COURTESY OF JIM GODWIN ~ JIM'S HARLEY-DAVIDSON®

(462)

SPRING SOLO SEATS

•Feature a heavy steel contoured seat base with a black finish

 Include adjustable front seat hinge and two rear mount studs for springs; order springs separately (PART #s DS-902011, 0820-0010 or 0820-0029)

SEATS & SISSY BARS

EXHAUST

•1" x ³/₁₆" welded center bar

•Studs are 5/16" x 7/8" L and 6" center-to-center (small solo seats) and 7" center-to-center (large solo seats)

·Covered with a variety of leather or vinyl covers

•Select models feature solar-reflective leather in the seating area to reduce the surface temperature by as much as 25°F for a cooler seat, higher durability and longer life over conventional leather or vinyl

•Made in the U.S.A.

KNUCKLE^µFAD

KB PERFORMANCE HYPEREUTECTIC PISTON KITS

•Manufactured from high-strength, T-5, heat-treated, 390 hypereutectic aluminum alloy •Allow a tighter fit and longer piston and ring life

•Diamond-machined pistons are held to plus or minus one gram weight and less than one-halfthousandth-inch (.0005") tolerances from piston to piston

•Each kit contains two pistons, pins, spiral-lock pin clips and Hastings moly rings •Replacement piston rings available separately

NOTE: KB pistons can be installed tighter than other pistons. This results in less piston rock and better ring seal. Please read instructions included with piston for correct piston clearance.

NOTE: Due to the thermal conductivity and design of KB pistons, special attention is required to the top ring end gap. Please read instructions furnished with piston for correct ring installation.

NOTE: Each replacement ring PART # denotes rings for two pistons.

										GASKETS

PISTON KITS

•All piston kits come with two pistons, rings, wrist pins, and wrist pin keepers •Compression ratios listed are approximate and are calculated using the correct length cylinders as specified by S&S

•Require the use of connecting rods with a rod length of 7.440" (standard length

OEM #24281-74A connecting rods); use of earlier connecting rods with a rod length of 7.470" (OEM #24281-41A) will result in a slight increase in the compression ratio of about

1/2 point, and may also result in clearance problems (check all piston to cylinder head clearances carefully when using the early style rods)

•Made in the U.S.A.

ALL PART NUMBERS IN BLUE ARE NEW THIS YEAR

SCORPION BILLET CLUTCH

•CNC-machined billet aluminum design features over twice the friction area of the stock clutch

•Provides positive engagement and release

 Incorporates six heavy-duty coil springs instead of the diaphragm spring; include an extra heavy-duty set of springs for higher horsepower applications

•Friction plates are compatible with most primary oil (36-47 can run wet or dry)

•Simple bolt-on installation; requires the original clutch shell; no machining is necessary

•Kits include clutch hub, drive plates, driven plates, (two) sets of clutch springs, pressure plate and necessary hardware

•Sets of replacement fiber and steel clutch plates available separately •Made in the U.S.A.

PART # FOR 36-47 KNUCH	DESCRIPTION (LEHEAD/FLATHEAD	SUG. RETAIL
DS223723	Clutch	\$549.95
1131-0160	Repl. clutch plate set	158.95

Steel inner hub

•Lighter lever pull

•Made in the USA

•Can be run wet or dry

•Smooth, precise shifting

SCORPION LOCK-UP CLUTCH

•For stock to high-performance motors

•Designed to fit in stock-type basket •For use with open primary

•Coil spring sets provide maximum tuning capability

1130-0223

•Adjustable pressure arms increase spring pressure as rpm increase

•100% increase in clutch capacity

•Billet aluminum pressure plate

DS-223246

PART #

1131-0297

VARIABLE PRESSURE PLATE ASSEMBLY

•Variable pressure plate assembly is easy on the hand, but features increased pack pressure at higher rpm •Easy to pull at the clutch lever when shifting, with a dramatic increase in clutching power under the influence of high horsepower for instantaneous engagement

•Up to 60% more pressure (clutch pack compression) enabling the use of a lighter diaphragm clutch spring for up to 50% easier clutch lever effort with no loss of performance

•Fit under all OEM outer primary covers

DS-302163

STEALTH I AND II MIRRORS

- •The original chrome and matte black Stealth mirrors are available in clear or "Blue Sapphire" tinted designs
- •"Blue Sapphire" design looks great and helps reduce glare
- •The original Stealth I mirror with a 4³/4" stem; works great on most pullback and Ape Hanger bars
- •The Stealth II same great custom mirror head but has a 6" stem – fabulous for drag or

custom handlebars

- •Replacement stems and reflectors are also available separately
- •Stems fit all Stealth mirror heads plus most OEM and aftermarket OEM-style mirror heads that thread at the mirror head
- •All feature familiar stud-style mounting common to other mirrors, or we supply chrome socket head Allen bolts for a new style of custom mounting •Oval head measures 5" x 2¹/2"; right- or left-side installation
- •Mount on clutch or brake lever housings and most custom mounting applications

•Mirror head screws and pivots are stainless steel

"ROUND SERIES" MIRRORS

- •"Round Series" mirrors are completely chrome-plated with stainless steel pivots and mirror head screws
- •Feature a tapered design with triangular cutouts along with textured recessed areas that may be painted to match the bike
- •Head diameter is 31/2" for a good view and a clean look

•"Thin Stem" specifically designed to match the shape of the mirror head; superclean taper at the bottom and mounting hardware at the mirror head

- "Round Series" mirror head also available with Stealth I or longer Stealth II mirror stems
- •Mirrors fit clutch or brake lever housings, plus most

custom ap	plications
-----------	------------

•Larger sized "Thin Stem" measures 4" high and 45/8" long to get the	э
mirror up and out farther	

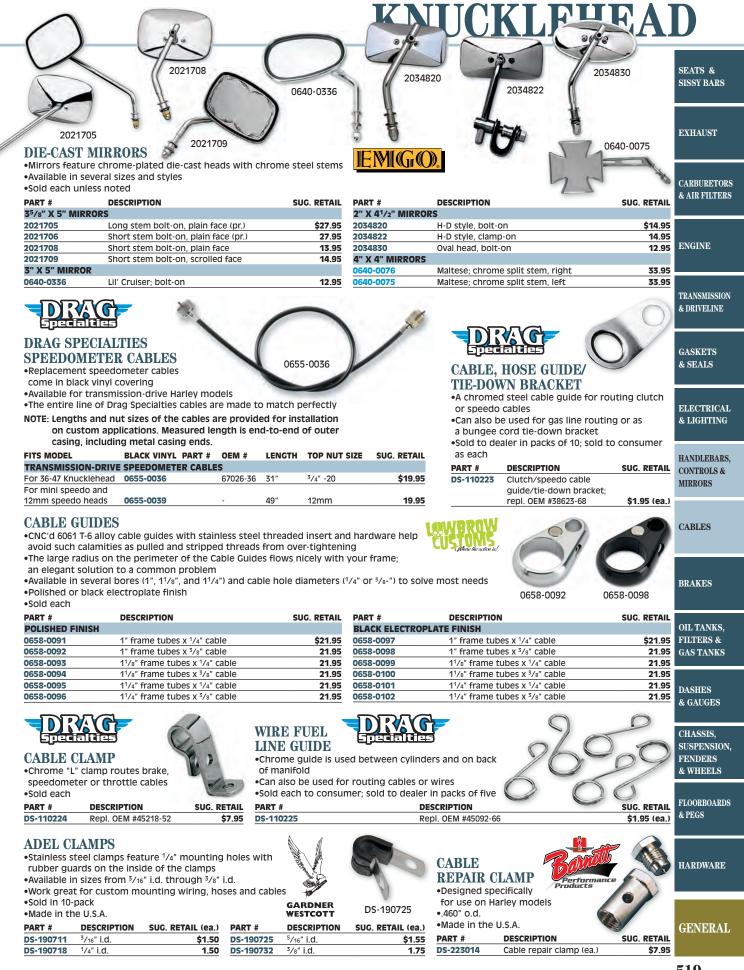

•Chrome mounting hardware and instructions included
