIVE SUSPENSION® 490 SPORT SERIES SHOCKS

A true sport performance shock, the new 490 Sport Series Shocks feature a high-pressure monotube with deflective disc damping technology, hand-threaded pre-load and rebound adjustment. This technology coupled with a linear rate spring allow riders to fine tune the damping and consistently withstand extreme temperature ranges and heavy loads. An engineered jounce bumper and cup also help smooth out and control bottoming. The 490 is ready for a hammering around the tarmac on your next race day.

PROGRESSIVE SUSPENSION® 422 SERIES PREMIUM SHOCKS FOR HARLEY-DAVIDSON

Pair of steel bodied, monotube dampers wrapped with a black powder-coated, progressive rate steel coil spring.

- Dampers feature a nitrogen charge that eliminates cavitation and creates a consistent ride performance with no fading
- Fully adjustable Softail® shock with 2 in. adjustable ride height
- Show chrome quality cover that includes four ports for coil spring visibility

422 Series Heavy-Duty Shocks

Riding 2-up with stuffed saddlebags and enough gear to live out on the road can quickly overwhelm the Softail® suspension system. Progressive solves this challenge by adding a higher rate spring to their already fully adjustable shock, providing better load and bottoming control. Combined with variable ride height and tunable spring preload one can easily set up the suspension to fit the bike as well as riding style.

HARLEY-DAVIDSON	Year	P/N	Retail
FXST, FLST	00-16	775189	499.95
FXST, FLST	89-99	775188	499.95

Heavy-Duty with Remote Adjust Preload

RAP (Remote Adjustable Preload) combines high performance shocks with a remote preload adjuster. The Softail shocks are hidden under the frame which makes common adjustments difficult. Conveniently located behind the left passenger peg, the RAP system allows for easy turning of the shocks to account for changing loads or the addition of a passenger.

PROGRESSIVE SUSPENSION® AIR DRAGGER SHOCK KIT

From the company that perfected motorcycle air shocks, Progressive® Suspension has just released the low cost Air Dragger. By combining a machined-aluminum air chamber, velocity sensitive, multistage valving and an internal progressive rate coil spring, they have once again elevated air suspension to a new level. The clean and simple, full chrome body mounts to all late model touring bikes and is powered by a clever compressor unit that simply uses Velcro® to attach on the back of a saddlebag. Effortless installation, up to 2 in. of on-the-fly height adjustment and an economical price is a hard to beat combination.

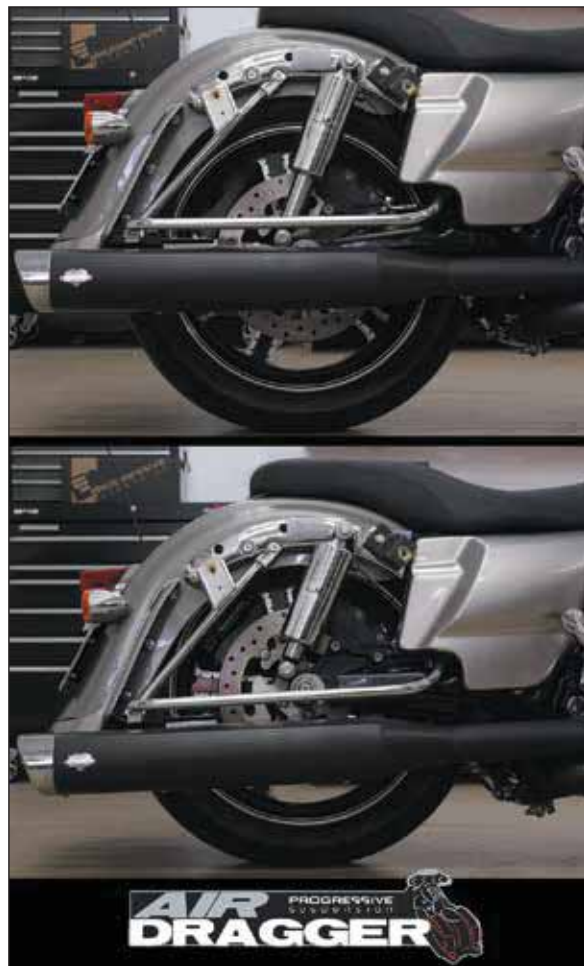

- Economical air suspension
- Air adjustable spring preload, manually or with optional compressor kit
- Air chamber allows 2 in. height adjustment
- Velocity sensitive damping
- Multistage disk valve control
- Full chrome shock cover

PROGRESSIVE SUSPENSION® 412 CRUISE SHOCKS FOR SPORTSTERS

The 412 Cruise is the perfect balance of lowered stance and ride quality. By combining a flat-wire spring with a progressive main spring, the 12.5 in. shock sits like 11.5 in. units under the weight of the bike, yet utilize the full stroke as terrain demands it. The result is a lowered shock that rides like a traditional height unit.

- Sits like an 11.5 in. eye-to-eye
- Five position preload adjuster
- Gas charged damper
- Black or chrome main spring
- Sold in pairs

BURLY BRAND STILETTO SHOCKS

Lifted is the new lowered and the Burly Stiletto shocks are pure coil sprung sexiness. Created to give your Sportster the attitude and suspension travel that a proper cafe or Scrambler XL wants and needs. The high-performance damper is wrapped in a spring combination designed specifically to deal with subtle road noise and imperfections, while the main coil handles the big hits and controls bottoming. The result is a plush ride that's not afraid to play rough.

- Sold in pairs

Note: May require modification to exhaust brackets to open up clearance for belt.

BURLY BRAND LOWERING BLOCKS

Burly Lowering Blocks are the time tested method to drop virtually any H-D® without breaking the bank.

- Inexpensive and quick to install
- Bike lift and a few wrenches are all that it takes to pull up to an inch and a half out of the rear of most year Sportster®, Dyna® and FLH (Baggers)
- Burly also offers several kits for the Softail® style chassis and a new design for the updated chassis on the 09-13 Touring models

Note: Installing a lowering kit or shorter shocks will decrease initial ground clearance. The motorcycle will be lower to the ground and care should be taken to avoid bottoming, especially over bumps or in turns. To maintain proper balanced geometry, we recommend lowering the front and the rear of the motorcycle equally.

BAGGER-WERX™ REAR SHOCK LOWERING KITS

Engineered to lower your bike 1 or 1.5 in. depending on the application. Constructed from black anodized billet aluminum. Lowers the center of gravity and gives the bike a tough, custom stance. A simple design makes installation easy.

- Includes all necessary hardware and instruction sheet
- Sold in sets

Note: Caution, riders must use extreme care when operating a modified motorcycle, particularly while familiarizing oneself with its altered handling characteristics.

Check all clearances prior to riding your motorcycle after installing the lowering kit. Lowering your motorcycle reduces cornering clearances. Lowering kits will not work on Touring models equipped with stock O.E.M. leather saddlebags.

ARLEN NESS LOWERING KITS

Complete lowering kits include everything you need to lower your motorcycle correctly. Front fork dampers, rear lowering blocks or adjustable kits and lowering kits are included in every kit. Lowering components in each kit will depend on application, FLT kits will be a fixed 1 in. drop while Softail® will have a 1-2 in. drop. Specially designed fork dampers lower the front end without replacing factory springs.

- Both kits for Softail® lower the front of FXST models by 2-1/2 in. and FLST models by 2 in. while the rear designs are adjustable to lower as desired
- Each kit includes two specially designed dampers, two adjustable rear shock adjusters and a 1 in. shorter kickstand
- Fork oil not included

MOTION PRO® STEERING STEM BEARING TOOL

Removes and installs tapered roller bearing at base of steering stem. Blue-anodized bearing protectors are made from 6061 billet aluminum and laser-etched for easy identification. Compact design to fit within steering stops on lower triple clamp. Removal process requires cutting outer sheet metal cage from bearing assembly. Protects steering stem during bearing removal and installation process.

- Includes 26, 28, 30-31 and 35-36 mm race protectors for installing bearing race

P/N	Retail
080544	142.99

MOTION PRO® STEERING HEAD BEARING RACE DRIVER

Safely installs the tapered bearing race in the frame.

- Fits tapered steering bearings 41-42 mm, 47-48 mm, 51-52 mm and 55-56 mm
- Innovative double sided drivers
- Made of durable 6061-T6 anodized aluminum
- Ergonomic handle
- Laser-etched for easy identification

NEW!

MOTION PRO® PIVOT SUSPENSION VISE

Designed to make suspension service simple and quick. Holds shocks and forks securely while you change oil, re-valve, or change seals. Pivoting head holds parts in any position, with mechanical stops every 45 degrees. Aluminum Soft Jaw Vise holds cylindrically shaped parts utilizing a 4-point grip system. Large side holds 39 to 69 mm diameter parts, small side holds 14 to 39 mm diameter parts. Steel Frame is rigid yet has a small footprint, with four pre-drilled holes in the base for secure mounting to a bench. Movable fluid catch pan with mesh insert, and threaded drain bung.

How It Works On Forks:

Soft Jaw Fork Peg holds fork slider up for removal of dust seal and seal retaining clip. Repositionable bottom slide bar holds forks compressed while bleeding air (priming cartridge) during reassembly and is an excellent platform for adding, adjusting and taking fork oil level measurements. Can be used to assist in removing compression valve assembly (use of stock front axle required).

How It Works On Shocks:

- Holds shock firmly around shock body, shaft or shock reservoir
- Facilitates removal of piston rod and seal head
- Facilitates removal of shock reservoir caps, chamber pistons or bladder
- Holds shock to remove spherical bearings or needle bearings
- Holds shocks for removal of shock spring

P/N	Retail
080628	299.99

MOTION PRO® STEERING HEAD RACE PULLER

Designed to quickly and precisely remove outer bearing race from the steering head without the use of a hammer and punch. Puller design ensures bearing is pulled perfectly straight to eliminate possible damage to the frame. Works on all tapered bearing races with 47 to 52 mm OD. Precision-machined anodized aluminum cup will not damage seal surface. Brass bearing washers for easy use and long life. Hardened-steel jaws engage securely on inner bearing lip.

- Limited lifetime manufacturer's warranty

LANG TOOLS™ NECK BEARING ADJUSTMENT TOOL

Screwdriver-style handle offers a comfortable grip. Tapered end allows easy access to the neck bearing adjusting star on Harley-Davidson® front ends. The neck bearing adjustment is usually checked at the following service intervals: 1,000 miles, 5,000 miles, 15,000 miles, 25,000 miles or annually; if adjustment is necessary, the 449 is designed perfect to fit the application.

- Dimensions: 22" x 4" x 0.5"

K&L® RAZORBACK SHOCK SPRING TOOL

Single shocks, dual shocks, even piggyback reservoir shocks can be safely handled with this tool. Its safety gate system encloses the entire shock while the spring is being compressed, eliminating the chance of a spring breaking free under load. Has a tab for clamping in your bench vise, making spring changes safe, simple and profitable.
