SPOKE WHEEL WEIGHTS

- Precision CNC-machined brass wheel weights
- Weights install using a stainless steel setscrew that has been pre-applied with thread lock; do not require hammering to install or remove
- Weight attaches directly to the wheel spoke, not the spoke nut, so they can be used with special outer-spoke rims
- Design allows multiple weights to be stacked on a single spoke, or placed anywhere along the length of a wheel spoke for very precise wheel balance
- Reusable, will not chip or rust
- Polished brass or brass chromed finish available
- Wheel weights sold in 10-pack
- Optional 5-pack of 3/32" Allen wrenches available separately; sold to dealer in 5-pack, wrenches sold each
- Made in the U.S.A.
