POCKET TIRE PLUGGERS FOR TUBELESS TIRES

- Revolutionary device easily installs mushroom-shaped rubber plugs into all tubeless tires while staying on the wheel
- Plugging device drives the plug into the hole with a twist of the Allen wrench; plug then expands under pressure to fill the punctured area; a firm pull on the stem seats the mushroom head on the inner wall allowing no air to escape
- Pocket Tire Plugger kit includes; plugging device, nozzle adapter, rasp tool, probe tool, retractable razor blade, Allen wrench, 15 mushroom plugs (5⁵/₁₆" diameter x 3³/₄" L stem), laminated instructions and comes in 3¹/₂" x 7¹/₂" zippered pouch; total weight only 12 oz.
- Pocket Tire Plugger with CO₂ contains all the above plus four 16-g. canisters of CO₂ gas and a 4" flexible adapter with solid brass fittings for the most effective repair possible without dismounting your tubeless tire; kit comes in a 5" x 7¹/₂" x 1" zippered pouch; total weight only 18 oz.
- Made in the U.S.A.

NOTE: CO₂ cartridges cannot be transported on an aircraft.

AUTOMATIC TIRE INFLATION KIT

- Kit contains four canisters of CO₂ and a reusable valve adapter with brass fittings
- Each canister produces 8-9 lb. of pressure; generally takes all four canisters to reach 24-32 lb. of pressure, depending on the size of the tire
- Can be used on a variety of vehicle tires
- Made in the U.S.A.

NOTE: CO₂ cartridges cannot be transported on an aircraft.

OPTIMATE 6

- The most advanced 12V care for all lead-acid batteries
- OptiMate 6 saves batteries other chargers can't, because it recognizes the difference between a discharged battery that needs charging and a dead flat sulfated battery that needs saving
- Power-saving stand-by mode
- Full electronic protection against errors
- Automatic multi-step program
- Multi-stage desulfation: restores neglected batteries from as low as 0.5 Volts
- Ampmatic charge control adjusts current to suit any battery size / condition for fastest and most complete charge
- Cell voltage balancing mode correctly prepares NEW batteries for first use and optimizes battery performance
- Daily battery condition tests. Interactive float charge maintains battery fully charged, weeks or months long
- Global input (100-240V 50-60Hz), high efficiency (CEC listed), fully sealed

- Fully electronic, lighter weight, global input (100-240Vac 50-60Hz), fully sealed, more advanced desulfation and maintenance program
- Suitable for all types of 12V lead-acid batteries of rated capacity from 3 to 50 Ah
- Diagnoses sulfated battery condition
- Recovers severely neglected batteries from as low as 2 Volts
- Automatic hourly tests – advance warning of problems
- Maintenance – interactive float charge, max 800mA possible
- No risk of overcharging; totally safe for vehicle electronics; sparks suppressed
- Safe for long-term battery maintenance
- Automatic shut-down if short-circuited or battery disconnected
- Global input (100-240V 50-60Hz), high efficiency (CEC listed), fully sealed

BATTERY TENDER® PLUS

- Constantly monitors the battery without the damaging effects of trickle chargers; a trickle charger will eventually boil dry or overcharge a battery
- Battery Tender Plus' voltage output compensates for temperature changes, providing additional protection
- Initial charge brings battery to full charge at approximately 14.4V
- After full charge is reached, converts to float charger and monitors battery at 13.2V
- Although a constant charge is being applied to the battery, there is little or no current (approximately 10mA)
- Periodic maintenance is recommended, but Battery Tender can monitor a battery for years without the fear of boiling or destroying the battery
- 12V Battery Tender Plus has fused quick-disconnect rings with a weather cover

OPTIMATE 3X2 AND 3X4 2-BANK AND 4-BANK COMPLETE 12V BATTERY CARE

- An all-in-one tool for 12V battery care at home or at the shop
- Diagnoses, recovers, charges, tests and optimally maintains, automatically
- Retains all the fully automatic, 100% safe, easy-to-use characteristics, of the two million OptiMates produced since 1995, but is now microprocessor-controlled, lighter and more efficient than ever
- Comes with global input (100-240V) and is 33% more powerful than its predecessor
- For batteries forgotten over the winter, OptiMate 3 will recover them from deep discharge and optimally recharge them; it will check that the charge delivered is the best possible before checking how well the battery can retain the charge
- Batteries' status can be checked at a glance
- OptiMate 3 will then maintain the battery/batteries at full charge safely for months at a time and prolong their life by up to 400%

OPTIMATE 4 DUAL PROGRAM WEATHERPROOF DESULFATING BATTERY CHARGER/MAINTAINER

- The OptiMate 4 saves neglected, deep-discharged batteries that other smart chargers can't
- Ideal for all AGM, gel and standard filler cap batteries from 3 to 50Ah
- IP64 weatherproof sealed enclosure with built-in mounting option
- Now compatible with either conventional or CAN-bus motorcycle electrical systems
- Control panel with 10 LEDs displays all vital battery information
- Cable bushings avoid insulation stress in ultra-cold temperatures
- SAE weatherproof connections
- Provides optimal maintenance of your battery during long-term storage, achieved by its gentle maintenance cycle, which automatically allows the battery to rest for 30 minutes of each hour of the maintenance cycle while it remains connected

OPTIMATE™ LITHIUM

- OptiMate™ lithium, the first OptiMate to protect your LiFePO4 battery unlike any other charger
- Will protect your investment and keep your Lithium Iron Phosphate (LiFePO4/LFP) battery performing as advertised for a very long time
- With 5 Amps of charge current available, OptiMate lithium's unique multi-step ampmatic™ program recharges and balances cells within the battery quickly and efficiently
- OptiMate lithium's maintenance program delivers current to the vehicle circuitry, protecting and keeping the battery at 100% charge
- Tests and displays battery condition before charging
- Voltage retention test is conducted for 30 minutes during which no charge current is delivered, and provides results indicating the battery's general state of health
- The 12-hour MAINTENANCE CHARGE CYCLE consists of 30-minute float charge periods at a voltage of 13.6V followed by and alternating with a 30-minute "rest" (no charge current) periods
- During the float charge period, current is delivered only if the battery has lost charge due to connected vehicle circuitry; a refresh cycle may be performed if the charge level has dropped significantly
- Charge progress is tracked against the ideal LiFePO4 charge curve, internal damage will be detected and unnecessary charging of a battery that cannot be recovered is prevented
- Includes permanent ringlet connector with weatherproof cap and a set of battery clips

OPTIMATE 6

- OptiMate 6 with 0-4.5 Amps charging power is the ideal all-in-one tool to care for all 12V batteries
- Will diagnose, recover, charge, test and maintain your batteries automatically
- The ampmatic™ microprocessor actively adjusts charge current to match battery characteristics to achieve a complete charge in the shortest possible time
- Features a short circuit/dead cell check that detects internal damage in a battery and prevents unnecessary charging of a battery that cannot be recovered
- Weatherproof, sealed enclosure
- Recommended for STD (with removable filler caps), sealed AGM (absorbed glass mat) and sealed gel 12V lead-acid batteries from 8Ah to 120Ah
- Will safely maintain the battery at 100%, never overcharging, thanks to its unique 30-minute charge/30-minute rest cycle during every hour of long-term maintenance charge
- Includes permanent ringlet connector with weatherproof cap and a set of battery clips
- Fully automatic operation that includes all safety features such as reverse polarity protection and no-spark connection

OPTIMATE 5 VOLTOMATIC

- The Ideal tool with automatic selection for 6V/12V battery care at home
- First charger with multi-stage desulfation recovery for 6V batteries
- Retains all the fully automatic, 100% safe, easy-to-use characteristics of the two million OptiMate chargers produced since 1995, but with maximum charge current of 2.8 Amp (12 Volt) and 4 Amp (6V) to take care of medium to large batteries
- For batteries forgotten over the winter, OptiMate 5 Voltmatic is the first-ever charger capable of automatically recovering 6V lead-acid batteries from deep discharge (low-voltage 12V batteries need confirmation from the user that it is a 12V battery)
- Then the recovered 6 or 12V batteries are optimally recharged, tested and then safely maintained for months at a time
- The unique OptiMate long-term maintenance charge method not only keeps the battery at 100% without ever over-charging, it also has been proven to extend battery life by up to 400%

GENIUS BATTERY CHARGERS AND ACCESSORIES

Genius battery chargers are fully interactive and designed for safety. Many of the features include auto-memory – the charger returns to the last selected mode when restarted; HF/HE switch mode design is high-frequency and high-efficiency for a light-weight, compact charger; rapid-charging technology charges batteries two-times faster than traditional linear battery chargers; multiple battery chemistry safely charges wet, GEL, MF, lead acid and AGM batteries; variable input compensation gives 100% full charge even with varying A/C input voltages; extendable connectors have plug-n-play connections for easy accessory changes; and abnormality protection automatically shuts off if the charger remains in bulk charge mode for an extended period of time.

750 mA 6V-12V Battery Charger

- Smart, five-step, fully automatic switch-mode battery charger and maintainer
- Best for small battery applications from 1.2-30Ah, such as motorcycles
- Effectively maintains any 6V or 12V batteries in larger applications, such as cars, RVs and trucks
- Includes clamp and eyelet connectors

3500 mA 6V-12V Battery Charger

- Smart, eight-step, fully automatic switch-mode battery charger and maintainer
- Restores batteries to their original capacity
- Recovers slightly sulfated batteries and provides maintenance charging to increase battery life
- Versatile, provides charging modes for both small and large battery applications from 1.2-120Ah, such as motorcycles, cars, RVs and trucks
- Features recovery mode, cold/AGM mode and small battery mode
- Includes clamp and eyelet connectors

1100 mA 6V-12V Battery Charger

- Smart, seven-step, fully automatic switch-mode battery charger and maintainer
- Best for small battery applications from 2.2-40Ah, such as motorcycles
- Effectively maintains any 6V or 12V batteries in larger applications, such as cars, RVs and trucks
- Features recovery mode and cold/AGM mode
- Includes clamp and eyelet connectors

G4 6V-12V 4-bank Battery Charger

- Smart, seven-step fully automatic switch mode battery charger and maintainer
- Allows both 6V and 12V batteries to be charged safely and efficiently
- Charges multiple small battery applications from 2.2-40Ah
- Effectively maintains any 6V and 12V battery
- Four independent battery banks
