DRESSER FRAME FOR 23" OR 26" FRONT TIRE

with 23" or 26" front tire

Dresser-style rubber-mounted model transmissions

PART # DESCRIPTION

STOCK-STYLE DRESSER FRAME

- drive train components from 94-06 Dresser models
- Dresser-style rubber-mounted model transmissions

PART # 0501-0100

- Constructed of 1¹/₄" DOM steel tubing, mandrel bent and
- •30° rake, 0" stretch

- Accept OEM neck bearings and cups (must be purchased separately)
- Made in the U.S.A.

PART #	DESCRIPTION	SUG. RETAIL
0501-0068	Twin Cam-style Softail frame	\$1,209.95

EVOLUTION-STYLE SOFTAIL FRAME

- •Constructed of 11/8" DOM steel tubing, mandrel bent, TIG and MIG welded
- •30° rake, 0" stretch
- Accept OEM neck bearings and cups
- •Designed for 5- and 6-speed transmissions; transmission plate sold separately
- •Accepts 86-99 Softail motors with clearance for cylinders up to .200" taller than a stock Evolution motor
- Comes equipped with stock coil mounts, oil tank mounts, forward control mounts and accepts Softail-style flatside gas tanks
- •Swingarm not included; accepts stock or most aftermarket swingarms
- . Made in the U.S.A.

PART # DESCRIPTION SUG. RETAIL 0501-0075 Evolution-style Softail frame \$825.95

All part numbers in **BLUE** are new for 2017.

RIGID FRAMES FOR 86-03 XL EVOLUTION

130/150 tire rigid frame

- Constructed of 1¹/₄" thick wall, DOM steel tubing with 1¹/₂" backbones
- •30° rake and 0" stretch
- •Frames are TIG-MIG welded and accept 86-03 XL engines
- •Mid-control mounts; no forward control mounts
- $^{\bullet 3}/_a"$ rear axle kit included with 180/200 frames, 130 frame will require a custom $^3/_a"$ x 117/8" rear axle
- •PART #0501-0069 is engineered for 130/140 tire
- $\bullet PART \#0501\text{-}0070$ is engineered for 180 tire with $1^1/2"$ belt or 200 tire with chain
- •Made in the U.S.A.

OIL TANKS

- •Custom deep drawn tanks are hand-crafted from 16-gauge steel and feature an integral battery box sized for XL-style batteries
- •Winged and round tanks fit both Kraft-Tech XL-style frames; will not fit without modification
- •Top mounted using Kraft-Tech's new exclusive grommet mounting system for clean, custom look
- •Installation grommets are included with oil tank
- •Center fill (cap included) with a 3.5-qt. capacity
- •Offer better circulation and cooling and feature gap-concealing wings
- •Threaded NPT 1/8" pipe fittings
- •Available in raw finish, ready to paint
- •Chrome rear oil tank bracket fits both Kraft-Tech XL-style frames and both winged and round oil tanks
- •Made in the U.S.A.

FULL RADIUS THREADED STEEL BUNGS

These full radius steel bungs are

1" long x 3/4" diameter These are great bungs for blind threaded items like fender mounts or struts or anything else you can think of

•Available in 5/16"-18 thread

Sold in 4-packs

•Made in the U.S.A.

PART #	DESCRIPTION	SUG. RETAIL
0502-0452	⁵ / ₁₆ "-18	\$18.95

WELD-ON IGNITION MOUNTING TAB

 Most ignition switches have a 'D' shaped body so they don't

rotate when you turn the key

•However, most people don't have the necessary 13/16" wide D-shaped drill bit, so Lowbrow Customs made this convenient weld-on tab out of 3/16" thick mild steel

•This tab accepts most style ignition switches

•Made in the U.S.A.

PART #	DESCRIPTION	SUG. RETAIL
0502-0523	Weld-on ignition mounting tab	\$5.95

1111-0015

ULTRA RIDE STABILIZING

SYSTEM Dramatically frees your bike from that "loose feeling and wobbles that can plague the bike at high speeds

 System connects the powertrain to the frame by adding stabilizing links

 Allows the drivetrain to move freely in a forward motion, but eliminates side-toside movement

 Cut pattern on rear mount plate allows unrestricted air to circulate around the oil bag

•Mount brackets manufactured from 6061-T6 billet aluminum, all mounting hardware and turnbuckles are stainless steel

Made in the U.S.A.

PART # **DESCRIPTION** SUG. RETAIL FOR 93-08 FLHT/FLTR/FLHR/FLHX 0933-0071 Brushed aluminum \$255.95 0933-0072 274.95

TOURING LINK

 The answer to the handling challenges faced by most touring models has arrived

 Helps stabilize the chassis by keeping the motor/ swingarm assembly aligned with chassis without causing unnecessary vibration to the rider

 Ground clearance will not be affected

Easy to install

•Made in the U.S.A PART # DESCRIPTION SUG. RETAIL 1111-0006 For 93-08 FL models (all) \$229.95 1111-0013 For 09-13 FL models (all) 229.95

1111-0006

Not for use with cross under exhaust systems. OEM or aftermarket systems.

KICKSTANDS - LOWERED AND STOCK LENGTH

- •Available in a stock replacement style and for lowered suspension
- •Stock replacement model provides a less steep lean angle, which in turn reduces effort when lifting the bike off the kickstand
- •Lowered models provide a better lean angle when parked, even when turning the bars to the right
- •TIG-welded steel construction; hand-polished to accept smooth show-quality chrome plating or black powder coat
- •Mount directly on the stock mounting bracket and utilize the stock return spring
- Feature a large surface foot pad contact area to support the bike better on the ground; the longer kick tab is also easily accessible for use with stock and oversized primary covers
- •Made in the U.S.A.

Patents Apply.

UNIVERSAL TRAILER WIRING ISOLATOR

- •Prevents electrical malfunctions or damage to the bike's electronic ignition, fuel injection, ABS braking systems and other sensitive electrical components
- •Isolator draws power directly through the battery's heavy-duty wiring and allowing the motorcycle and trailer lights to be at full intesity
- •A must have for any motorcycle with a CANbus wiring system
- •Isolator measures 3" L x 2" W x 1" H with peel-and-stick adhesive backing
- •Plug has 45" L unterminated wire leads in a loom so you can install the trailer plug of your choice (trailer plug sold separately)
- Plug connections are compatible with Rivco trailer wiring subharnesses and Rivco 5-to-4 wire converter (sold separately)

- wiring harness on one end, and Rivco's own 5- to 4-wire converter or isolator on the other
- •Eliminates the need to cut and splice the stock wiring harness
- •Order the sub-harness for your bike based on your bike's plug-in type (see chart)
- •All sub-harnesses require two additional parts for a complete trailer wiring harness assembly: Rivco's 5- to 4-wire converter (PART #3902-0134) and Rivco's Universal Trailer Wiring Isolator (PART #3902-0119) (both sold separately) Sub-harnesses sold each

-Sub-Harriesses sold each		SUC

O) (6-pin Molex)	\$39.95		97-13 FLHR, 97-09 FLTR, 97-13 FLHT/FLHTC/FLHTCU/FLHTK/	
olex)	39.95		FLHTCSE/FLHTCUSE and 09-13 H-D Trikes (8-pin AMP multi-lock	() \$39.95
RUSE/FLTRXSE (8-pin Molex)	39.95	3902-0134	5- to 4-wire wire converter	39.95

•Plug-in that allows trailer wiring and relay kits to power trailers with a fourwire harness (run/ left turn/brake, right turn/brake

and ground) •Fifth bonus wire is available to provide a fused

12V power supply to the trailer compartment for lights or keyless entry systems that are wired independently of the trailer's essential lighting

 Includes 4-pin flat vehicle connector Sold each

PART # DESCRIPTION SUG. RETAIL 2120-0388 5 to 4 trailer wire harness converter \$36.99

SIGNAL DECODER

•A must-have for trailers with a 5-wire system; separates the 4-wire CAN-bus signal to work with 5-wire trailer systems

- •A plug-in connection between sub-harness PART #3902-0165 and the trailer wiring isolator
- •For use ONLY with Rivco Universal Trailer Wiring Isolator PART #3902-0119 (sold separately; see above)

NOTE: 14-17 models come equipped with a new CAN-bus style wiring and require the use of isolator PART #3902-0119. This will draw all power for trailer lights directly from battery and not adversely affect CAN-bus system.

ENGINE GUARD CHAPS

•Stay warm on cool days and eliminate road spray and rain on wet days

•Install quickly and securely to your H-D factory engine guards

NOTE: Not recommended for use in temperatures above 55°F.

PART #	DESCRIPTION	SUG. RETAIL
FOR 86-17 FLT/FLHTC/FLHX W/ H-D ENGINE GUARDS		
3550-0155	Chaps w/ drink holder and storage pocket	\$109.99
FOR 00-17 FLST W/ H-D NOSTALGIC CURVED ENGINE GUARDS (OEM #49037-05A)		
3550-0158	Chaps w/ drink holder and storage pocket	109.99

 Made of top-quality leather-touch vinyl; looks

like leather, lasts longer and requires no special maintenance or treatment (cleaning requires only soap and water)

- Minimize cold updrafts
- •Repel road spray from front wheel and flared front fender
- •Keep bug juice off motorcycle chrome and legs
- •Allow engine cooling; no temperature restriction
- •Easy on-and-off; three snaps, belt clip and hook-andloop attachments
- •Does not affect bike handling

- •Accommodates all standard foot peg settings; 6" opening
- Sold as a set

•Made III the 0.5.A.

VENTED LOWER LEG FAIRING KIT

•Features a built-in cold air venting system that allows Harley riders to adjust the amount of air that circulates across the engine

•Vents can be opened for additional air, or closed for maximum protection from the elements

•Ratcheting friction lock pivot allows the rider to easily set the vent position

Provides two glove boxes with snap-in covers

•Set fits onto the 11/4" engine guards

•Made from ABS plastic, available in gloss black

Complete kit includes left and right fairing lowers, and all necessary mounting hardware

NOTE: Will not fit with mustache engine guard.

NOTE: Will fit 98-09 FLTR by cutting 21/2" off the cap cover to clear the upper fairing bracket.

0401-0082

SPRINGER FORKS

- •Economical alternative to a shock dampened-type Springer
- Fully assembled with an in-line top bracket without a built-in rake
- •The standard length Springer (31" measured from top bearing to the axle) is comparable to a standardlength FXST front end
- •1" o.d. steering stem designed for Timken® type bearings
- •Both rear legs are threaded for right or left brakes
- •The 3/4" o.d. axle kit includes a brake mount pivot with thrust washer, speedometer drive adapter and hub spacers (custom spacers may be required depending on the wheel used)
- •Measures 91/4" between Rockers
- •Riser mounts are on 4³/₄" centers and threaded ¹/₂"-20

CUSTOM WIDE SPRINGERS WITH SHOCKS

 Arrive bolt-on ready and fully assembled with shocks and include: fork stem, top nut, crown nut, top clamp

•Available in 27" stock length or 30" +3" over stock length

•Paughco springers will now work with OEM fork locks

AND TAPERED OVAL REAR LEGS

•Springers do not include headlight or risers •Both springers use standard 1" neck bearings •Distance between where axle goes is approximately 10"

•Minimum inside width is approximately 73/4' •Requires the use of Paughco 3/4" axle

 Springers do not have fender mounts •Requires the use of a 1999 or earlier front wheel •Available in chrome or black powder coat

and inner and outer springs

. Made in the U.S.A

- •Requires 84-99 wheel (compatible with 3/4" o.d. axle)
- •These Springers are measured from the bottom of the top tree to the center of the axle

FOR 84-17 BIG TWIN AND 86-03 XL (EXCEPT DRESSERS AND DYNA GLIDES)

		SUG.			SUG.
PART #	DESCRIPTION	RETAIL	PART #	DESCRIPTION	RETAIL
CHROME			BLACK		
0401-0073	-2"	\$699.95	0401-0078	-2"	\$629.95
0401-0074	Std. length	699.95	0401-0079	Std. length	629.95

0401-0077	+6"	699.95	0401-0082	+6"	629.95

NOTE: Overall length is measured from the top of the top clamp to the center of the rear leg pivot. Please note that 27" stock length

forks are the same length as OEM forks used on 48-84 FLH Big

Twins. The correct length for the equivalent of an FXSTS springer

CUSTOM WIDE SPRINGER FRONT FORKS

 Classic springer looks with quality second to none from the premier springer manufacturer

 Wide springer with shock has a front fender mount similar to the 88-92 FXSTS

•Distance between rear legs is 85/16"; outside width is 91/2"

 Forks come assembled and include fork neck, top nut, crown nut, riserstyle top clamp and inner springs P-181-ST

 Both springers use standard 1" neck bearings

 Require use of the Paughco axle, available separately; fork recommended for 21" wheels only P-S181-ST

•Require 1/2"-20 riser stud/bolt

•Made in the U.S.A.

NOTE: Overall length is measured from the bottom of the top clamp to the center of the rear leg pivot. Please note that 25" stock length forks are the same length as OEM forks used on 48-84 FLH Big Twins. The correct length for the equivalent of an FXSTS springer fork would be +3" over stock (28" total).

•Stock trail
•Use stock length fork tubes

•Full templates and step-by-step instructions

•Can be TIG or MIG welded

•Wire Chase in the left side of neck

•No cutting wires or unplugging the terminals

•VIN# stays in factory location
•Handles better than a stock bike

•Made in the U.S.A.

NOTE: FLHT and FLHR models will require modification of fairing or nacelle.

"KO" RAKED
TRIPLE TREES
•The KO "Kick Out" Triple Tree
ARLEN

Kits features 11 degrees
of rake to allow the use of
23" and 26" wheels on Touring and Softail models
without modifying factory frame

•Provides proper rake and trail for great handling

•Trail numbers depending on front wheel size choosen

•CNC machined from billet aluminum
•Each kit includes billet aluminum triple trees, steering stem, fork tube extension, fork stops, travel limiters and all necessary hardware

•Touring models fairings maintain factory position so headlight remains in proper position and does not require the use headlight wedges or special brackets

0408-0300

• Fairing mount kits available for Road Glide models

•Softail models feature chrome top triple tree and accepts factory or Ness fork boots and fork legs

	JNT KITS For 09-13 FLTR models

7 & 7 RAKED TRIPLE TREES

•Triple trees offer 7" of rake while maintaining 7" of trail when using a 23" wheel for the ultimate in handling, no frame modifications necessary

Designed to work with 23" and 21" wheels only (stock diameter wheels will not handle correctly)

•21" wheels provide 61/8" of trail

6° RAKED TRIPLE TREE KITS

No modifications to OEM frame needed
 Accept all OEM components

Maintain stock ride height of the vehicle

Get that longer Bagger look
Increase frame-to-fender clearance for

larger front wheels

•Triple Trees are machined from forged 6061-T6 billet aluminum and then finished in black anodize

• Each kit includes top and bottom tree, pressed in steel stem, lower fork bearing and travel limiters on 14-17 applications

•Batwing style Fairings maintain stock position and do not require angled headlight wedges or special brackets to properly adjust headlights

NOTE: Will not work with factory diameter wheels.

NOTE: The larger the wheel, the less fork travel. Always check lower tree to fender clearance.

NOTE: Raked triple trees change the handling characteristics of the motorcycle. Use caution until familiar with the changes.

UPPER TRIPLE TREES

- Replaces the stock "dedicated to one option handlebar clamp", with mounting holes that accept pretty much any riser selection that's out there
- •Aircraft-inspired design
- •CNC-machined from billet aluminum
- Available in hard black or clear anodized finishes
- •Assembly includes 1/2"-13 riser mounting bolts and Joker's custom steering stem nut
- •Risers sold separately
- Made in the U.S.A.

NOTE: XL1200X front turn signals and speedometer/handlebar clamp are not compatible with these upper triple trees.

LEADING AXLE LOWER FORK LEG SETS

 Fork legs are Machined from 6061-T6 Aluminum and are of modular construction allowing for various color combos

•Feature an axle that is offset over 11/2" forward and around 1/2" lower to give a perfect trail when fitting a 23" front wheel into any touring bike

•A true bolt on part, Leading Axle fork legs simply replace the stock lower legs without the need to remove the fairing, trees or frame geometry; fork legs have the corrected trail built right into the legs

 Fork legs utilize stock brakes, fender and all fork internals and reduces the downtime and labor cost that is normally associated with previous methods of switching to a 23" front wheel

 A simple change out that improves the ride and handling of motorcycles when adding a bigger wheel and adds a tough new stance to the motorcycle

•Fork legs feature a wraparound fender mount that has the corrected alignment built in to allow the use of the stock fender; no need for any extra raise up kit.

•The caliper mounting brackets are held in place with 2 x 1/2" bolts to ensure extreme rigidity

•Axle can be fitted either way and is secured with an axle cap which protects the leg from possible damage if cross threaded

•Keeps full suspension travel with a 23" front wheel. No need to install travel limiters or uprated springs

•With the axle further forward the "high point" of the tire is now more forward making the wheel and tire look larger and gains frame and tree clearance; that's why using the offset fork leg provides more travel than just using raked trees

•Patent pending design provides the best ride on a 23" wheel conversion

AXEO HIGH-PERFORMANCE FRONT SUSPENSION SYSTEMS

- •Improve the stability, cornering and traction of your motorcycle
- •Smooth, controlled ride quality; kits eliminate front-end dive during aggressive braking and maneuvering
- •Firm feel for high-speed sweeping turns
- •Eliminate bottoming out on large bumps or potholes
- •Reduce dragging of floorboards or pegs
- •Kits include two mono-tube, dual-chambered fork damping cartridges
- •Cartridges have nitrogen chambers with internal floating pistons
- •Machined 303 stainless steel threaded fork preload adjusters
- •Increased range of preload settings allows fine-tuning of the front suspension for riding style and rider weight
- Performance fork spring rates
- •Designed for optimum performance with Legend® rear suspension systems
- •Available in standard height or 1" lower than stock
- Easy installation
- •17 AXEO models retain the new dual-bending valve technology of the stock fork leg

DS221549

- •Includes quart bottle of Maxima racing fork oil
- •Made in the U.S.A.

FORK TUNING KITS

 Adjustable dual-rate fork springs provide a soft initial ride and then crossover to a firmer, higher rate for potholes and other large bumps

•Each set consists of a long spring, a short spring, pre-load spacer material (in most cases), separating washers and three different metal spacers that determine the crossover from soft to firm

•Changing the metal spacers allows for differences in rider weight, style, conditions and personal preferences

•The perfect complement to Works Performance rear shocks

•Made in the U.S.A.

PART #	DESCRIPTION	SUG. RETAIL

MONOTUBE CARTRIDGE FORK KITS

- Asymmetrical design places a preload adjuster over a progressive rate spring in one leg and an aluminum-bodied, sealed cartridge damper on
 the other; providing superior damping and ride control combined with tunable preload and a new benchmark for high performance suspension
 Improves resistance to front brake dive, front end stability, cornering and bottoming control
- •Adjustable to standard length or to lower the front end up to 1"
- •Complete fork internal replacement kit
- •No modification for forks required
- Made in the U.S.A.

FORK SPRINGS

ENGINE

•Spring rates have been chosen to reduce front-end dive during braking, yet still provide

TRANSMISSION & DRIVELINE

GASKETS & SEALS

ELECTRICAL

LIGHTING

HANDLEBARS. CONTROLS & MIRRORS

•High-quality, high-performance replacement fork springs

•A Progressive Suspension rate spring has the advantage of a rising rate resistance to compression

•The benefit is the spring can be soft enough at the start of the travel to offer a "plush" ride, yet firm enough at the end of the travel to soak up the big bumps

excellent ride comfort Sold in pairs

Made	in	the	U.S.A.

& FAIRINGS

DYNA FORK BRACE

- •Simplification in the name of function is what our fork brace is all about
- •Allows you to get rid of the front fender without losing the integrity of the suspension
- •Eliminates fork twist and increases rigidity from stock while looking good
- •Replaces the front fender on most FXD models
- •CNC machined billet aluminum support brackets mount to the existing fender bolt "holes and a forward hole, giving the brace increased lateral support
- •Laser cut hoop from 3/16"steel
- Practically eliminates front fork flex
- •Hardware included
- •Contrast Cut™ has a gloss black hoop, Contrast Cut™ bracket and a brass RSD logo badge
- •Black Ops™ has a textured black hoop, Black Ops™ bracket and a brass RSD logo badge
- •Made in the U.S.A.

NOTE: Not designed for use with a front fender

NOTE: NOT designed i	ioi use with a front render.

DESCRIPTION

GPR STEERING STABILIZER V4

- •Designed to help reduce rider fatigue and eliminate headshake •Proven fluid control technology that's been squeezed, trimmed and
- lightened to be smaller, faster and lighter •Shorter fluid ports, new valving, quicker reaction to high speeds
- •Large dial with a definite "no-slip" grip that locks into place with a positive "click" at 20 settings
- •Approximately 30% lighter than the GPR original Version 1
- •Made in the U.S.A.

STEERING DAMPER SYSTEM

- •This complete steering damper system stabilizes the front fork and helps prevent front-end wobble
- Custom-designed 1¹/₄" clamp and bracket ensure that the included steering stabilizer is positioned in the optimum location
- Fully adjustable to accommodate most styles of riding
- •Must use OEM engine guard
- •Made in U.S.A.

NOTE: If equipped with OEM air baffle #58520-79A, it must be removed prior to installation.

NOTE: Not for trikes or bikes with raked triple trees or raked frames.

PREMIUM RIDE-HEIGHT ADJUSTABLE SHOCKS

- Nitrogen-charged steel monotube damper bodies with hard chrome-plated shafts
- •Dual-rate progressive wound springs for a smooth, comfortable ride
- Adjustable spring preload
- •Ride-height adjustable, +/- 1/2" from size listed
- •Chrome shocks feature chrome springs and damper bodies with clear anodized end caps/eyelets
- •Black shocks feature black springs and damper bodies with black end caps/eyelets
- •Mount with existing hardware

NOTE: Lowering the motorcycle will reduce ground and cornering clearance.

NOTE: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues such as swingarm/axle to exhaust contact, as well as chain/belt guard or tire contact.

NOTE: OEM upper shock mount covers will not fit with these shocks.

NOTE: Not for use with rear lowering kits.

FIGURE 1

DRAG SPECIALTIES SHOCK ABSORBERS

- Shock bodies are steel construction with multi-stage velocity-sensitive hydraulic dampers
- •Feature progressive rate springs that provide a softer initial response, but resist bottoming better than stock springs
- •Improved damping rates for a more comfortable and controlled ride
- •5-position adjustable spring pre-load
- •Chrome-plated or black covers and springs for style
- •Custom lengths available for stock ride height or a lowered, custom look
- •Manufactured to Drag Specialties specifications by Progressive Suspension
- Sold in pairs
- •TÜV approved
- •Made in the U.S.A

NOTE: Lowering the motorcycle will reduce ground and cornering clearance.

NOTE: Heavy Duty Applications are recommended for bikes that are operated at or near the manufacturer's maximum load rating over 50% of

NOTE: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues such as swingarm/axle to exhaust contact, as well as chain/belt guard or tire contact.

•Legend REVO coil suspension uses Legend's Touring spring rates to produce superior ride quality and performance designed specifically for Touring models

•Legend REVO coils provide improved plush ride quality, control and resistance to bottoming out

•Legend REVO extended coil length has a larger "sweet spot"

without increasing the overall shock length

Legend REVO unique spring rate offers ability to soften preload and/or reduce ride height while maintaining

•Requires minimal preload adjustments when changing between rider weight or total motorcycle load

•All suspension adjustments can be done by hand, no tools required

• Easy installation and alignment is provided by spherical bearings on top and bottom

•Available in 12" and 13" lengths in standard or heavy-duty •Black billet aluminum bodies with black springs

•All Legend REVO suspensions are assembled by hand

Sold in pairs

. Made in the U.S.A.

NOTE: Heavy-duty applications are recommended for 500 lb.+ rider and passenger total weight.

LEGEND REVO DYNA COIL SUSPENSION

- •Legend's touring-specific spring rates produce superior ride quality and performance
- •Improved plush ride quality, control, and resistance to bottoming out
- Extended coil length has a larger "sweet spot" without increasing the overall shock length
- Unique spring rate offers ability to soften preload and/or reduce ride height while maintaining a smooth ride
- Allows minimal preload adjustments when changing between rider weight or total motorcycle load
- •Easy to adjust preload by hand without tools
- Hard anodized machined aluminum body
- •Legend's low-friction seals
- •High-flow piston reacts quickly for improved fluid flow management
- •Deflective disc valved damping self adjusts to frequency and ensures controlled performance
- •Spherical mount bearings on top and bottom
- •Standard or heavy-duty spring rates
- Black bodies with black springs
- •All Legend REVO suspensions are assembled by hand
- Sold in pairs
- •Made in the U.S.A

NOTE: Heavy-duty applications are recommended for 500 lb.+ rider and passenger total weight.

NOTE: Late style upper shock studs OEM PART # 54666-08 are required for 91-05 models.

LEGEND REVO XL COIL SUSPENSION ·Legend's touring-specific

FUEL/AIR SYSTEMS

spring rates produce superior ride quality and performance •Improved plush ride quality, control, and resistance to bottoming out

ENGINE

 Easy to adjust preload by hand without tools Hard anodized machined aluminum body

TRANSMISSION & DRIVELINE

GASKETS

& SEALS

•Legend's low-friction seals •High-flow piston reacts quickly for improved fluid flow management

•Deflective disc valved damping self adjusts to frequency and ensures controlled performance

•Extended coil length has a larger "sweet spot" without increasing the overall shock length

Allows minimal preload adjustments when changing between rider weight or total motorcycle load

•Spherical mount bearings on top and bottom

Standard or heavy-duty spring rates

•Black bodies with black springs

•All Legend REVO suspensions are assembled by hand

Sold in pairs

Made in the U.S.A.

NOTE: Heavy-duty applications are recommended for 500 lb.+ rider and passenger total weight.

444 SERIES

- Features the all new Frequency Sensing Technology (FST) which allows the shocks to sense the frequency of a bump and automatically adjust damping for superior ride quality
- Deflective disc valving
- •Adjust spring pre-load by hand, no special tool needed
- Includes a progressive rate spring and is high-pressure gas charged for consistent performance
- •Standard or heavy duty spring rate with a black or chrome finish
- Sold in pairs

STANDARD

APPLICATION

- •Made in the U.S.A
- NOTE: A shock which is slightly longer than stock may alter the head angle slightly and provide somewhat quicker steering.
- NOTE: A shock which is slightly shorter than stock may slightly alter the head angle and provide somewhat slower steering.
- NOTE: For OEM shock lengths, see the Quick Reference Guide in the back of the FatBook.
- NOTE: Heavy Duty Applications are recommended for bikes operating at or near the manufacturer's maximum load rating over 50% of the time.
- NOTE: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues, such as swingarm/axle to exhaust contact as well as chain/belt guard or tire contact.

BLK

- •Manufactured from the finest materials available
- Designed specifically for Harley models
- •The 412s simple, durable design makes them a cost effective improvement to your motorcycle's suspension performance
- •A five position cam style spring load preload adjuster lets you easily dial in your ride
- Available with either a standard or heavy duty progressive spring rates
- •There are multiple style options available, like full show chrome or black covers; or either chrome or black springs and end caps
- Sold in pairs
- •Some or all shocks listed have TÜV approval. Refer to most recent TÜV certificate for current listing •Made in the U.S.A.

NOTE: All shocks are measured center-of-eyelet to center-of-eyelet.

NOTE: CHR denotes chrome shock part numbers; BLK denotes black shock part numbers.

NOTE: When installing shocks on 86-17 XL models, it may be necessary to modify or space the chain/belt guard to allow proper clearance.

NOTE: A shock which is slightly longer than stock may alter the head angle slightly and provide somewhat quicker steering.

NOTE: A shock which is slightly shorter than stock may alter the head angle slightly and provide somewhat slower steering.

NOTE: For OEM shock lengths, see Quick Reference Guide in the back of the catalog.

NOTE: Heavy Duty Applications are recommended for bikes that are operated at or near the manufacturer's maximum load rating over 50% of the time.

NOTE: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues, such as swingarm/axle to exhaust contact as well as chain/belt guard or tire contact.

¹ Fender on FXDWG must be modified – see diagram.

412 SERIES SHOCKS continued on next page

Relt guard

To use the 11" or 11.5" shocks on FXDWG

models, the fender must be modified as

follows: When the shock is compressed, the

belt quard will hit the fender edge (see Figure

1). Trim the fender as shown in Figure 1 inset.

After the fender is trimmed, install one shock

with springs removed and compress shock to

verify that belt guard clearance is sufficient.

412 CRUISE SERIES SHOCKS

- The perfect balance of lowered stance and ride quality
- •Combine a flat-wire spring with a progressive main spring, the 12.5" shock sits like 11.5" units under the weight of the bike, yet utilizes the full stroke as terrain demands it
- •The result is a lowered shock that rides like a traditional height unit
- •Sits like an 11.5" eye to eye
- •Five position preload adjuster
- •Gas charged damper
- •Available in black or chrome

REQUENCY SENSING H TECHNOLOGY

944 FST ULTRA TOURING/LOW SHOCKS

- Unique Ultra spring configuration provides the superb ride quality and suspension travel of a 13" shock but the custom lowered look of a 12" shock
- •Low Series shocks are designed to sit even lower; 2" lower than a stock Touring model
- •Built around Progressive Suspension's Frequency Sensing Technology (FST)
- •Allows the shocks to sense the frequency of a bump and automatically adjust damping for superior ride quality
- Unique spring combination delivers a dropped ride height while being ridden, but also while the bike is on a side stand
- •This allows you to better manage your bike at intersections and when parking
- •Adjust spring pre-load by hand, no special tool needed
- •Progressive rate main springs specifically designed for touring models
- •High-pressure gas charged for consistent performance
- Made in the U.S.A.

NOTE: Heavy Duty Applications are recommended for bikes operating at or near the manufacturer's maximum load rating over 50% of the time. NOTE: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues, such as swingarm/axle to exhaust contact as well as chain/belt guard or tire contact.

Progressive Rate Springs

REMOTE RESERVOIR 970 SERIES SHOCKS

- •High-pressure gas-charged dampers use deflective disc valving
- Packaged in a hard anodized aluminum body
- •High-performance dampers are wrapped in a progressive rate spring with a threaded pre-load adjuster
- •Remote reservoirs mount in front of the bags and allow for easy compression tuning

NOTE: Heavy Duty Applications are recommended for bikes operating at or near the manufacturer's maximum load rating over 50% of the time.

NOTE: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues, such as swingarm/axle to exhaust contact as well as chain/belt guard or tire contact.

STREET TRACKER, STEEL TRACKER AND BLACK TRACKER SHOCK ABSORBERS

•Feature hard-chrome high-tensile 1/2" steel shafts and billet aluminum components with computer-calibrated check ball, spring and orifice damping system

•Chromed-steel hydraulic tube with 13/8" damping piston and billet aluminum end caps

•Select units feature ARS (adjustable-rate suspension), which allows the rider to increase or decrease the load-carrying capacity of the shocks up to 50% without changing the pre-load of the springs

•Steel Tracker shocks are available with two load-carrying capacities: 400 lb. and 500 lb. rider and passenger total weight

•Available with chrome or black springs

. Made in the U.S.A.

AIR DRAGGER AIR SHOCKS

- Adjustable ride height air shocks •Air adjustable shock length can lower the bike up to 2"
- •Designed to be easily connected to the stock air lines found on most touring models
- Optional air line kit available for simple installation on models without OEM air shocks
- Integrated air and coil shock
- •Multi-stage velocity sensitive damping
- Connection kit required for 84-96 FLT/FLHT models, sold separately
- Optional, easy to install compressor sold separately
- •TÜV-approved
- •Made in the U.S.A.

NOTE: Some or all shocks listed have TÜV approval. Refer to most recent TÜV certificate for current listing.

NOTE: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues, such as swingarm/axle to exhaust contact as well as chain/belt guard or tire contact.

PROGRESSIVE

422 SERIES SHOCKS

- •Fully adjustable for ride height and spring preload
- •Tune suspension to match riding style
- Shocks feature a show chrome cover
- •Pair of progressive-rate coil springs and purpose-designed monotube dampers provide superior suspension performance
- •Dampers feature a nitrogen charge that eliminates internal oil cavitation and helps create a consistent ride while resisting heat-induced fade
- •Shocks can be adjusted up to 2" lower than stock
- •RAP (Remote Adjustable Preload) system allows for easy tuning of shocks to account for changing loads or the addition of a passenger with a remote preload adjuster
- Sold in pairs

•Made in the U.S.A.

NOTE: Heavy Duty Applications are recommended for bikes operating at or near the manufacturer's maximum load rating over 50% of the time. NOTE: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues such as, swingarm/axle to exhaust contact as well as chain/belt guard or tire contact.

422 SERIES SHOCKS W/ RAP

- •The Softail chassis has long been a challenge as the shocks are hidden under the frame which makes common adjustments difficult
- •The RAP (Remote Adjustable Preload) system allows for easy tuning of the shocks to account for changing loads or the addition of a passenger and is conveniently located behind the left passenger peg
- •Simply turn the knob in either direction to set the

NOTE: Heavy Duty Applications are recommended for bikes operating at or near the manufacturer's maximum load rating over 50% of the time.

12 SERIES 11.5" SHOCKS WITHOUT SPRINGS

- •Gas-charged with fade-free damping and consistent operation
- Automatic, six-stage damping adjusts to a variety of conditions
- •Special cams allow easy preload adjustment •Springs sold separately; available in a variety of rates; PART #s DS-222014-16
- and DS-310030-32 are recommended TÜV approved

Made in the U.S.A

NOTE: All shocks are measured center-of-eyelet to center-of-eyelet.

NOTE: Before purchasing or attempting to install shocks that are different from the OEM length, confirm that your wheel travel can be altered without causing clearance issues such as, swingarm/axle to exhaust contact as well as chain/belt guard or tire contact.
